"A delightful read [and] an important addition to human-animal relations studies." —Anthropology Matters What does it mean to live and die in relation to other animals? *Animal Intimacies* posits this central question alongside the intimate—and intense—moments of care, kinship, violence, politics, indifference, and desire that occur between human and non-human animals. Built on extensive ethnographic fieldwork in the mountain villages of India's Central Himalayas, Radhika Govindrajan's book explores the number of ways that human and animal interact to cultivate relationships as interconnected, related beings. Whether it is through the study of the affect and ethics of ritual animal sacrifice, analysis of the right-wing political project of cow-protection, or examination of villagers' talk about bears who abduct women and have sex with them, Govindrajan illustrates that multispecies relatedness relies on both difference and ineffable affinity between animals. *Animal Intimacies* breaks substantial new ground in animal studies, and Govindrajan's detailed portrait of the social, political and religious life of the region will be of interest to cultural anthropologists and scholars of South Asia as well. "Immerses us in passionate case studies on the multiple relationships between Kumaoni villagers and animals in Uttarakhand." —European Bulletin of Himalayan Research "A memorable and innovative ethnography." —Piers Locke, University of Canterbury

Dusting off his tape recorder for this companion volume to his popular *River Pigs and Cayuses*, Ron Strickland focuses on Washington, his adopted home. In *Whistlepunks and Geoducks*, Strickland introduces readers to a remarkable group of storytellers, from old-timers to new arrivals. In searching for people whose stories would add up to a portrait of the Evergreen State, Strickland discovered a region as alive with folklore as it is with natural beauty. Ranchers and wheat farmers, fishers and loggers, Indians and city folk, saloonkeepers and Prohibition agents, oystermen and hippies, and, naturally, whistlepunks and geoduck hunters, all rub elbows on the streets and trails of Strickland's Washington state. The author provides a helpful glossary to local terms and adds an index to names, places and livelihoods. Black and white photographs from both personal and archive collections allow the reader to see as well as hear the storytellers. In his introduction, William Kittredge notes that part of the joy of listening to these spirited oral histories lies in experiencing the subjects' use of work-place lingo. The pickaroon, for example, is a pike pole used to break up log jakes, while the long two-person saws are called misery whips or Swedish fiddles. We hunger for stories about specific worlds, and the particularities of making a go of things, Kittredge writes. We search them for clues about how we might make our own efforts succeed.
