Asking uninsured and underinsured patients to make financial arrangements to resolve their accounts can be difficult for your staff in the best of circumstances. Even those patients with health insurance are often unprepared for the out-of-pocket costs they incur, whether in the form of a deductible or other non-covered expense. This training handbook gives patient access staff the training they need to handle this often-sensitive subject and obtain completed financial assistance applications. Staff will learn how to conduct successful financial counseling interviews and communicate with patients in a professional yet customer-friendly way to get the best results for all concerned. Author Sandra Wolfskill, FHFMA, uses a series of scenarios to demonstrate the best way to conduct a financial counseling interview. She also covers payment plans and bank loans Medicaid eligibility screening charity assistance screening federal poverty guidelines A final exam is also included, to document staff understanding of the concepts presented.

The history of financial assistance to students in high schools, colleges, and universities in this country underlies what the authors of this book see as a changing educational philosophy. From the founding of Harvard College in 1636, and its effort to provide employment for needy students, to money allocations made to land-grant colleges after the Civil War, and to the recent federal enactments, it is clear that there has been a shift from the concept of financial aid for only needy students to the concept of work-study programs as an integral part of the total educational process. This view is supported by the fact of current large federal appropriations for the development of such programs and by the fact that co-operative work-study programs have become a part of academic planning. A measure of the importance of this study may be derived from these figures: of the 7.6 million students in American universities and colleges at the present time, one in four participates in federally-financed aid programs; of the 2,242 million dollars in student aid granted in 1967, 70 percent came from the federal government in the form of work-study programs, outright grants, loans, and scholarships; and in large universities, from one-fourth to one-half of all students receive some sort of financial assistance. An important part of this work are the descriptions of work-study programs in operation in various universities and colleges. In addition, the authors' conclusions and

recommendations for structuring work-study programs will be valuable to administrators, counselors, and educators in general.

Covering all forms of financial assistance to students--gifts, loans, and work--this first comprehensive book on the subject takes a hard look at what is going on in American colleges and universities. The twenty-eight original essays, written for the volume, are especially timely for two reasons: first, institutions of higher education, both public and private, have a heightened interest in institutional financial support from all sources, including that available from student tuition (and thus indirectly from student financial-aid sources); and second, state and federal agencies, especially Congress, are reviewing and revising the aid programs which they sponsor (a matter of grave concern to institutions which depend on such funds for a substantial portion of their incomes). Divided into five parts, the work covers the philosophy and history of financial aid to students in American universities and colleges, the various programs currently in force, the organization and administration of student financial assistance, professional careers open to advisors, counselors, and administrators, and an overview summing up the ideas and recommendations of the distinguished professionals who have contributed to the volume. Though addressed primarily to administrators and to students of higher education, the book should be read by policy-makers--by college and university presidents and deans, by trustees, and by state and federal legislators.
