## MILLS MELODY

---

*Absolutely Best Cross-sections Book Ever* Tyndale House Publishers, Inc.

A fun, fact-packed introduction to the brain and nervous system for young science enthusiasts The brain - a wrinkly, spongy mass the size of a cauliflower that sits in our heads and controls everything we do! Discover what it's made of, how it works, and why we even need one in this fun, fact-packed introduction to the brain. Inside the pages of this STEM book for kids, budding young scientists will discover:

- An age-appropriate introduction to the brain, what it is, what it does, how it works, and how it evolved
- All about how scientists study the brain and nervous system
- Introduces concepts like how we think, what consciousness is, and how the brains of other animals are different
- Encourages young readers to develop an interest in STEAM fields - including biology, medicine, and science
- Each page is filled with engaging photographs and artworks with easy to understand text

Help them grow their brain while learning about it Filled with

colorful illustrations and bite-sized chunks of information, this book covers all your questions on everything from the anatomy of the brain and nervous system, to how information is collected and sent around the body. It also explores questions about the brain that we don't know the answers to yet! This educational book for kids introduces complex topics in an age-appropriate way, from how our brains learn, and how processes like making memories, thinking, emotions, and sleep happen in the brain. Kids will also learn about the weird and wonderful world of different animal brains and how they impact their behavior. With entertaining illustrated characters, clear diagrams, and fascinating photographs, children will love learning about their minds and this all-important organ. Keep little ones learning with more in the series The Brain Book is an ideal introduction to the brain and nervous system. Other titles in this educational book series include The Bacteria Book and The DNA Book - an excellent introduction to science for young readers and a great addition to any STEAM library.

**Rome** National Geographic Books

"...alive with animation and sound and chock-full of information".

-- Booklist

### **The Story of Buildings** DK Children

From Pytheas the Greek, who sailed to the Arctic Circle without a compass, to Neil Armstrong landing on the moon, here are 14 extraordinary journeys by land, sea and air - each remarkable for the way it was made, for the technology behind it, and for the inspiration it gave to future generations. Storytelling, fold-out cross sections, detailed maps and technical drawings enable readers to experience the excitement of exploration.

### **Stephen Biesty's Incredible Cross Sections of Everything** Macmillan

As One Devil to Another is an astonishing debut work that C. S. Lewis's biographer and foremost Lewis authority Walter Hooper calls "a stunning achievement, the finest example of the genre of diabolical correspondence to appear since this genre was popularized by C. S. Lewis." Enter into this chilling and diabolical tale, one that reveals the very tricks and strategies of Hell. Through a series of letters between devils created by Platt, senior devil Slashreap trains his young protégé, Scardagger, to win an individual soul away from Heaven and into their clutches. As the devils plot their way to triumph, they reveal the spiritual dangers and risks we face in today's society. Their frighteningly accurate perspective on issues such as contemporary technology and sexual mores is interwoven with timeless matters such as the power of prayer, the purpose of suffering, and the promises held out by Heaven . . . and Hell. Destined to become a modern classic, As One Devil to Another is a brilliantly written, deeply unsettling perspective on twenty-first-century society . . . a glimpse of ourselves through the eyes of those who have embraced their underworldly existence.

### **Castle** DK Publishing (Dorling Kindersley)

The Ancient World is the perfect subject for Stephen Biesty's illustrations - beautifully constructed, technologically advanced, and teeming with life. There are cross-sections, cut-aways and explosions, authoritative annotations, lists and explanations. Covers: Rome - including the Colosseum, the Forum, the Baths and chariot racing at the Circus Maximus Egypt - including the Valley of the Kings, the pyramids and Sphinx of Giza and preparation of a mummy and Egyptian funeral Greece - including Athenian warships at the sacred island of Delos, the rich silver mines of Laurion, the Acropolis and the sacred oracle at Delphi This book is destined to bring the ancient world to life for a wide range of readers.

### **Stephen Biesty's Incredible Body Cross-Sections** Lothian Children's Books

Reveal the inner workings of the human body with this illustrated atlas. How well do you know your body? What happens under your skin? Where exactly is your stomach? What does your liver do? How can ears help your balance? The Body Atlas answers all these questions and many more. This unique visual guide approaches a body as if it were a map, divided into "continents" (such as parts of the body) and "countries" (such as organs). You can see inside your body and examine it region by region - for example, the head and neck or the upper torso. These regions enclose vital structures, such as the brain, lungs, and heart, just as continents contain countries. Body systems such as the circulatory system (blood) and nervous system, link the body regions just like mountains and rivers range across countries. The detailed illustrations carefully pull back the layers of the body so you can see inside the hidden interior. All bones, muscles, and organs are clearly labeled with scientific and common names; and there are photos of parts you wouldn't normally be able to see, such as your vocal cords. Packed with amazing facts and illustrations, The Body Atlas takes you on a top-to-toe tour through your own anatomy. Now celebrating its 25th anniversary, this book has been refreshed for a new generation of budding

biologists and doctors-in-the-making.

### **Giant Vehicles** Penguin

Facts and figures for the curious reader. Covers more than 30 fascinating "general knowledge" topics, including shapes, tides, the solar system, and the periodic table.

### **Incredible Cross-Sections** National Geographic Books

Follows historical events in London's history and the persons who had or have inhabited London.

### **Plagues, Pox, and Pestilence** Scholastic Reference

Find out about the human body the fun way with the Little Brainwaves, now in eBook format Meet the Brainwaves, hilarious little mischief-makers who are about to shrink down to miniscule level and take your child on a spectacular journey around the human body; from milk teeth to our incredible circulatory system. Packed with brilliant photography, wonderfully wacky illustrations and amazing facts, your child will discover everything they ever wanted to know about the human body!

### **The Skeleton Book** National Geographic Books

See inside some of the world's most enormous vehicles in this amazing lift-the-flap book by the award-winning, bestselling illustrator Stephen Biesty. Discover eight monster machines: from the double-decker Airbus to the largest submarine on Earth, and from the planet's most massive dumper truck to the biggest helicopter ever made. Little engineers will love finding out about motors, periscopes, rocket engines and giant propellers in this fact-packed guide. Buckle up for the ride!

### **Richard Orr's Nature Cross-sections** Penguin

From straw huts to skyscrapers, palaces to arts centres, this book features sixteen of the most iconic buildings from around the world including the Parthenon, Notre Dame Cathedral, the Taj Mahal, the Forbidden City, the Bauhaus, Crystal Palace, the Sydney Opera House and the Pompidou Centre, and tells the human story behind each of them. Explains how and why famous buildings in history came to be built. Features detailed illustrations.

### **Where Does My Poo Go?** Dorling Kindersley Ltd

A collection of all the favourite Biesty titles: Incredible Cross-Sections, Incredible Explosions, Man-of-War, Castle, Incredible Body, and Incredible Everything, together with new illustrations, never seen before. This book reveals the insides of buildings, machines and landscapes, shows how many ordinary and extraordinary things are made and takes you on a journey through the human body.

### **Into the Unknown** Oxford University Press, USA

Includes detailed cross-sections of ecosystems, such as a rainforest, and structures, such as a beehive, a beaver lodge, a termite city, and a section of Arctic life. Tells how animals make their homes and the importance of conservation through an oversized format of double-page spreads and detailed pictures.

### **Stephen Biesty's Incredible Cross-Sections** Dorling Kindersley Multi Media

Text and cross-section illustrations present inside views of a variety of subjects including a space station, airport, and windmill.

### **Castle** DK Publishing (Dorling Kindersley)

Explore every deck, cabin, nook and cranny, hear the sounds of ship and sea in this interactive multimedia tour of an 18th-century man-of-war. The artists' illustrations bring to life a lost world of battles, hardship and heroism at sea.

### **Stephen Biesty's Incredible Cross-Sections** Penguin

Find out how your body works. Let the explorers show you... What happens when you are sick. Why the brain is the most sophisticated computer in the world. What makes your tummy rumble. What makes you dizzy.

### **Great Explorers** Penguin

This children's book explores the innermost workings of some extraordinary buildings and machines. From helicopters to submarines, skyscrapers to coal mines, open up a fascinating world packed with unique and detailed cutaway drawings. Whether it's a Spanish galleon or a medieval castle, each cross-section slice or exploded view reveals what's going on inside. See the people swarming inside the Empire State Building, the workers busy backstage at the opera house, and where the crew sleeps on a jumbo jet. Included also are two impressive foldouts showing an ocean liner and a steam train. There are lots of fun facts to be discovered, and curious details are highlighted and explained. Did you know one of the funnels of the Queen Mary liner was fake and used for storing deckchairs? And in almost every scene, there's the challenge to find a man on the toilet! With more than a million copies sold, Stephen Biesty's award-winning illustrated book is as fascinating today as it was when first published in 1992. Incredible Cross-Sections is the ultimate way to see how things work.

The Body Atlas Candlewick Press

Tells the history of diseases and epidemics and presents some information on efforts to fight them.

A World of Information OUP Oxford

"Text and detailed drawings follow the planning and construction of a "typical" castle and adjoining town in thirteenth-century Wales."--Title page verso.

The Brain Book Penguin

Short stories designed to help kids learn how to read and learn to love reading. A Trip Through the Body is a "Reading Alone" reader, perfect for children who are proficient readers. These short stories for children develop the habit of reading widely for both pleasure and information. DK Reads proves that good reads build great readers. Follow Dan and Mya on their journey around the human body as they're shrunk using exciting new technology. Propelled around the blood stream, hurtled down windpipes and escaping from white blood cells Dan and Mya discover inside the human body. Now available with text that lights up as you read-along and playful images and sounds.
