Despite long-term and ongoing efforts to close the achievement gap between disadvantaged and advantaged students, low-income students continue to perform at considerably lower levels than their higher-income peers in reading and mathematics. Research has shown that students' skills and knowledge often deteriorate during the summer months, with low-income students facing the largest losses. Instruction during the summer has the potential to stop these losses and propel students toward higher achievement. A review of the literature on summer learning loss and summer learning programs, coupled with data from ongoing programs offered by districts and private providers across the United States, demonstrates the potential of summer programs to improve achievement as well as the challenges in creating and maintaining such programs. School districts and summer programming providers can benefit from the existing research and lessons learned by other programs in terms of developing strategies to maximize program effectiveness and quality, student participation, and strategic partnerships and funding. Recommendations for providers and policymakers address ways to mitigate barriers by capitalizing on a range of funding sources, engaging in long-term planning to ensure adequate attendance and hiring, and demonstrating positive student outcomes.

Concerns over the potential ecological effects of fishing have increased with the expansion of fisheries throughout the marine waters of the United States.

Effects of Trawling and Dredging on Seafloor Habitat describes how assessment of fishing impacts depends on gear type, number and location of bottom tows, and the physical and biological characteristics of seafloor habitats. Many experimental studies have documented acute, gear-specific effects of trawling and dredging on various types of habitat. These studies indicate that low mobility, long-lived species are more vulnerable to towed fishing gear than short-lived species in areas where the seabed is often disturbed by natural phenomena. Trawling and dredging may also change the composition and productivity of fish communities dependent on seafloor habitats for food and refuge. The scale of these impacts depends on the level of fishing effort. This volume presents color maps of fishing effort for all regions with significant bottom trawl or dredge fisheries-the first time that such data has been assembled and analyzed for the entire nation.

The system that finances Michigan's schools from kindergarten through 12th grade is a perennial topic of conversation among policymakers, parents, taxpayers and voters. A constructive discussion of this issue, however, requires a sound knowledge of the financial workings of Michigan's elementary and secondary school system. This knowledge is precisely what the authors have attempted to provide. While the Mackinac Center for Public Policy has developed numerous policy recommendations over the years, this primer is exclusively informational. This primer addresses the following: (1) how revenues are raised for Michigan's elementary and secondary public school

system; (2) how money is distributed to education programs and school districts once it is collected by various taxing authorities; and (3) how districts budget monies to be spent on the various activities involved in operating schools and other educational programming. This book is arranged in four sections. The first--and the shortest--is "A Brief Overview of the Structure of Michigan's Public School System," which defines a few basic terms and sketches the main local, state and federal agencies involved in financing Michigan's public school system. This overview should help readers unfamiliar with Michigan's public school structure navigate the remainder of the book. The second, third and fourth sections are considerably longer than the first and cover the three areas: tax revenues, distribution of revenues and financial management of those revenues by school districts. Appended are: (1) U.S. Department of Education Spending in Michigan; (2) Summary of "Durant" Court Decisions; and (3) Guide to a New School Finance Electronic Module. An index is included. (Contains 29 graphs, 238 footnotes, and 410 endnotes, footnotes.) [This paper was written with the assistance of Glenda Rader, Darcy Marusich, Alison Taylor, Steve Zakem, John Schwartz, Thomas Moline, Charles Pisoni, Gary Start, Paul Soma, Tim Yeadon, Mary Ann Cleary, Douglas Newcombe, Vicki Duso, Clark Volz, Howard Heideman, Paul Brown, Phil Boone, Patrick Dillon, Jayne Klein, and Dianne Easterling.].

This book is the color print version (go here for the black and white version: <http://bit.ly/k12blended-print>). This book is your guide to blended teaching in K-12 settings. It was designed to help both

pre-service and in-service teachers prepare their classes for blended teaching. The book can be accessed in several different formats at <http://edtechbooks.org/k12blended>. This book begins by orienting you to the foundational dispositions and skills needed to support your blended teaching practice. Then you will be introduced to four key competencies for blended teaching which are: (1) Online Integration - ability to effectively combine online instruction with in-person instruction. (2) Data Practices - ability to use digital tools to monitor student activity and performance in order to guide student growth. (3) Personalization - ability to implement a learning environment that allows for student customization of goals, pace, and/or learning path. (4) Online Interaction - ability to facilitate online interactions with and between students. The final chapter of the book helps you bring all four competencies together as you implement blended teaching in your classroom.

This report is a resource for those who teach mathematics and statistics to PreK-12 mathematics teachers, both future teachers and those who already teach in our nation's schools. The report makes recommendations for the mathematics that teachers should know and how they should come to know that mathematics. It urges greater involvement of mathematicians and statisticians in teacher education so that the nation's mathematics teachers have the knowledge, skills, and dispositions needed to provide students with a mathematics education that ensures high school graduates are college- and career-ready as envisioned by the Common Core State Standards. This report draws on the experience and knowledge of the past decade to: Update the 2001 Mathematical Education of Teachers report's recommendations for the mathematical preparation of teachers at all grade levels: elementary, middle, and high school. Address the professional development of teachers of mathematics. Discuss the mathematical knowledge needed by teachers at different grade levels and by others who teach mathematics such as elementary mathematics specialists, special

education teachers, and early childhood educators. Each of the MET II writers is a mathematician, statistician, or mathematics educator with substantial expertise and experience in mathematics education. Among them are principal investigators for Math Science Partnerships as well as past presidents and chairs of the American Statistical Association, Association of Mathematics Teacher Educators, Association of State Supervisors of Mathematics, Conference Board of the Mathematical Sciences, and National Council of Teachers of Mathematics. The audience for this report includes all who teach mathematics to teachers--mathematicians, statisticians, and mathematics educators--and all who are responsible for the mathematical education of teachers--department chairs, educational administrators, and policy-makers at the national, state, school-district, and collegiate levels.

Standards for the Preparation of Literacy Professionals 2017 Penguin

Our 2nd edition Michigan 4th Grade ELA Test Prep for Common Core State Standards is an excellent resource to assess and manage student's understanding of concepts outlined in the Common Core State Standards Initiative. The material emphasized in this book is placed on Reading Literature and Reading Informational Text Common Core Standards. Practice problems in this book involve: answering questions that refer explicitly to stories as basis for answers; determining central messages, lessons, or moral as conveyed via key details in stories; determining meaning of words and phrases as they are used in the stories; describing how each successive part builds on earlier sections of the stories; distinguishing their own point of view apart from narrator or

characters in stories; explaining specific aspects of text's illustrations as it relates to the stories; and comparing and contrasting themes or plots in the stories. These standards are covered extensively through multiple-choice practice problems. This book contains over 250 practice problems aligned to each Common Core State Standard. In addition the book contains an answer key to practice problems. Paperback: 106 double-sided pages Publisher: Teachers' Treasures, Inc. Language: English

Militia Pay Bill Harvard Education Press "(Standards 2017) sets forth the criteria for developing and evaluating preparation programs for literacy professionals. In *Teaching Core Practices in Teacher Education*, Pam Grossman and her colleagues advocate an approach to practice-based teacher education that identifies “core practices” of teaching and supports novice teachers in learning how to enact them competently. Examples of core practices include facilitating whole-class discussion, eliciting student thinking, and maintaining classroom norms. The contributors argue that teacher education needs to do more to help teachers master these professional skills, rather than simply emphasizing content knowledge. *Teaching Core Practices in Teacher Education* outlines a series of pedagogies that teacher educators can use to help preservice students develop these teaching skills. Pedagogies include representations of practice (ways to show what this skill looks like and break it down into its component parts) and approximations of practice (the ways preservice teachers can try these skills out as they learn). Vignettes throughout the book illustrate how core practices can be incorporated into the teacher education curriculum.

The book draws on the work of a consortium of teacher educators from thirteen universities devoted to describing and enacting pedagogies to help novice teachers develop these core practices in support of ambitious and equitable instruction. Their aim is to support teacher educator learning across institutions, content domains, and grade levels. The book also addresses efforts to support teacher learning outside formal teacher education programs. Contributors Chandra L. Alston Andrea Bien Janet Carlson Ashley Cartun Katie A. Making the Grade

During his lifetime, W.E. Blatz was so much occupied with the development of the University of Toronto's Institute of Child Study that he was able to devote little time to writing. This is his first book to appear in twenty-one years, and his

first complete exposition of his famous Theory of Security. The Theory of Security is radically different from the theories promulgated by Freudian psychologists. Whereas Freudian personality theory is based on the notion of "unconscious," an entity that is only indirectly observable, the Theory of Security derives from the observation of the conscious state in all its manifestations. Dr. Blatz thus makes use of both empirical observations and the results of introspection, and, as might be expected, some of his conclusions run counter to those reached in much current psychological discussion. But proof of the forcible influence of the theory and its author may be found in the impressive number of books and articles already published by Dr. Blatz's associates at the Institute of Child Study, applying the theory to the practical problems of psychological observation and therapy. It is fitting that the man whose work has generated so much fruitful research by others in this field should at last have set down in book form the fundamental principles that guided them.
