Puzzles for Brain Straights - 400 Hard to Expert 9x9 Simon and Schuster

Solving puzzles are a fun way to stimulate your brain. The Big Brain Puzzle Book does just that, with over 150 Alzheimer's Association- approved puzzles from renowned brain teaser Terry Stickels. Stickels writes STICKELERS, a puzzle column, appearing in over 200 local and national newspapers daily. Here is a sampling of the types of mind bending, brain exercising puzzles inside: Frame Games Find an every day phrase hidden inside words or drawings of rebus puzzles. Spatial Visual Answer questions while looking at 3-dimensional objects on a 2 dimensional page. Squeezers Fill in the blanks with letters in the middle of two words creating two 2-syllable words. Word Search Find words within blocks of letters going horizontally, diagonally or vertically. Trivia Answer questions to seemingly obvious questions and learn something new in the process. Trickle-downs In five steps, changing one letter at a time, come up with a whole new word. Readers will enjoy this great variety of puzzles from renowned puzzle creator Terry Stickels, while benefiting a great cause.

*Puzzles for Brain - Straights 200 Hard Puzzles 9x9* Createspace Independent Publishing Platform

The solver is given a 9x9 grid, partially divided by black cells into compartments. Each compartment, vertically or horizontally, must contain a straight - a set of consecutive numbers, but in any order. For example: 7, 6, 4, 5 is valid, but 1, 3, 8, 7 is not. Like sudoku, the solver must fill the remaining white cells with numbers 1 to 9 (or 1 to n in puzzles with N cells per side) such that each row and column contains unique digits. Whereas Sudoku has the additional constraint of 3x3 boxes, in Str8ts rows and columns are divided by black cells. Additional clues are set in some of the black cells - these numbers remove that digit as an option in the row and column. Such digits do not form part of any straight.

Straights Puzzles - 200 Easy to Master Puzzles 9x9 Vol.8

Createspace Independent Publishing Platform

Straights is a logic puzzle. It is a grid, partially divided by black cells into compartments. Each compartment, vertically or horizontally, must contain a straight - a set of consecutive numbers, but in any order (for example: 2-1-3-4). The aim is to fill all white cells with the numbers from 1 to N (where N is the size of the grid). No single number can repeat in any row or column. Clues in black cells remove that number as an option in that row and column, and are not part of any straight.

FLEX YOUR brain power like never before! From acclaimed author Dr. Gary Gruber, whose proven critical-thinking methods have sold more than seven million books, this collection of mind-bending brain teasers is sure to challenge even the most experienced problem solver. Inside are logic puzzles, riddles, maddening math problems, mental games, and more! A ship is twice as old as the ship's boiler was when the ship was as old as the boiler is. The ratio of the boiler's age now to the ship's age now is what? What English word contains all the vowels, in alphabetical order? What is the three-digit number that can be made from the digits 2, 3, 5, and 7 where no two digits in the three-digit number are alike, and where the three-digit number is a multiple of each of the digits chosen? Stumped? Dr. Gruber reveals the fascinating explanations and detailed strategies for solving even the trickiest problems using his exclusive Gruber Method. **DISCLAIMER:** The brain teasers in this book may get you so wrapped up in critical thinking that you may not be able to do your regular work until you solve them! Any abrupt or gradual increase in creativity, intelligence, or motivation to get a better job suited to your newfound talents is strictly the reader's responsibility. For more than thirty years, Gary R. Gruber, PhD, has been recognized as a leading expert on the SAT, test-taking methods, and critical-thinking skills. His methods have been used by PBS, Sylvan Learning Centers, Grolier's Encyclopedia, and school districts throughout the country. Dr. Gruber's innovative problem-solving strategies make up the heart of the new MyMaxScore's online test prep ([www.mymaxscore.com](http://www.mymaxscore.com)).

Additional clues are set in some of the black cells - these numbers remove that digit as an option in the row and column. Such digits do not form part of any straight.

*Logic Brainteasers (Mensa)* Createspace Independent Publishing Platform

Tents ("Tents and Trees") is a logic puzzle. The playing board is

divided into squares. In some of them there are trees. The goal is to place tents in the free blocks by following several conditions: The number of tents and trees are equal. Tent must be located next (horizontally and vertically) to at least one tree. There can not be tents near to other tents (horizontally, vertically and diagonally). The number of tents in each row, and in each column, matches the numbers given round the sides of the grid.
