Cornerstone's Electoral Legislation covers the five principal kinds of UK elections: Parliamentary; European; Local Government; Parish; and Referendums. The legislation governing the conduct of elections is necessarily technical and highly prescriptive with electoral officers expected to absolutely adhere to the rules. As legislation is amended every year this title enables electoral officers ready access to up-to-date legislation. This is a new title in the 'Cornerstone' series which is published with the highly respected chambers.

Although much has been written about how the novel relates to the epic, the drama, or autobiography, no one has clearly analyzed the complex connections between prose fiction as it evolved before 1800 and the literature of travel, which by that date had a long and colorful history. Percy Adams skilfully portrays the emergence of the novel in the fiction of the seventeenth and eighteenth centuries and traces in rich detail the history of travel literature from its beginnings to the time of James Cook, contemporary of Richardson and Fielding. And since the recit de voyage and the novel were then so international, he deals throughout with all the literatures of Western Europe, one of the book's chief themes being the close literary ties

among European nations. Equally important in the present study is its demonstration that, just as early travel accounts were often a combination of reporting and fabrication, so prose fiction is not a dichotomy to be divided into the "adult" novel on the one hand and the "childish" romance on the other, but an ambivalence -- the marriage of realism and romanticism. Travel Literature and the Evolution of the Novel not only shows the novel to be amorphous and changing, it also proves impossible the task of defining the recit de voyage with its thousand forms and faces. Often the two types of literature are almost indistinguishable; even before Don Quixote, Adams writes, many travel accounts could have been advertised as having "the endless fascination of a wonderfully observed novel." This study by Percy Adams will both modify opinions about the novel and its history and provide an excellent introduction to the travel account, a form of literature too little known to students of belles lettres.

Notes From London: Above & Below is an unusual 42 page collection of annotated illustrations culled from journals carried on the artist's travels there between 2002 and 2009. These images are more than the straight reportage of Brits, bridges, buildings and double-decker buses that characterize travel brochures, posters and a myriad of merchandise. They are a synthesis of actual experiences filtered through her mind's eye that sees whatever, wherever and whenever it wishes. The annotations that accompany each image also synthesize the factual and the fantastic reflecting the idea that London is a visual smorgasbord for an array of appetites ranging from the simple to the sublime. It is a city whose streets, roundabouts, lanes and mews are lines in the map of human history.

The redecoration of the exhibition spaces at the Borghese palace and villa, undertaken together with the reinstallation of the family's vast art collections, was one of the most important events in the cultural life of eighteenth-century Rome. In this comprehensive study, Carole Paul reconstructs the planning and execution of the project and explains its multifaceted significance: its place in the history of Italian art, architecture, and interior design at a complex moment of transition from baroque to neoclassical style, as well as its unrecognized but profound influence on the development of the modern art museum. The study shows how the installations and decorations worked together to evoke traditional themes in innovative ways. Addressed primarily to a new audience of tourists from abroad, the thematic content of the spaces celebrated the greatness of the Borghese family and of Roman tradition, while their stylistic diversity and sophistication made a case for the continued vitality - even modernity - of Roman art and culture. Designed for the exercise of a highly refined social performance, these sites helped to model the experience of art as a form of enlightened modern civility.

This 26-volume set is a wide-ranging, time- and subject-spanning examination of the phenomenon of political protest. What drives people to take to the streets, and how do their governments respond? These questions and many more are analysed in areas as varied as sixteenth-century German peasant uprisings, revolutionary Russians at the Paris Commune, women protesting nuclear weapons at Greenham Common, and the role Christianity

played in protests across the ages. An impressive reference resource, this set also looks at the policing of protests and official responses to them.

The Stonor letters and papers form one of only three surviving archives of gentry correspondence from late medieval England. The collection - which includes documents ranging from love letters to household accounts - provides us with a wealth of otherwise unobtainable detail about the lives and careers of a gentry family, their servants and their friends. Much of the material comes from the period of the Wars of the Roses, and allows us an insider's view on national events and the people involved in them. Originally edited by the historian C. L. Kingsford at the beginning of the century, the complete collection is reissued here, with a new introduction and annotation by Christine Carpenter. In many ways more representative of gentry life than the Paston letters, the Stonor letters and papers will be invaluable to scholars of late medieval England, and will make fascinating reading for anyone interested in the Wars of the Roses or life in medieval England.
