Strategies for making differences in work teams an asset, not a liability are provided in this practical guide. Team members are helped to understand and make the most of their differences and to overcome barriers to achievement that are sometimes the result of diversity. More than 50 worksheets provide teams, team leaders, trainers, and consultants with processes, guidance, and tools to learn how to diversify groups while building relationships. An appendix provides an annotated list of resources, including books, training activities, and videos that are helpful in

developing group members and training team leaders.

Digital practices are shaped by graphical representations that appear on the computer screen, which is the principal surface for designing, visualizing, and interacting with digital information. Before any digital image or graphical interface is rendered on the screen there is a series of layers that affect its visual properties. To discover such processes it is necessary to investigate software applications, graphical user interfaces, programming languages and code, algorithms, data structures, and data types in their relationship with graphical outcomes and design possibilities. This book studies interfaces as images and images as interfaces. It offers a comprehensible framework to study graphical representations of visual information. It explores the relationship

between visual information and its graphical supports, taking into account contributions from fields of visual computing. Graphical supports are considered as material but also as formal aspects underlying the representation of digital images on the digital screen.

One of the acknowledged masters of the short story gives readers a gripping ride through narratives that shock, compel, and always entertain. Few authors in America write with such sheer love of language and imagination as T.C. Boyle, and nowhere is that passion more evident than in his inventive, wickedly funny, and widely praised short stories. In *After the Plague*, Boyle speaks of contemporary social issues in a range of emotional keys. The 16 tales gathered here address everything from air rage to abortion doctors to first love and its consequences. The collection ends with the brilliant title story, a whimsical and imaginative vision of a disease-ravaged Earth. Presented with characteristic wit and intelligence, this collection will delight readers in search of the latest news of the chaotic, disturbing, and achingly beautiful world in which we live. "Fine, vigorous short stories . . . this is a writer who can take you anywhere."—*The New York Times* "Uproarious and unforgiving."—*The New Yorker* "In an age of war where the foe is indistinct and difficult to identify, Boyle has become both the poet and the prophet of our time."—*Los Angeles Times* "Reads like a flip through the A-section of the newspaper . . . a vivid collage of millennial American life."—*The Philadelphia Inquirer* "Boyle's imagination and zeal for storytelling are in top form here."—*Publishers Weekly*

Academic institutions are facing a crisis in scholarly publishing at multiple levels: presses are stressed as never before, library budgets are squeezed, faculty are having difficulty publishing their work, and promotion and tenure committees are facing a range of new ways of working without a clear sense of how to understand and evaluate them. *Planned Obsolescence* is both a provocation to think more broadly about the academy's future and an argument for re-conceiving that future in more communally-oriented ways. Facing these issues head-on, Kathleen Fitzpatrick focuses on the technological changes especially greater utilization of internet publication technologies, including digital archives, social networking tools, and multimedia necessary to allow academic publishing to thrive into the future. But she goes further, insisting that the key issues that must be addressed are social and institutional in origin. Confronting a change-averse academy, she insists that before we can successfully change the systems through which we disseminate research, scholars must re-evaluate their ways of working how they research, write, and review while administrators must reconsider the purposes of publishing and the role it plays within the university. Springing from original research as well as Fitzpatrick's own hands-on experiments in new modes of scholarly communication through MediaCommons, the digital scholarly network she co-founded, *Planned*

Obsolescence explores all of these aspects of scholarly work, as well as issues surrounding the preservation of digital scholarship and the place of publishing within the structure of the contemporary university. Written in an approachable style designed to bring administrators and scholars into a conversation, *Planned Obsolescence* explores both symptom and cure to ensure that scholarly communication will remain vibrant and relevant in the digital future.

Three years have elapsed since the publication of the first edition of this book (in German). The continued interest of our readers and the rapid progress of our knowledge in many fields necessitates a thoroughly revised and somewhat enlarged new edition. Cell differentiation is a prerequisite of life. It is defined as the process leading to the qualitatively and quantitatively selective realization of distinct parts of a given genetic material. Cell differentiation comprises five main aspects: (1) signal reception and transformation, (2) selective rearrangements of the genetic material, (3) differential gene expression, (4) organization of gene expression programs and (5) intercellular

coordination of cell differentiation within the developmental programs of multicellular organisms. Despite the bewildering multiplicity of its results, i.e., the differentiated phenotypes of cells, there are apparently fundamental similarities with respect to the molecular mechanisms of the process itself. These mechanisms constitute the central subject of this book.

A searing novel, told in letter form, that explores the South African legacy of apartheid through the lens of a woman whose Black son has just murdered a white woman *Mother to Mother* is a novel with depth, at once an emotional plea for compassion and understanding, and a sharp look at the impacts of colonialism and apartheid on South African families. Inspired by the true story of Fulbright scholar Amy Biehl's murder, the book takes the form of a letter to the victim's mother. The murderer's mother, Mandisa, speaks of a life marked by oppression and injustice. Through her writing, Mandisa reveals a colonized society that not only allowed but perpetuated violence against women and impoverished Black South Africans under the reign of apartheid. This book is not an apology for the murder but rather something

more. It seeks to connect, through empathy and storytelling, one pained mother with another who is grief-stricken and in mourning. A beautifully written exploration of the society that bred such violence, *Mother to Mother* will resonate with readers interested in understanding and ending racial injustice, as well as the lasting colonial foundations of oppression.

Dress is a key marker of difference. It is closely attached to the body, part of the daily routine, and an unavoidable means of communication. The clothes people wear tell stories about their allegiances and identities but also about their exclusion and stigmatization. They allow for the display of wealth and can mercilessly display poverty and indigence. Clothes also enable people to play with identities and affinities: for instance, individuals can claim higher social status via their clothes. In many ways, dress is thus open to manipulation by the wearer and misinterpretation by the observer. Authorities—whether religious or secular, local or regional—have always aimed at imposing order on this potential muddle. This is particularly true for the

early modern era, when the world became ever more complex. In Europe, the composition of societies diversified with the emergence of new social groups and increasing migration and travel. Thanks to intensified long-distance trade and technological developments, new fashionable clothes and accessories entered the market. With the emergence of a consumer culture, it was now the case that not only the extremely wealthy could afford at least the occasional indulgence in luxury items and accessories. Over recent years, research has focused on a variety of areas related to dress and appearance in the context of early-modern political, socio-economic, and cultural transformations both within Europe and related to its entanglement with other parts of the world. Nevertheless, a significant compartmentalization in the research on dress and appearance remains: research is often organized around particular cities and territories, and much research is still framed by modern national boundaries. This special issue looks at dress and its perception in Europe from a transcultural perspective and highlights the many differences that clothing can express.

Did I hate him? Of course I hated him. But I never meant to kill him. Martyn hated his dad, but he never meant him to die. And now he has to tell the police what happened. Or hide the body. Simple, right? Not quite. One story leads to another. Secrets and lies become darker and crazier. And then everything shatters. Life is never easy. But death is even harder.

Sir Peter Medawar, as his many admirers know, was not only a great scientist but a great writer. The creative energy that earned

him the 1960 Noble Prize for Medecine for his pathbreaking work in immunology also fueled his many and varied writings. Books such as *Pluto's Republic*, *The Limits of Science*, and *The Hope of Progress* (to name but a few) made the ever-changing world of modern science accessible to non-specialists, and have since become small classics of their kind. As Lewis Thomas writes in his foreword to this posthumous collection, "some of the wisest remarks of the twentieth century" come from the pen of Peter Medawar. *The Threat and the Glory* explores the twin nature of modern science; its ability to inspire both hope and fear in its professional and lay observers. Medawar, of course, says it best when he writes of science's ability to make the seemingly impossible a reality, "scientists may exult in the glory, but in the middle of the twentieth century the reaction of ordinary people is more often to cower at the threat." This theme runs throughout this collection of writings which cover a characteristically wide range of topics: genetic engineering, evolution, philosophy, creativity, scientific fraud, the medical community, and attitudes toward death. Ranging in tone from these serious reflections on the nature of science to more lighthearted pieces such as "Son of Stroke"--a guide for long-term hospital patients based on his own experience as the victim of a cerebral hemorrhage--*The Threat and the Glory* entertains as much as it educates. Selected by his close friend David Pyke, these essays--some previously unpublished, many appearing in book form for the first time--show Medawar to have been not only a tireless truth-seeker, but also a merciless debunker of myths. Reading Medawar, we come to understand and accept the indispensable role of science in our world. Witty, incisive, and above all compassionate, *The Threat*

and the *Glory* will delight those who are familiar with Medawar's writing, and will be a special treat for those who are not.

INTERNATIONAL BESTSELLER • Hailed for its coiled eroticism and the moral claims it makes upon the reader, this mesmerizing novel is a story of love and secrets, horror and compassion, unfolding against the haunted landscape of postwar Germany. "A formally beautiful, disturbing and finally morally devastating novel." —Los Angeles Times When he falls ill on his way home from school, fifteen-year-old Michael Berg is rescued by Hanna, a woman twice his age. In time she becomes his lover—then she inexplicably disappears. When Michael next sees her, he is a young law student, and she is on trial for a hideous crime. As he watches her refuse to defend her innocence, Michael gradually realizes that Hanna may be guarding a secret she considers more shameful than murder.

Mother to Mother Harper Collins

An Edgar Award winner, Tom Franklin's *Poachers* collects ten stunning, bleak tales set in the woodlands, swamps and chemical plants along the Alabama River. Staking his claim as a fresh, original Southern voice, Tom Franklin's lyric, deceptively simple

prose conjures a world where the default setting is violence, a world of hunting and fishing, gambling and losing, drinking and poaching—a world most of us have never seen. In the chilling title novella, three wild boys confront a mythic game warden as mysterious and deadly as the river they haunt. And, as a weathered, hand-painted sign reads: “Jesus is not coming.” This terrain isn’t pretty, isn’t for the weak of heart, but in these deperate, lost people, Franklin somehow finds the moments of grace that make them what they so abundantly are: human. “While he may occasionally wax sentimental about life in the impoverished South, Franklin’s style is often as laconic and simply spoken as his characters’ dialogue, sometimes close to Hemingway, but more often akin to Denis Johnson or Raymond Carver in its resonant ordinariness.” —Publishers Weekly
