This dynamic approach to an exciting form of

teaching and learning will inspire students to gain insights and complex thinking skills from the school library, their community, and the wider world. Guided inquiry is a way of thinking, learning, and teaching that changes the culture of a school into a collaborative inquiry community. Global interconnectedness calls for new skills, new knowledge, and new ways of learning to prepare students with the abilities and competencies they need to meet the challenges of a changing

world. The challenge for the information-age school is to educate students for living and working in this information-rich technological environment. At the core of being educated today is knowing how to learn and innovate from a variety of sources. Through guided inquiry, students see school learning and real life meshed in meaningful ways. They develop higher order thinking and strategies for seeking meaning, creating, and innovating. Today's

schools are challenged to develop student talent, coupling the rich resources of the school library with those of the community and wider world. How well are you preparing your students to draw on the knowledge and wisdom of the past while using today's technology to advance new discoveries in the future? This book is the introduction to guided inquiry. It is the place to begin to consider and plan how to develop an inquiry learning program for your students.

The Digestive System 6-Pack Teacher Created Materials

This title addresses how we need food to fuel our bodies. It teaches students what happens during the digestive process. How the saliva starts the process and how the stomach and intestines break down food so it can be digested properly. Also talks about the digestion system of animals (herbivores, meat-eaters).

Nutrition Education Materials Univ. Press of Mississippi

Chip Block, the hero of Parts, is back, and still worried about falling apart based on the things he hears. This time he's made a list of all the strange, crazy things he's heard people say: "I lost my head." "My nose is running." "I sang my heart out. . . ." It's scary stuff, but he has a plan for making sure he doesn't accidentally leave any of his parts behind. A hilarious sequel to the wildly popular Parts and More Parts.

Capstone

Contains descriptions of 574 computer-assisted programs for health promotion and patient education. Delivery formats included floppy disk, CD-ROM, CD-i, and videodisc systems.

### The Latest and Best of TESS Simon and Schuster

This practical resource emphasizes the special contribution that visual art, drama, music, and

dance can make to student literacy and understanding of content area reading assignments. Focusing on those areas where students tend to struggle, this book helps K—5 teachers provide an age-appropriate curriculum that is accessible to an increasingly diverse student population but does not ignore other important aspects of healthy human development. Without detracting from the rigor of a demanding curriculum, Brouillette

demonstrates how arts integration allows students to engage with concepts on their own developmental level. Each chapter focuses on a skill set that is fundamental to literacy development, suggests age-appropriate arts integration activities that will build that skill, and offers guidance for fostering a sense of community. “A thoughtful look into issues surrounding arts integration as a viable strategy for increasing students’ achievement and access to higher

education and career pathways.” —Kristen Greer-Paglia, CEO, P.S. ARTS “An excellent guide to teachers aspiring to integrate the arts into their curriculum, it is both a delightful and useful read!” —Liora Bresler, University of Illinois, Champaign-Urbana  
**Quick Bibliography Series** Teacher Created Materials  
 Investigate the digestive system with colorful pictures and diagrams that demonstrate the journey food takes through the body while

learning the importance of eating healthy. Vocabulary related to all parts of the digestive system is introduced in this book.

Digestion and Using Food 6-Pack Corwin Press  
 Notebooking journal for elementary study of human anatomy, written from a Christian perspective.

**Digestive Health Solution** Robinson  
 Get students' blood pumping and their minds jumping Full-color photographs and basic diagrams support simple

text to introduce the main systems of the human body, one at a time. This fascinating series will make learning the science of the human body easy to digest even for beginning readers. This series explores and supports the standard "The Human Organism: Basic Functions," as required by Benchmarks for Science Literacy: Project 2061

Introduces the digestive

system, including the digestive process, the organs involved in digestion, and common problems and diseases associated with the digestive system.

*The Digestive System*

Teacher Created Materials  
Are you suffering from Irritable Bowel Syndrome?

Do you have episodes of wind, bloating, constipation and diarrhoea? If so, this probably means that your digestive system is not functioning properly and you need to find out why. Based on proven methods

applied in her own practice, Hilda Glickman discusses the symptoms of IBS, shows you how to test at home for the possible causes and looks at how you can improve your overall health through simple changes to your diet. Written in a clear, accessible style, this book offers a five-step plan that will enable you to

- Find out and eliminate what should not be in your digestive tract
- Add in what should be in the digestive tract
- Facilitate the reintroduction of beneficial bacteria
- Heal

and strengthen your digestive tract ·Learn how you should eat in order to maintain a healthy digestion Your digestive system doesn't exist on its own. If it is not functioning correctly your overall health will be adversely affected. This book will show you how to heal your gut, improve your health, and prevent further problems.
