**Der Aufstieg und Fall der Dinosaurier** Millbrook Press

Bildsachbuch. Aufstieg und Niedergang einer faszinierenden Tiergruppe. (ab 12).

Dinosaurier Millbrook Press

"Dino" Don Lessem brings readers face-to-face with various dinosaur species, detailing their habitats, way of life and how they became extinct. An acclaimed dinosaur expert, Don Lessem has written more than 30 children's books, writes a popular dinosaur column in Highlights magazine, and was an adviser for Jurassic Park. Take a trip through dinosaur time to meet these deadly dinosaurs face-to-face: The Variraptor had pointy teeth with grooves like steak knives to saw through meat! The Draeomaeosaurus was the first raptor ever discovered. It had a very large brain! The Microraptor was no larger than a crow and is the closest known relative to birds! Plus, you'll get to know Utahaptor, Deinonychus, Megaraptor, Pyroraptor, and Velociraptor.

**Dinosaur Odyssey** Macmillan

"THE ULTIMATE DINOSAUR BIOGRAPHY," hails Scientific American: A thrilling new history of the age of dinosaurs, from one of our finest young scientists. "A masterpiece of science writing."

—Washington Post A New York Times Bestseller • Goodreads Choice Awards Winner • A BEST BOOK OF THE YEAR: Smithsonian, Science Friday, The Times (London), Popular Mechanics, Science News

"This is scientific storytelling at its most visceral, striding with the beasts through their Triassic dawn, Jurassic dominance, and abrupt demise in the Cretaceous." —Nature The dinosaurs. Sixty-six million years ago, the Earth's most fearsome creatures vanished. Today they remain one of our planet's great mysteries. Now *The Rise and Fall of the Dinosaurs* reveals their extraordinary, 200-million-year-long story as never before. In this captivating narrative (enlivened with more than seventy original illustrations and photographs), Steve Brusatte, a young American paleontologist who has emerged as one of the foremost stars of the field—naming fifteen new species and leading groundbreaking scientific studies and fieldwork—masterfully tells the complete, surprising, and new history of the dinosaurs, drawing on cutting-edge science to dramatically bring to life their lost world and illuminate their enigmatic origins, spectacular flourishing, astonishing diversity, cataclysmic extinction, and startling living legacy. Captivating and revelatory, *The Rise and Fall of the Dinosaurs* is a book for the ages. Brusatte traces the evolution of dinosaurs from their inauspicious start as small shadow dwellers—themselves the beneficiaries of a mass extinction caused by volcanic eruptions at the beginning of the Triassic period—into the dominant array of species every wide-eyed child memorizes today, T. rex, Triceratops, Brontosaurus, and more. This gifted scientist and writer re-creates the dinosaurs' peak during the Jurassic and Cretaceous, when thousands of species thrived, and winged and feathered dinosaurs, the prehistoric ancestors of modern birds, emerged. The story continues to the end of the Cretaceous period, when a giant asteroid or comet struck the planet and nearly every dinosaur species (but not all) died out, in the most extraordinary extinction

event in earth's history, one full of lessons for today as we confront a "sixth extinction." Brusatte also recalls compelling stories from his globe-trotting expeditions during one of the most exciting eras in dinosaur research—which he calls "a new golden age of discovery"—and offers thrilling accounts of some of the remarkable findings he and his colleagues have made, including primitive human-sized tyrannosaurs; monstrous carnivores even larger than T. rex; and paradigm-shifting feathered raptors from China. An electrifying scientific history that unearths the dinosaurs' epic saga, *The Rise and Fall of the Dinosaurs* will be a definitive and treasured account for decades to come. Includes 75 images, world maps of the prehistoric earth, and a dinosaur family tree.

**The Ultimate Book of Dinosaurs** Houghton Mifflin Harcourt

In early July 1899, an excavation team of paleontologists sponsored by Andrew Carnegie discovered the fossil remains in Wyoming of what was then the longest and largest dinosaur on record. Named after its benefactor, the *Diplodocus carnegii*—or Dippy, as it's known today—was shipped to Pittsburgh and later mounted and unveiled at the Carnegie Museum of Natural History in 1907.

Carnegie's pursuit of dinosaurs in the American West and the ensuing dinomania of the late nineteenth century coincided with his broader political ambitions to establish a lasting world peace and avoid further international conflict. An ardent philanthropist and patriot, Carnegie gifted his first plaster cast of Dippy to the British Museum at the behest of King Edward VII in 1902, an impulsive diplomatic gesture that would result in the donation of at least seven reproductions to museums across Europe and Latin America over the next decade, in England, Germany, France, Austria, Italy, Russia, Argentina, and Spain. In this largely untold history, Ilja Nieuwland explores the influence of Andrew Carnegie's prized skeleton on European culture through the dissemination, reception, and agency of his plaster casts, revealing much about the social, political, cultural, and scientific context of the early twentieth century.

Dinosaur memories are hard to forget! Most who revel in the current renaissance in dinosaur science, art, fiction and movies, or who enjoy the other appealing prehistoric animals so well popularized by the media have fond recollections of what it was like growing up dinosaur. Together with wife Diane and his father Allen G. Debus, Allen A. Debus unveils treasured dinosaur memories and stories about prehistoric animals and paleo-people, spanning from the cold-blooded dinosaur era, to the modern wave dinosaur renaissance. Beginning with fondly recalled roadtrips to prehistoric places where T. rex still reigns, *Dinosaur Memories* ventures into the realm of thunder beasts and explores the rich pop-cultural appeal of prehistoric animals. If you've ever collected dinosaurs, enjoyed fossil hunting or visits to see the old bones in museums, *Dinosaur Memories* is a book you'll still recall years from now! Thirty-five chapters are grouped into seven sections titled, Roads Into Prehistory, Thunder Beasts, Dinosaur Worlds, Fantasy Dinosaurs, Fossil Trickery, Paleo-people, and Rustlin up Dinosaurs.

**Dinosaurier, Panzertiere, Terrorvögel** Princeton University Press

"Did you know that one dinosaur had four times as many teeth as a human being? Ever wonder

which dinosaur had the longest claws? Can you guess which dinosaur had plates in its eyelids? Check out all of the mind-bending, amazing facts about dinosaurs!"--Page 4 of cover.

*The Rise and Fall of the Dinosaurs* Smithsonian Institution

Die PHANTASTISCH! ist eine Zeitschrift für Science Fiction, Fantasy und Horror. Sie erscheint alle 3 Monate neu in gedruckter Form (5,95 EUR) und als PDF-Ausgabe (3,99 EUR). Interviews, Artikel, Rezensionen und vieles mehr bietet sie. Die Ausgabe 76 bietet unter anderem Artikel über die TV-Serie "The Orville", über Krimi-Szenarien in Alternativromanen, Interviews mit den Autorinnen Marina J. Lostetter und Jenny-Mai Nuyen und den Autor Sebastian Pirling, viele Rezensionen, News und die Kurzgeschichte "Der Mann, der die Stürme brachte" von Carolina Hofstätter.

*How to Build a Dinosaur* Arcturus Publishing

"Introduces young readers to Tyrannosaurus Rex, including physical characteristics, diet, habitat, life cycle, and the Cretaceous period"--

*Tyrannosaurus Rex* Capstone

Derek ist elf Jahre alt und lebt den Traum jedes Jungen seines Alters: Er hat einen echten Tyrannosaurus Rex als besten Freund! In SUPER DINOSAUR - der neuen Comic-Hitserie von Robert Kirkman (THE WALKING DEAD) für jung und alt! - muss Derek Dynamo zusammen mit SD, seinem urzeitlichen Partner, die Welt der Dinosaurier im Inneren der Erde beschützen. Sie wird bedroht von Max Maximus, Wissenschaftler und ehemaliger Laborkollege von Dereks Vater, welche gemeinsam die Innere Erde und die darin liegenden, unglaublichen Möglichkeiten für die Forschung entdeckten. Maximus will die Reichtümer und Dinosaurier für seine eigenen, egoistischen Zwecke nutzen, während Dereks Vater und Derek das Wohle aller im Auge behalten. Derek ist ein kleines Wunderkind, das mit Leichtigkeit die schwierigsten Formeln und Aufgaben löst und seine eigenen Maschinen und Apparate entwirft, die ihn im Kampf unterstützen. Auch Super Dinosaur ist fantastisch ausgestattet. Der sprechende und genetisch veränderte Dinosaurier hat allerlei Kampfanzüge, die ihm in jeder Lage die richtigen Werkzeuge und Utensilien zur Verfügung stellen, egal ob Unterwasser, in der Arktis, in der Luft, wenn einfach pure Feuerkraft benötigt wird, oder seine kleinen Dino-Arme einfach Mal zu kurz sind. Sorgen hat Robert Kirkman nicht, dass er wegen des weltweiten Megaerfolgs von THE WALKING DEAD (fortlaufend seit 2003) immer der "Zombie-Kerl" sein wird. Dafür sind seine anderen Projekte viel zu erfolgreich. Besonders sein zweiter Schritt nach THE ASTOUNDING WOLF-MAN (2007-2010, 25 Ausgaben) in Richtung Comicspass für ein eher jüngeres Publikum überzeugt in seiner Heimat, den USA, seit 2011 erneut Leser und Kritiker: SUPER DINOSAUR. Wie schon bei der ersten Kids-Serie griff auch hier Jason Howard zum Zeichenstift. Hinter SUPER DINOSAUR stand der Wunsch, ein spannende Geschichte zu veröffentlichen, die er, Kirkman, gemeinsam mit seinem Sohn Peter Parker (!) lesen kann. Eine Art Pixar-Film auf Papier!

**Peterson First Guide to Dinosaurs** Heinemann Library

Describes the origins, habits, and anatomy of dinosaurs, profiles specific dinosaurs and contemporary flying and aquatic reptiles, and discusses theories about their extinction and the search for their remains.

**Dinosaurier AG** iUniverse

The Walking with Dinosaurs Encyclopedia is filled with facts about the dinosaurs from the movie as well as facts about the world the dinosaurs inhabited and theories about their rise and fall. With full-

color images from the film and photos of paleontologists at work, this encyclopedia is a must-have item for Walking with Dinosaurs fans. Walking with Dinosaurs, a six-part documentary on the BBC, is now the most watched cable documentary ever, as well as a long-running live stage show. The long-awaited 3D motion picture comes out this December, and is sure to thrill fans.

*Walking with Dinosaurs Encyclopedia* Columbia University Press

Introduces the names and characteristics of dinosaurs, along with recent discoveries that shed new light on the way dinosaurs may have lived.

*American Dinosaur Abroad* AuthorHouse

The horned dinosaurs, a group of rhinoceros-like creatures that lived 100 to 65 million years ago, included one of the greatest and most popular dinosaurs studied today: Triceratops. Noted for his flamboyant appearance--marked by a striking array of horns over the nose and eyes, a long bony frill at the back of the head, and an assortment of lumps and bumps for attracting females--this herbivore displayed remarkable strength in its ability to fight off Tyrannosaurus rex. It was also among the last dinosaurs to walk the earth. In telling us about Triceratops and its relatives, the Ceratopsia, Peter Dodson here re-creates the sense of adventure enjoyed by so many scientists who have studied them since their discovery in the mid-nineteenth century. From the badlands of the Red Deer River in Alberta to the Gobi Desert, Dodson pieces together fossil evidence to describe the ceratopsians themselves--their anatomy, biology, and geography--and he evokes the human dimension of their discovery and interpretation. An authoritative survey filled with many original illustrations, this book is the first comprehensive presentation of horned dinosaurs for the general reader. Dodson explains first the fascinating ways in which the ceratopsians dealt with their dangerous environment. There follows a lesson on ceratopsian bone structure, which enables the reader quickly to grasp the questions that still puzzle scientists, concerning features such as posture, gait, footprints, and diet. Dodson evenhandedly discusses controversies that continue, for example, over sexual dimorphism and the causes of the dinosaurs' disappearance. Throughout his narrative, we are reminded that dinosaur study is a human enterprise. We meet the scientists who charmed New York high society into financing expeditions to Mongolia, home of Triceratops' predecessors, as well as those who used their poker winnings to sustain paleontology expeditions. Rich in fossil lore and in tales of adventure, the world of the Ceratopsia is presented here for specialists and general readers alike. Originally published in 1996. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

**The Dinosaur Filmography** Turtleback

"Dino" Don Lessem brings readers face-to-face with various dinosaur species, detailing their habitats, way of life and how they became extinct. An acclaimed dinosaur expert, Don Lessem has written more than 30 children's books, writes a popular dinosaur column in Highlights magazine, and was an adviser for Jurassic Park. Take a trip through dinosaur time to meet these smart dinosaurs face-to-face: Troodon were the smartest dinosaurs! They would dig their prey (small rodents) out of

the ground and could predict the movements of bugs! Giganotosaurus can recognize many dinosaurs from very far away by their smell! The Deinonychus worked together to sneak up on and surround their prey! Plus, you'll get to know Gallimimus, Laellynasaura, Microraptor, and Tyrannosaurus Rex!

The Rise and Fall of the Dinosaurs Penguin

What were the dinosaurs? What was the world like in which they lived? What ended their 150-million-year reign? What if they had survived? The World of Dinosaurs Revealed A collaboration to excite the mind and dazzle the eye, probing such mysteries as: • Where the first dinosaurs appeared and how they evolved • How the giant sauropods lived and reared their young • Hunting strategies among the predators • Migratory habits and family life of the dinosaurs • Possible causes of extinction and much more... An extraordinary new look at the prehistoric life of the dinosaurs by some of the world's foremost paleontologists, dinosaur illustrators, and visionary authors. This unique collaboration produces a spectacular tour of the world of the dinosaurs with vivid pictures, fascinating new ideas and thought-provoking tales by a dozen respected dreamers.

This Walking with Dinosaurs Encyclopedia is filled with facts about the dinosaurs from the movie as well as facts about the world the dinosaurs inhabited and theories about their rise and fall. With full-colour images from the film and photos of paleontologists at work, this encyclopedia is a must-have item for Walking with Dinosaurs fans. The original TV series, Walking with Dinosaurs, had 70 million viewers and the long-running live stage show has sold 7 million tickets. The long-awaited 3D motion picture comes out this December, and is sure to thrill fans.

*Leben bleibt rätselhaft* Capstone

»Die ultimative Dinosaurier Biographie« SCIENTIFIC AMERICAN Noch immer haftet den Dinosauriern das Image der schwerfälligen, primitiven Monster an, die zu groß waren, um zu überleben. Doch bevor sie von der Erdoberfläche verschwanden, beherrschten die faszinierenden Giganten über 150 Millionen Jahre lang unseren Planeten. Modernste Technologien und spektakuläre Funde erlauben nun neue Einblicke in ihre Erfolgsgeschichte. Steve Brusatte, einer der führenden Paläontologen der

Welt, führt uns anschaulich durch das untergegangene Reich der Dinosaurier. Lebendig erzählt er ihre Geschichte von den ersten Rieseneidechsen bis zum Aussterben. Dabei gibt er spannende Einblicke in seine Forschung und berichtet von spektakulären Ausgrabungen, etwa von Fleischfressern, die sogar größer waren als der Tyrannosaurus rex. neue Erkenntnisse über eine verlorene Welt von einem der renommiertesten Paläontologen der Welt reich bebildert und illustriert

**The Rise and Fall of the Dinosaurs** HarperCollins

66 million years ago the dinosaurs were wiped from the face of the earth. Today a new generation of dinosaur hunters, armed with cutting edge technology, is piecing together the complete story of how the dinosaurs created a hugely successful empire that lasted for around 150 million years. In this hugely ambitious and engrossing story of how dinosaurs rose to dominate the planet, using the fossil clues that have been gathered using state of the art technology, Steve Brusatte, one of the world's leading paleontologists, follows these magnificent creatures from the Early Triassic period at the start of their evolution, through the Jurassic period to their final days in the Cretaceous' and the legacy that they left behind. Along the way, Brusatte introduces us to the cast of new dinosaur hunters and gives an insight into what it's like to be a paleontologist whose job it is to hunt for dinosaurs. He offers thrilling accounts of some of the remarkable discoveries he has made, including primitive human-sized tyrannosaurs, monstrous carnivores even larger than T. rex, and feathered raptor dinosaurs preserved in lava from China. At a time when Homo sapiens has existed for less than 200,000 years and we are already talking about planetary extinction, The Rise and Fall of the Dinosaurs is a timely reminder of what humans can learn from the magnificent creatures who ruled the earth before us.

The Smartest Dinosaurs Cross Cult

Explores some of the theories regarding the extinction of the dinosaurs. Grades 3-5.

*The Horned Dinosaurs* Millbrook Press

Jack Horner and his colleagues in molecular biology labs are poised to create a real dinosaur based on the latest breakthroughs - without using prehistoric DNA. The mystery ingredient in this recreation is the genetic code for building dinosaurs that lives on in modern birds.
