Rien n'est plus mystérieux et objet de plus de convoitise qu'un best-seller. Certains livres sont conçus en fonction de recettes menant automatiquement au succès. D'autres, issus du même moule, passent complètement inaperçus – tandis que certains ouvrages réputés difficiles reçoivent parfois un accueil enthousiaste du

public. Quel point commun peut-on trouver entre le Capital et Harry Potter, Le Petit Prince et Belle du Seigneur ? Existe-t-il un secret, une technique, permettant de transformer n'importe quel manuscrit en n° 1 des ventes ? Quelle part revient à l'auteur dans cette réussite ? à l'éditeur ? aux lecteurs ? Finalement, depuis le XIXe siècle, que nous disent les best-sellers ? S'agit-il d'une catégorie historique, dont on peut relater l'invention ? Nous racontent-ils l'histoire

d'un horizon de réception : celui du « grand public » ? Peut-on, de Walter Scott aux Fifty Shades of Grey, bâtir une histoire de la culture commune au plus grand nombre ? D'ailleurs, les lire, est-ce forcément les aime ? Une pléiade de spécialistes de la littérature et des métiers du livre se penche ici avec intérêt sur ces livres exceptionnels, habituellement traités avec mépris. The Fishes of Tennessee Clarendon Press The waters of Tennessee are home to about three

hundred species of fishes, the most diverse collection of freshwater fauna of any state in the country. This readable and authoritative book, first published in 1993, examines that diversity within the state's complex natural history. It not only synthesizes a wealth of scientific information but also presents a tremendous amount of original research. Species accounts provide information on the classification, identification, biology, distribution, taxonomy,

and current status of Tennessee's fishes -- many of which are endangered. Taxonomic keys provide readers with guides for distinguishing species. Extensive use is made of high-quality photographs, range maps, and drawings. For this second printing, the authors have provided corrections and updated information. This data includes seven new species accounts and new distributional information.

The leading historians who are the authors of this work offer a highly original account of one of the most important transformations in Western culture: the change brought about by the discovery and development of printing in Europe. Focusing primarily on printed matter other than books, *The Culture of Print* emphasizes the specific and local contexts in

which printed materials, such as broadsheets, flysheets, and posters, were used in modern Europe. The authors show that festive, ritual, cultic, civic, and pedagogic uses of print were social activities that involved deciphering texts in a collective way, with those who knew how to read leading those who did not. Only gradually did these collective forms of appropriation give way to a practice of reading--privately, silently, using the eyes alone--that has become common today.

This wide-ranging work opens up new historical and methodological perspectives and will become a focal point of debate for historians and sociologists interested in the cultural transformations that accompanied the rise of modern societies. Originally published in 1989. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University

Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905. **Systematics of the Neotropical Characiform Genus Cyphocharax Fowler (Pisces:Ostariophysi)** Maxima

The invention of collage by Picasso and Braque in 1912 proved to be a dramatic turning point in the development of Cubism and Futurism and ultimately one of the most significant innovations in twentieth-century art. Collage has traditionally been viewed as a new expression of modernism, one allied with modernism's search for purity of means, anti-illusionism, unity, and autonomy of form. This book - the first comprehensive study of collage and its relation to

modernism - challenges this view. Christine Poggi argues that collage did not become a new language of modernism but a new language with which to critique modernism. She focuses on the ways Cubist collage - and the Futurist multimedia work that was inspired by it - undermined prevailing notions of material and stylistic unity, subverted the role of the frame and pictorial ground, and brought the languages of high and low culture into a new relationship of

exchange.

The history of the Order of Friars Minor during the first one and a half centuries of its existence is maybe the most studied period of the 800 years of Franciscan presence in the Church. The

publication of the Sources for the lives of Saint Francis and Saint Clare of Assisi in all the main European languages has been of considerable help to spread the historical knowledge regarding Francis of Assisi and his movement and make it available to the average reader. Among these Sources, the *Chronica XXIV Ministrorum Generalium Ordinis fratrum Minorum* by Arnald of Sarrant merits particular attention. It tells the story of the Franciscan Order from the

time of Saint Francis till the beginning of the Western Schism in 1378, and therefore contains valuable information regarding the initial period of Franciscan history. Unfortunately it is not easily available in translation because of its voluminous nature. In fact, it covers a total of 712 pages of the third volume of *Analecta Franciscana*, published by the Franciscan editors of Quaracchi in 1897. Our aim has been that of embarking on the arduous task of translating this

voluminous work of history into English from the original Latin. This translation is the fruit of three years of work, and we are now happy to present it to the general public. Because of its voluminous nature we intend to divide it into 5 sections, four of which cover the 575 pages of text and one the appendixes. The whole 575 page Chronicle is here available in 4 sections covering respectively the following historical periods: (1) Saint Francis and the

early Franciscan fraternity; (2) The Generals from brother Elias as vicar (1227) to Saint Bonaventure (1274); (3) The Generals from Jerome of Ascoli (1274) to Michael of Cesena (1328); (4) The Generals from Gerard Eudes (1329) to Leonard of Giffoni (1378). A last section will be the translation of the appendixes. The translation is enriched by footnotes and explanations on the various historical events narrated and on the personages of the

Chronicle. Our aim has been simply that of providing a readable translation, without pretending to be scholars of mediaeval Latin. We hope that the service we are offering at such an enormous cost of time and personal effort will be of benefit both to students of Franciscan history as well as to those who are qualified to correct its inaccuracies, and who we gratefully thank for their eventual advice and corrections [The History of the Mohammedan Dynasties](#)

Though rarely included in traditional music history, women have a remarkable tradition as composers of Western music. This book brings together musical and biographical material on

twenty-five women, from the eleventh through the twentieth centuries. Each chapter focuses on one composer, providing an introduction to her life, an analysis of her music, a checklist of her works, and a bibliography. Extensive appendices include a historical outline showing female composers in relation to their more famous male contemporaries by period and genre, and suggestions for further readings and recordings.

By examining in detail the material life of pre-industrial peoples around the world, Fernand Braudel significantly changed the way historians view their subject. Originally published in the early 1980s, *Civilization* traces the social and economic history of the world from the Middle Ages to the Industrial Revolution, although his primary focus is Europe. Braudel skims over politics, wars, etc., in favor of examining life at the grass roots: food, drink, clothing,

housing, town markets, money, credit, technology, the growth of towns and cities, and more. Volume I describes food and drink, dress and housing, demography and family structure, energy and technology, money and credit, and the growth of towns.

The Rhaeto-Romance languages have been known as such to the linguistic community since the pioneering studies of Ascoli and Gartner over a

century ago. There has never been a community of RR speakers based on a common history or polity and the various dialects are mutually unintelligible, but a unity, based on a number of common features, has been advanced. This book is the first general description of the Rhaeto-Romance languages to be written in English. It provides a critical examination of the phonology, morphology, lexicon, and syntax of the modern Rhaeto-Romance dialects within the

broader perspective of Romance comparative linguistics. *Best-sellers* A&C Black
The study focuses on organized activities within communities experiencing disaster. It is initiated by a description of the nature of disaster involvement on the part of various community organizations. A discussion follows of the different meanings of the term 'disaster' and of the social implications created by differential characteristics of disaster agents. It is suggested that the primary

disruption of the social structure is revealed in unplanned changes in interorganizational relationships. Four types of organized behavior are isolated, derived from a cross-classification of the nature of the disaster tasks and the post-impact structure. Using these four types, problems of mobilization and recruitment are discussed as well as the specific operational problems these groups experience functioning under disaster conditions. A final chapter deals with the

implications of disaster research in dealing with the organizational consequences of a nuclear catastrophe.

In reading all the theoretical contributions to this book, an essentially common idea of the social can be observed which is of fundamental importance for a new definition of artistic production: a process-related order of institutionalized actions,

including the linguistic actions to which individuals are exposed. For here, in the repetition of such institutionalized acts, is where subjects first emerge at all. Objects, whether they be objects of everyday use or whole architectures, are like moulds which provide for the institutionalization of actions. The artist emerges as a social figure, as the product of a society and the agent of political interests. From this point of view, the status of objects, the status of the "work" is not

the expression of a circumscribed meaning, but the instrument of forming a subject. The opposition of theory and practice becomes obsolete. Subject and object are meaning written into actions. Organized Behavior in Disaster: Analysis and Conceptualization Univ of California Press Argues that treating people and artificial intelligence differently under the law results in unexpected and harmful outcomes for social welfare.

OF THE ORDER OF FRIARS

The Abbey of Solesmes, in the Sarthe region of Western France, is famous above all for its plainchant and the contribution it has made to liturgical renewal, extending its influence far beyond the monastery walls. It has also been at the forefront of spiritual renewal in the 19th and 20th centuries and into the current millennium. This book presents a selection of the

writings - from letters, conferences, retreats and published works - of three major figures at the centre of this liturgical and spiritual renewal.

Prosper Gueranger (1805-75) was a major figure in the Church and in the Benedictine world and in many fields of 19th-century scholarship; he was abbot for some 40 years. Cecile Bruyere (1845-1909) was appointed prioress of the new sister foundation, Sainte-Cecile, at the age of 22, then abbess, and was a spiritual adviser

and writer. Paul Delatte (1848-1937) oversaw, as abbot, a huge expansion at Solesmes itself and was an equally influential writer. Exiled under a hostile republican French government, the monks of Solesmes established a foundation on the Isle of Wight, where a community still thrives at Quarr Abbey. The nuns also settled on the island at Ryde, where a community of the Solesmes Congregation flourishes, to which the editor of this book belongs."
