Essentials of Teaching and Learning in Nursing Ethics Elsevier Health Sciences
 Promoting the health and wellbeing of children and young people is a vital part of every child nurse's role. Promoting Health in Children and Young People provides practical guidance on everyday health issues such as preventing obesity, dental health, skin care and prevention of diseases and infections. It explores best practice for nursing children with chronic illnesses such as asthma, cancer, diabetes

and disabilities, and gives guidance on promoting the health of adolescents looking at issues of sexual health, smoking, drugs and alcohol. Each chapter discusses key health promotion messages, relevant government policy and health promotion activities. This accessible text provides nurses with the skills and knowledge to transform the NSF into everyday health promotion practice. • Provides a clear skills-based approach to undertaking health promotion practice • Emphasises the role of the nurse in promoting good health in children and young people • Discusses guidance from recent policy developments including the

National Service Framework for Children • Illustrated with diagrams and boxes highlighting key points

With a new focus on evidence-based practice, the 3rd edition of this authoritative reference covers every aspect of infusion therapy and can be applied to any clinical setting. Completely updated content brings you the latest advances in equipment, technology, best practices, guidelines, and patient safety. Other key topics include quality management, ethical and legal issues, patient education, and financial considerations. Ideal as a practical clinical

reference, this essential guide is also a perfect review tool for the CRNI examination. Authored by the Infusion Nurses Society, this highly respected reference sets the standard for infusion nursing practice. Coverage of all 9 core areas of INS certification makes this a valuable review resource for the examination. Material progresses from basic to advanced to help new practitioners build a solid foundation of knowledge before moving on to more advanced topics. Each chapter focuses on a single topic and can serve as a stand-alone reference for busy nursing professionals. Expanded coverage of infusion therapy equipment, product selection, and evaluation help you provide safe, effective care. A separate chapter on infusion therapy across the continuum offers valuable guidance for treating patients with infusion therapy needs in outpatient, long-term, and home-care, as well as hospice and ambulatory care centers. Extensive information on specialties addresses key areas such as oncology, pain management, blood components, and parenteral nutrition. An evidence-based approach and new Focus

on Evidence boxes throughout the book emphasize the importance of research in achieving the best possible patient outcomes. The user-friendly design highlights essential information in handy boxes, tables, and lists for quick access. Completely updated coverage ensures you are using the most current infusion therapy guidelines available.

Clinical skills are essential to the practice of nursing and learning these skills requires a wealth of both factual knowledge and technical expertise. Supplementing practical teaching, *Developing Practical Skills for Nursing Children and Young People* is a comprehensive skills text that describes clinical skills in the style of a tutor teaching at

Nursing Research Bloomsbury Publishing
"Nurses play a vital role in improving the safety and quality of patient care -- not only in the hospital or ambulatory treatment facility, but also of community-based care and the care performed by family members. Nurses need know what proven techniques and interventions they can use

to enhance patient outcomes. To address this need, the Agency for Healthcare Research and Quality (AHRQ), with additional funding from the Robert Wood Johnson Foundation, has prepared this comprehensive, 1,400-page, handbook for nurses on patient safety and quality -- Patient Safety and Quality: An Evidence-Based Handbook for Nurses. (AHRQ Publication No. 08-0043)." - online AHRQ blurb,

This edition contains 189 care plans covering the most common nursing

diagnoses and clinical problems in medical-surgical nursing. It includes four new disorders care plans, SARS, lyme disease, west Nile virus, and obstructive sleep apnea.
Developing Practical Skills for Nursing Children and Young People
This title is directed primarily towards health care professionals outside of the United States. This book aims to fill a gap with an in-depth exploration of nursing ethics content from the western philosophical tradition and some of the methods used in teaching this content. It addresses cross-cultural issues in using specific ethics content. It also reveals the

poverty of the present dualism model in nursing ethics and replace this with a more complex and more useful model that invites debate. Its scope is both wide and deep but that is needed to enrich the basis for teaching nursing ethics. Outlines and critiques all current ethical theories and considers their application to nursing practice Explores ethical issues in numerous cultures Includes case studies drawn from a range of countries Written by leading nurse educators and philosophers in the field
