NATIONAL BESTSELLER • NATIONAL BOOK AWARD FINALIST • A PEN/FAULKNER AWARD FINALIST • Set in the eerie days of civilization's collapse—the spellbinding story of a Hollywood star, his would-be savior, and a nomadic group of actors roaming the scattered outposts of the Great Lakes region, risking everything for art and humanity. • Now an original series on HBO Max. • Over one million copies sold! One of the New York Times's 100 Best Books of the 21st Century Kirsten Raymonde will never forget the night Arthur Leander, the famous Hollywood actor, had a heart attack on stage during a production of *King Lear*. That was the night when a devastating flu pandemic arrived in the city, and within weeks, civilization as we know it came to an end. Twenty years later, Kirsten moves between the settlements of the altered world with a small troupe of actors and musicians. They call themselves *The Traveling Symphony*, and they have dedicated themselves to keeping the remnants of art and humanity alive. But when they arrive in *St. Deborah by the Water*, they encounter a violent prophet who will threaten the tiny band's existence. And as the story takes off, moving back and forth in time, and vividly depicting life before and after the pandemic, the strange twist of fate that connects them all will be revealed. Look for Emily St. John Mandel's bestselling new novel, *Sea of Tranquility*!

This study investigates Indian working women's sense of the discourses surrounding work and careers. In interviews conducted with seventy-seven women across socioeconomic statuses, castes, classes, and occupational and generational categories in the city of Pune, India, women express how feeling bound by tradition confronts excitement about ongoing changes in the country. The work lives of these women are influenced symbiotically by India's sociocultural practices and the contemporary phenomenon of globalization. Using feminist standpoint theory as a theoretical lens, Suchitra Shenoy-Packer explores how women deconstruct, coconstruct, and reconstruct systems of knowledge about their worlds of work as embedded within and influenced by the intersections of society, socialization, and individual agency. The meanings that Indian women associate with their work as well as their definition of a career in twenty-first-century India will be of interest to students and scholars of feminist theory, women's studies, globalization, Asian studies, and labor studies.

Cancer care today often provides state-of-the-science biomedical treatment, but fails to address the psychological and social (psychosocial) problems associated with the illness. This failure can compromise the effectiveness of health care and thereby adversely affect the health of cancer patients. Psychological and social problems created or exacerbated by cancer-including depression and other emotional problems; lack of information or skills needed to manage the illness; lack of transportation or other resources; and disruptions in work, school, and family life-cause additional suffering, weaken adherence to prescribed treatments, and threaten patients' return to health. Today, it is not possible to deliver high-quality cancer care without using existing approaches, tools, and resources to address patients' psychosocial health needs. All patients with cancer and their families should expect and receive cancer care that ensures the provision of appropriate psychosocial health services. Cancer Care for the Whole Patient recommends actions that oncology providers, health policy makers, educators, health insurers, health planners, researchers and research sponsors, and consumer advocates should undertake to ensure that this standard is met.

When people are truly engaged in their work they give more discretionary effort' and make a huge difference to their company. They ask, 'What's in it for us?' instead of 'What's in it for me?'. Yet an engaged workforce is as rare as it is valuable. This groundbreaking global study shows that most people are not engaged and don't contribute as much value as they could - not because they're lazy, but because their managers don't know how to draw the best out of them. Using real-world examples, the authors show that consistently better engagement really is possible.'
