WHEN BRAINS COLLIDE Columbia
University Press

An illustrated exploration of colors and patterns in the animal kingdom, what they communicate, and how they function in the social life of animals. Are animals able to appreciate what humans refer to as “beauty”? The term scarcely ever appears nowadays in a scientific description of living things, but we humans may nonetheless find the colors, patterns, and songs of animals to be beautiful in apparently the same way that we see beauty in works of art. In *Animal Beauty*, Nobel Prize-winning

biologist Christiane Nüsslein-Volhard describes how the colors and patterns displayed by animals arise, what they communicate, and how they function in the social life of animals. Watercolor drawings illustrate these amazing instances of animal beauty. Darwin addressed the topic of ornament in his 1871 book *The Descent of Man and Selection in Relation to Sex*, and did not hesitate to engage with criteria of beauty, convinced that animals experienced color and ornament as attractive and agreeable in the same way that we do, and that the role this played in mate choice pointed to a “sexual selection” distinct from natural selection. Nüsslein-Volhard examines key examples of ornament and sexual selection in the animal kingdom and lays

the groundwork for biological aesthetics. Noting that color patterns have not been a research priority—perhaps because they appeared to be nonessential luxuries rather than functional necessities—Nüsslein-Volhard looks at recent scientific developments on the topic. In part because of Nüsslein-Volhard's own research on the zebrafish, it is now possible to decipher the molecular genetic mechanisms that lead to production of colors in animal skin and its appendages and control its pattern and distribution.

Goethe as a Critic of Literature

Routledge

Woodsman Felix Immler reveals how to build a comfortable camp in the wilderness using nothing more than a pocket knife. Simple natural materials

are used for making a waterproof roof, a chair, a bed, a table, a fridge, and an oven, as well as for carving spoons, knives, and bowls. You can even grill a chicken on a self-made, water-driven skewer. The *Swiss Army Knife Book* is full of ideas for exciting activities, suitable for families and teens as well as adult explorers.

Moral Progress in Dark Times Lioncrest Publishing

Social and Cultural Anthropology: The Key Concepts is the ideal introduction to this discipline, defining and discussing the central terms of the subject with clarity and authority.

All Souls' Day Frances Lincoln

We all fear selling out. Yet we all face situations that test our ideals and values with no clear right answer. In a world

where compromise is an essential aspect of life, authors Lily Zheng and Inge Hansen make the bold claim that everyone sells out—and that the real challenge lies in doing so ethically. Zheng and Hansen share stories from a diversity of people who have found their own answers to this dilemma and offer new ways to think about marginalization, privilege, and self-interest. From these stories, they pull out teachable skills for taking the step from selling out to selling out ethically. *The Ethical Sellout* is for all those committed to maintaining their integrity in a messy world.

The challenges we face today are unprecedented, from the existential crisis of climate change to the global

security threats posed by aggression in Ukraine and elsewhere. Add to this the crisis of liberal democracy and we seem to be swirling in a state of moral disarray, unsure whether there are any principles to which we can appeal today that would be anything other than particularistic. In contrast to this view, Markus Gabriel puts forward the bold argument that there are guiding moral principles for human behaviour. These guiding principles extend across cultures; they are universally valid and form the source of universal values in the twenty-first century. In developing what he calls a 'New Moral Realism', Gabriel breathes fresh life into the idea that humanity's task on our planet is to enable moral progress through cooperation. It is only by achieving moral

progress in a way that incorporates universal values – and thus embraces all of humanity – that we can avoid the abyss into which we will otherwise slide. Written with verve, wit and imagination, Gabriel's call for a new enlightenment is a welcome antidote to the value relativism and nihilism of our times, and it lays out a moral framework within which we can work together – as surely we must – to deal with the great challenges we now face.

Between Germany and Russia is a region strewn with monuments to the horrors of war, genocide and disaster – the bloodlands where the murderous regimes of Hitler and Stalin unleashed

the violence that scarred the twentieth century and shaped so much of the world we know today. In September 2016 the German-Iranian writer Navid Kermani set out to discover this land and to travel along the trenches that are now re-emerging in Europe, from his home in Cologne through eastern Germany to the Baltics, and from there south to the Caucasus and to Isfahan in Iran, the home of his parents. This beautifully written travel diary, enlivened by conversations with the people Kermani meets along the way, brings to life the tragic history of these troubled lands and shows how this history leaves its traces in the present. It will be of great interest to anyone concerned with current affairs and with the events that have shaped, and continue to shape, the world in

which we live today.

The Mindbody Workbook Berrett-Koehler Publishers

Whittling in the Wild features more than 30 fun and exciting objects to make using a simple pocket knife, wood, and a handful of household items. With step-by-step instructions and coordinating high-quality photography, whittle and carve a boat, parachute, and so much more.

There is nearly a 20% chance that you or someone close to you will suffer a concussion this year. Whether they are in a car accident, fall off their bike, or suffer a helmet-to-helmet hit at football practice, over 30% of such concussions will lead to long-term, potentially permanent disability. Even worse, many

of these concussions are mild and go unnoticed and untreated. However, whether you are a concerned parent or an athlete worried about that recent or long-ago head injury, there is good news. The proper utilization of Omega-3 fatty acids and their nutritional potential to feed and cultivate the brain's biochemical environment can facilitate the concussion healing process, relieve symptoms without pharmaceuticals, and increase the chance for a happy and healthy future. Culminating a career spanning over three decades in the U.S. Army, Dr. Michael Lewis developed The Omega-3 Protocol, the military-grade brain injury treatment process for dealing with the concussive dangers of everyday life. Concussions are not always preventable, but they are

treatable. Find out how to give yourself or your loved one the best chance at recovery from brain injuries-large or small-by learning everything about, and becoming ready to apply, The Omega-3 Protocol today.

Social and Cultural Anthropology:

The Key Concepts MIT Press

Arthur Daane, a documentary film-maker and inveterate globetrotter, has lost his wife and child in a plane crash. Berlin provides the backdrop for Daane's reflections on life as he plans his latest project - a self-funded film that will show the world through Daane's eyes. With a new circle of friends - a philosopher, a sculptor and a physicist - Arthur discusses everything from history to metaphysics, and the cumulative power of remembered images and

philosophical musings on the meaning of our contemporary existence comes to permeate the atmosphere of the book. Then one cold, wintry day, Daane meets the young history student Elik Orange and his world is turned upside down. Whenever this mysterious woman beckons, Daane is compelled to follow. The Ethical Sellout John Wiley & Sons Imagine a dreamland where roasted pigs wander about with knives in their backs to make carving easy, where grilled geese fly directly into one's mouth, where cooked fish jump out of the water and land at one's feet. The weather is always mild, the wine flows freely, sex is readily available, and all people enjoy eternal youth. Such is Cockaigne. Portrayed in legend, oral history, and art, this imaginary land became the most

pervasive collective dream of medieval times—an earthly paradise that served to counter the suffering and frustration of daily existence and to allay anxieties about an increasingly elusive heavenly paradise. Illustrated with extraordinary artwork from the Middle Ages, Herman Pleij's *Dreaming of Cockaigne* is a spirited account of this lost paradise and the world that brought it to life. Pleij takes three important texts as his starting points for an inspired of the panorama of ideas, dreams, popular religion, and literary and artistic creation

present in the late Middle Ages. What emerges is a well-defined picture of the era, furnished with a wealth of detail from all of Europe, as well as Asia and America. Pleij draws upon his thorough knowledge of medieval European literature, art, history, and folklore to describe the fantasies that fed the tales of Cockaigne and their connections to the central obsessions of medieval life.
