In just his first five years of filmmaking, acclaimed Portland independent director Jon Garcia was able to produce four feature films. Eric B. Olsen examines the first four films of Garcias career in order to provide a deeper understanding of works that transcend the limitations of independent filmmaking and to show how they have attained the status of art. Part oral history and part film analysis, the book provides a detailed textual commentary on Tandem Hearts (2010), the directors first film; The Falls (2011) and The Falls: Testament of Love (2013), his most well-known films; and The Hours Till Daylight (2016). The Films of Jon Garcia: 2009-2013 takes an in-depth look at a writer-director who has earned a reputation as one of the Pacific Northwests premier filmmakers.

Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. U.S. automakers are suddenly awash in profits, and South Koreans and Europeans have gained market shares, while Honda, Nissan, and Toyota have curtailed production following the 2011 tsunami in Japan. Shortages of Japanese new cars and supplier disruptions will likely push used car prices through the roof well into 2012, so what should a savvy buyer do? The all-new Lemon-Aid Used Cars and Trucks 2012-2013 has the answers, including: More vehicles rated, with some redesigned models that don't perform as well as previous iterations downrated. More roof crash-worthiness ratings along with an expanded cross-border shopping guide. A revised summary of safety- and performance-related defects that are likely to affect rated models. More helpful websites listed in the appendix as well as an updated list of the best and worst "beaters" on the market. More "secret" warranties taken from automaker internal service bulletins and memos than ever.

Richard P. Feynman (1918-1988) was widely recognized as the most creative physicist of the post-World War II period. His career was extraordinarily expansive. From his contributions to the development of the atomic bomb at Los Alamos during World War II to his work in quantum electrodynamics, for which he was awarded the Nobel Prize in 1965, Feynman was celebrated for his brilliant and irreverent approach to physics. It was Feynman's outrageous and scintillating method of teaching that earned him legendary status among students and professors of physics. From 1961-1963, Feynman, at the California Institute of Technology, delivered a series of lectures that revolutionized the teaching of physics around the world. Six Easy Pieces, taken from the famous Lectures on Physics, represents the most accessible material from this series. In these six chapters, Feynman introduces the general reader to the following topics: atoms, basic physics, the relationship of physics to other topics, energy, gravitation, and quantum force. With his dazzling and inimitable wit, Feynman presents each discussion without equations or technical jargon. Readers will remember how—using ice water and rubber—Feynman demonstrated with stunning simplicity to a nationally televised audience the physics of the 1986 Challenger disaster. It is precisely this

ability—the clear and direct illustration of complex theories—that made Richard Feynman one of the most distinguished educators in the world. Filled with wonderful examples and clever illustrations, Six Easy Pieces is the ideal introduction to the fundamentals of physics by one of the most admired and accessible scientists of our time.

If you've ever wondered what would happen if you could meet a ghost, talk to it, or even touch it, this book is for you! Paranormal investigator Chris Taylor really wants to see a ghost. Hoping to help stranded spirits, he sells the rights to a TV network, only to see his gadget disrupt both earthly and unearthly society. The tuner's effect on humanity threatens the dimension that houses the afterlife, known as the Realm. Its Directorate sends an emissary, Callahan, to oversee a solution: Chris must persuade people to stop using his invention. The living don't want to give up the tuners - and neither do the dead. Chris enlists help from his friends, Callahan, and a groovy Seventies ghost and begins a clumsy romance with activist Hannah Lively. The first cozy mystery in a series full of Southern charm—starring bookish sleuth Quinn Caine and her quirky sidekicks: a lock-picking nun and her dog, Ruff Barker Ginsburg. In small-town Virginia, bookbinder Quinn finds herself in a major bind when she's blamed for the murder of her ex's fiancée . . . Quinn Victoria Caine is back in her quirky town of Vienna, Virginia, starting her new life as a bookbinder in her family-owned, charm-for-days bookshop, Prose & Scones. With her trusty German Shephard, RBG—'Ruff Barker' Ginsburg—by her side, what can go wrong? Okay, sure, bumping into her ex, Scott, or her former high school nemesis, Tricia, is a drag. It certainly doesn't help that they have acquired the new hobby of shoving their recent engagement in her face every chance they get. But that doesn't mean Quinn wanted to find Tricia dead in the road. So why does half the town think she may have done it? Quinn is determined to find Tricia's killer, even if it means partnering with her cousin-turned-nun, Sister Daria, and Detective Aiden Harrington, her older brother's 'too-movie-star handsome-for-his-own good' best friend. They believe she's innocent, but of course that doesn't

influence the police, who peg her as their prime suspect. Or, at least until she's poisoned. But there is no way Quinn is going to stop now. Vienna is her town and—for better or worse—Tricia was one of their own. Someone may have killed the mocking girl, but no one's going to stop the notorious QVC.

Federal Motor Vehicle Safety Standards - Rear Visibility (US National Highway Traffic Safety Administration Regulation) (NHTSA) (2018 Edition) The Law Library presents the complete text of the Federal Motor Vehicle Safety Standards - Rear Visibility (US National Highway Traffic Safety Administration Regulation) (NHTSA) (2018 Edition). Updated as of May 29, 2018 To reduce the risk of devastating backover crashes involving vulnerable populations (including very young children) and to satisfy the mandate of the Cameron Gulbransen Kids Transportation Safety Act of 2007, NHTSA is issuing this final rule to expand the required field of view for all passenger cars, trucks, multipurpose passenger vehicles, buses, and low-speed vehicles with a gross vehicle weight of less than 10,000 pounds. The agency anticipates that today's final rule will significantly reduce backover crashes involving children, persons with disabilities, the elderly, and other pedestrians who currently have the highest risk associated with backover crashes. Specifically, today's final rule specifies an area behind the vehicle which must be visible to the driver when the vehicle is placed into reverse and other related performance requirements. The agency anticipates that, in the near term, vehicle manufacturers will use rearview video systems and in-vehicle visual displays to meet the requirements of this final rule. Branding guru Aaker shows how to eliminate the competition and become the lead brand in your market. This ground-breaking book defines the concept of brand relevance using dozens of case studies—Prius, Whole Foods, Westin, iPad and more—and explains how brand relevance drives market dynamics, which generates opportunities for your brand and threats for the competition. Aaker reveals how these companies have made other brands in their categories irrelevant. Key points: When managing a new category of product, treat it as if it were a brand; By failing to produce what customers want or losing momentum and visibility, your brand becomes irrelevant; and create barriers to competitors by supporting innovation at every level of the organization. Using dozens of case studies, shows how to create or dominate new categories or subcategories, making competitors irrelevant. Shows how to manage the new category or subcategory as if it were a brand and how to create barriers to competitors. Describes the threat of becoming irrelevant by failing to make what customer are buying or losing energy. David Aaker, the author of four brand books, has been called the father of branding. This book offers insight for creating and/or owning a new business arena. Instead of being the best, the goal is to be the only brand around—making competitors irrelevant.

This is a book for tall people, those who relate to them, and anyone interested in height in general. Being tall coincides with considerable professional, athletic, and social benefits. Yet there are also some problems, and these raise some questions. For instance, if longer levers and more cells really are behind increased risk of injuries and cancer, then how is it that giraffes get by? And why is it that society reveres tall stature but then compromises our safety with cramped cars and other things?

And, as tall women might be pondering, where have all the tall, dark, and handsome men gone? Lastly, what can be done about all this? These questions and more will all be answered by a tall protagonist over eight chapters: Evolution, Scaling, Spine, Manufactured, Ergonomics, Growth, Longevity, and Society.

Lemon-Aid New and Used Cars and Trucks 1990-2015 steers the confused and anxious buyer through the purchase of new and used vehicles unlike any other car-and-truck book on the market. "Dr. Phil," Canada's best-known automotive expert for more than 42 years, pulls no punches.

Phil Edmonston, Canada's automotive "Dr. Phil," pulls no punches. He says there's never been a better time to buy a new car or truck, thanks to a stronger Canadian dollar and an auto industry offering reduced prices, more cash rebates, low financing rates, bargain leases, and free auto maintenance programs. In this all-new guide he says: Audis are beautiful to behold but hell to own (biodegradable transmissions, "rodent snack" wiring, and mind-boggling depreciation). Many 2011-12 automobiles have "chin-to-chest head restraints, blinding dash reflections, and dash gauges that can't be seen in sunlight, not to mention painful wind-tunnel roar if the rear windows are opened while underway. Ethanol and hybrid fuel-saving claims have more in common with Harry Potter than the Society of Automotive Engineers. GM's 2012 Volt electric car is a mixture of hype and hypocrisy from the car company that "killed" its own electric car more than a decade ago. You can save \$2,000 by cutting freight fees and "administrative" charges. Diesel annual urea fill-up scams can cost you \$300, including an \$80 "handling" charge for \$25 worth of urea.
