Winner of CLR James Book Prize from the Working Class Studies Association and 2nd Place for the Victor Turner Prize in Ethnographic Writing. In 1980, Christine J. Walley's world was turned upside down when the steel mill in Southeast Chicago where her father worked abruptly closed. In the ensuing years, ninety thousand other area residents would also lose their jobs in the mills—just one example of the vast scale of deindustrialization occurring across the United States. The disruption of

this event propelled Walley into a career as a cultural anthropologist, and now, in *Exit Zero*, she brings her anthropological perspective home, examining the fate of her family and that of blue-collar America at large. Interweaving personal narratives and family photos with a nuanced assessment of the social impacts of deindustrialization, *Exit Zero* is one part memoir and one part ethnography—providing a much-needed female and familial perspective on cultures of labor and their decline. Through vivid accounts of her family's struggles and her own upward mobility, Walley reveals the social landscapes of America's industrial fallout, navigating complex tensions among class, labor, economy, and environment. Unsatisfied with the notion that her family's turmoil was inevitable in the ever-forward progress of the United States, she provides a fresh and important counternarrative that gives a new voice to the many Americans whose distress resulting from deindustrialization has too often been ignored. This book is part of a project that also includes a documentary film.

Modern Electrodynamics "O'Reilly Media, Inc."

No matter when or where they are fought, all wars have one thing in common: a relentless progression to monuments and memorials for the dead. Likewise all art made from war begins and ends in mourning and remembrance. In *The Mourner's Song*, James Tatum offers incisive discussions of physical and literary memorials constructed in the wake of war, from the Vietnam Veterans Memorial to

the writings of Stephen Crane, Edmund Wilson, Tim O'Brien, and Robert Lowell. Tatum's touchstone throughout is the Iliad, not just one of the earliest war poems, but also one of the most powerful examples of the way poetry can be a tribute to and consolation for what is lost in war. Reading the Iliad alongside later works inspired by war, Tatum reveals how the forms and processes of art convert mourning to memorial. He examines the role of remembrance and the distance from war it requires; the significance of landscape in memorialization; the artifacts of war that fire the imagination; the intimate relationship between war and love and its effects on the ferocity with which soldiers wage battle; and finally, the idea of memorialization itself. Because all survivors suffer the losses of war, Tatum's is a story of both victims and victors, commanders and soldiers, women and men. Photographs of war memorials in Vietnam, France, and the United States beautifully augment his testimonials. Eloquent and deeply moving, *The Mourner's Song* will speak to anyone interested in the literature of war and the relevance of the classics to our most

pressing contemporary needs.

This accessible text presents a unified approach of treating the microstructure and effective properties of heterogeneous media. Part I deals with the quantitative characterization of the microstructure of heterogeneous via theoretical methods; Part II treats a wide variety of effective properties of heterogeneous materials and how they are linked to the microstructure, accomplished by using rigorous methods. *The Mourner's Song* Packt Publishing Ltd One of the most successful Classical Greek introductory textbooks, this edition provides an introduction to Classical Greek with an encouraging, pleasant, and accessible presentation for today's modern students. Demosthenes, Lysias, Plato, Thucydides, and Xenophon. The standard style guide of the Christian publishing industry, *The Christian Writer's Manual of Style, 4th Edition*, compiled by veteran Zondervan editor Robert Hudson, contains clear guidance on style questions related to religious writing, including many topics not addressed in other references or online. Nearly half of this fourth revision is made up of new material, including information about turning blogs into books, the effects of digital media on writing, "adverbial doubles," "vanishing accents," word-choice strategies, endorser guidelines, and much more. It also contains an all-new "Word List" which makes up more than a third of the book. The most needful information remains—entries on capitalization, abbreviation, citations, fictional dialogue, and more—but it has all been updated to keep pace with changes in English language usage. This fourth edition also corresponds with *The Chicago Manual of Style, 16th Edition* (2010), though it isn't afraid to chart new territory where that reference is unhelpful on issues of

religious writing. Comprehensive yet easy-to-use, *The Christian Writer's Manual of Style, 4th Edition*, is a go-to resource for Christian authors, pastors, teachers, copy writers, editors, proofreaders, publishing and ministry professionals, executive assistants, and students—anyone who writes or edits as a part of their work or study—and for grammar aficionados everywhere.

The classic book that has taught generations how to read Western literature. More than half a century after its translation into English, Erich Auerbach's *Mimesis* remains a masterpiece of literary criticism. A brilliant display of erudition, wit, and wisdom, his exploration of how great European writers from Homer to Virginia Woolf depict reality has taught generations how to read Western literature. A German Jew who was forced

out of his professorship at the University of Marburg in 1935, Auerbach left for Turkey, where he taught in Istanbul. There he wrote *Mimesis*, publishing it in German after the war. Displaced as he was, Auerbach produced a work of great erudition that contains no footnotes, basing his arguments instead on searching, illuminating readings of key passages from his primary texts. His aim was to show how, from antiquity to modernity, literature progresses toward

ever more naturalistic and democratic forms of representation. Ranging over works in Greek, Latin, Spanish, French, Italian, German, and English, Auerbach uses his remarkable skills in philology and comparative literature to present an optimistic view of Western history and culture and to refute any narrow form of nationalism or chauvinism. This expanded Princeton Classics edition of *Mimesis* includes a substantial introduction by Edward Said as well as an essay in which Auerbach responds to his critics.
