Philip Glass, composer of symphonies, operas (Einstein on the Beach, Akhnaten, Orphe), film scores (Kundun, Mishima,

Koyaanisqatsi), songs, and music for dance is a musician who determined early on that he wanted to compose independently, apart from institutions.

That decision has made him a controversial figure among academic musicians, in spite of his rigorous training at Juilliard, and with Nadia Boulanger in Paris. Richard Kostelanetz has gathered a lively and varied collection of writings

about Philip Glass's work, along with several interviews and a conversation between Glass and sculptor Richard Serra. The chronology of the works and discography have been updated for the paperback edition. Philip Glass, composer of symphonies, operas (Einstein on the Beach, Akhnaten, Orphe), film scores (Kundun, Mishima, Koyaanisqatsi), songs, and music for dance is a musician who

Artificial Intelligence and Computational Intelligence Cambridge University Press
It is with great pleasure that we present the proceedings of the 5th International Symposium on Visual Computing (ISVC 2009), which was held in Las Vegas, Nevada. ISVC offers a common umbrella for the four main areas of visual computing including vision, graphics, visualization, and virtual reality. The goal is to provide a forum for researchers, scientists, engineers, and practitioners throughout the world to present their latest research findings, ideas, developments, and applications in the broader area of visual computing. This

year, the program consisted of 16 oral sessions, one poster session, 7 special tracks, and 6 keynote presentations. Also, this year ISVC hosted the Third Semantic Robot Vision Challenge. The response to the call for papers was very good; we received over 320 submissions for the main symposium from which we accepted 97 papers for oral presentation and 63 papers for poster presentation. Special track papers were solicited separately through the Organizing and Program Committees of each track. A total of 40 papers were accepted for oral presentation and 15 papers for poster presentation in the special tracks. All papers were reviewed with an emphasis on potential to contribute to the state of the art in the field. Selection criteria included accuracy and originality of ideas, clarity and significance of results, and presentation quality. The review process was quite rigorous, involving two to three independent blind reviews followed by several days of discussion. During the discussion period we tried to correct anomalies and errors that might have existed in the initial reviews.

The two volume set LNCS 5875 and LNCS 5876 constitutes the refereed proceedings of the 5th International Symposium on Visual Computing, ISVC 2009, held in Las Vegas, NV, USA, in November/December 2009. The 97 revised full papers and 63 poster papers presented together with 40 full and 15 poster papers of 7 special tracks were carefully reviewed and selected from more than 320 submissions. The papers are organized in topical sections on computer graphics; visualization; feature extraction and matching; medical imaging; motion; virtual reality; face processing; reconstruction; detection and tracking; applications; and video analysis and event recognition. The 7 additional special tracks address issues such as object recognition; visual computing for robotics; computational bioimaging; 3D mapping, modeling and surface reconstruction; deformable models: theory and applications; visualization enhanced data analysis for health applications; and

optimization for vision, graphics and medical imaging: theory and applications. Pattern Recognition and Computer Vision Springer Nature

'NCERT Digest Political Science Class VI - XII for UPSC & State PSC Civil Services Exam' is a one of its kind book to Master NCERT concepts for UPSC CSE exam. It is the First book ever to cover 100% concepts from both Old and New NCERT Textbooks which means you won't miss any concept if you study from this single comprehensive resource. Additionally, the simplified presentation of concepts in One-Liner Format and seamless integration of OLD & NEW NCERT will enable you to Read quickly, Learn easily, and Revise like a pro. One-liner theory is a proven method for easy and sustained retention. No other book will give you every concept in one-liner format. A firm grasp on NCERT concepts will greatly contribute to your success in the exam. # The most unique feature of the book is that it is a perfect mix of old and new NCERT books. It seamlessly combines all concepts from both old and new NCERT (clearly mentioning the Class & Old/ New Book) which means that it offers 100% coverage

of all concepts, chapters and topics based on NCERT. # The complete syllabus from 6th to 12th NCERT books is classified into an integrated Standard Chapter-wise Plan where a topic/ concept that is covered in all these classes is dealt with in a single Chapter. # All concepts are presented in One-Liner Format for easy and long retention. ü The book is well-structured with headings and sub-headings to enable easy understanding and clarity of concepts. # It is 100% Exam-oriented with the provision of Quick Pointers, to prepare for the exam, in every chapter. # This great resource is powered with a Video Course. There are 30+ hours of concept videos to learn and revise on the go in an interesting way. # The content is presented in simple, lucid language with variety of examples for easy understanding. LEAP TO SUCCESS with Disha's NCERT Digest!

Africa Yearbook Volume 17 Oswaal Books
This book contains the proceedings of the Workshop on Environmental and Energy Applications of Neural Networks. The purpose of this workshop was to provide a forum for discussing environmental, energy, and biomedical applications of

neural networks. The applications covered in these proceedings include modeling and predicting soil, air and water pollution; waste reduction; environmental sensing; spectroscopy; hazardous waste handling and cleanup; environmental monitoring of power plants; process monitoring and optimization of power systems; modeling and control of power plants; power load forecasting; fault location and diagnosis of power systems; medical image and signal analysis; medical diagnosis; analysis of environmental health effects; health insurance, and modeling biological systems. Contents: Neural Network Models: Insights and Prescriptions from Practical Applications Prediction Horizon Effects on Stochastic Modeling Hints for Neural Networks Neural Network Analysis for Hazardous Waste Characterization Neural Networks for Nuclear Spectroscopy Neural Network Utility in Nondestructive Transuranic Waste Assay, Initial Investigations Application of Neural Networks to Determine Moisture Content on Humidity-Attenuated Near Infrared Spectra Fluorescent Diagnostics of Organic Pollution in Natural Waters: A Neural Network Approach; Reliability and Risk

Analysis Using Artificial Neural Networks
Electronic Noses and Their Applications in Environmental Monitoring
Application of Computational Neural Networks in Predicting Atmospheric Pollutant Concentrations Due to Fossil-Fired Electric Power Generation and other papers. Readership: Researchers in neural networks. keywords:

+ Practice Questions with Solutions for CBSE Class 11 Mathematics has been divided into 3 parts. Part A provides detailed solutions (Question-by-Question) of all the questions/ exercises provided in the NCERT Textbook. Part B provides solutions to the questions in the NCERT Exemplar book. Part C provides selected Practice Questions useful for the Class 11 examination along with detailed solutions. The solutions have been designed in such a manner (Step-by-Step) that it would bring 100% Concept Clarity for the student.

Oswaal CBSE Sample Question Papers Class 12 Mathematics (For 2024 Exam) Springer Nature

Description of the product: • 100% Updated with Latest NCERT Exemplar • Crisp Revision with Quick Review • Concept Clarity with Mind Maps & Concept wise videos • Latest Typologies of Questions with MCQs, VSA, SA & LA • 100% Exam Readiness with Commonly made Errors & Expert Advice

This book constitutes the refereed proceedings of the 9th Chinese Conference on Biometric Recognition,

CCBR 2014, held in Shenyang, China, in November 2014. The 60 revised full papers presented were carefully reviewed and selected from among 90 submissions. The papers focus on face, fingerprint and palmprint, vein biometrics, iris and ocular biometrics, behavioral biometrics, application and system of biometrics, multi-biometrics and information fusion, other biometric recognition and processing.

A Catalogue of several valuable collections of books ... which will begin to be sold ... November 29, 1779, by H. Payne Springer

"There are textbooks galore, but there aren't many crafted as intelligently as this one. This book will change the way that students understand leisure. It will give them an easier entry to that place where difficult ideas fuse into something intelligible, where real understanding sits and the educated imagination is stirred." - Tony Blackshaw, Sheffield Hallam University
Peter Bramham and Stephen Wagg provide a foundation for those studying within the broad field of leisure studies. The book gives students an accessible and engaging introduction to

leisure studies and leisure research, encouraging students to engage in reflexive analysis of their common sense understandings of everyday life and enabling them to develop an understanding of contemporary leisure studies and changing leisure practices. *Energy Minimization Methods in Computer Vision and Pattern Recognition* Springer This book constitutes the proceedings of the 33rd Australasian Joint Conference on Artificial Intelligence, AI 2020, held in Canberra, ACT, Australia, in November 2020.* The 36 full papers presented in this volume were carefully reviewed and selected from 57 submissions. The paper were organized in topical sections named: applications; evolutionary computation; fairness and ethics; games and swarms; and machine learning. *The conference was held virtually due to the COVID-19 pandemic.

Biometric Recognition World Scientific International Conference on Advances in Pattern Recognition (ICAPR 98) at Plymouth represents an important meeting for advanced research in pattern recognition. There is considerable interest in the areas of image processing, medical

imaging, speech recognition, document analysis and character recognition, fuzzy data analysis and neural networks. ICAPR 98 is aimed at providing an international platform for invited research in this multi-disciplinary area. It is expected that the conference will grow in future years to include more research contributions that detail state-of-the-art research in pattern recognition. ICAPR 98 attracted contributions from different countries of the highest quality. I should like to thank the programme and organising committee for doing an excellent job in organising this conference. The peer reviewed nature of the conference ensured high quality publications in these proceedings. My personal thanks to Mrs. Barbara Davies who served as conference secretary and worked tirelessly in organising the conference. I thank the organising chair for the local arrangements and our should also key-note, plenary and tutorial speakers for their valuable contributions to the conference. I also thank Springer-Verlag for publishing these proceedings that will be a valuable source of research reference for the readers. Finally, I thank all participants who made this conference

successful.

The danger to British democracy in the interwar period came from a different

source to that which has thus far been assumed. It came from a network of radical conservatives who challenged the political system and sought to replace it with an authoritarian corporate state. In this book, Bernhard Dietz provides the first systematic analysis of this network and its members, which are called Neo-Tories. With strong links to the European right, yet a minority back home, this group of British conservatives are all the more fascinating today because it is on their ultimate failure that the success of British democracy rested.

On the 150th anniversary of the death of the English historian and politician Thomas Babington Macaulay, Robert Sullivan offers a portrait of a Victorian life that probes the cost of power, the practice of empire, and the impact of ideas. His Macaulay is a Janus-faced master of the universe: a prominent spokesman for abolishing slavery in the British Empire who cared little for the cause, a forceful advocate for reforming Whig politics but a Machiavellian realist, a soaring parliamentary orator who avoided debate,

a self-declared Christian, yet a skeptic and a secularizer of English history and culture, and a stern public moralist who was in love with his two youngest sisters. Perhaps best known in the West for his classic *History of England*, Macaulay left his most permanent mark on South Asia, where his penal code remains the law. His father ensured that ancient Greek and Latin literature shaped Macaulay's mind, but he crippled his heir emotionally. Self-defense taught Macaulay that power, calculation, and duplicity rule politics and human relations. In Macaulay's writings, Sullivan unearths a sinister vision of progress that prophesied twentieth-century genocide. That the reverent portrait fashioned by Macaulay's distinguished extended family eclipsed his insistent rhetoric about race, subjugation, and civilizing slaughter testifies to the grip of moral obliviousness. Devoting his huge talents to gaining power—above all for England and its empire—made Macaulay's life a tragedy. Sullivan offers an unsurpassed study of an afflicted genius and a thoughtful meditation on the modern ethics of power.
