After the Fact?

Why do we no longer trust facts, experts and statistics? In this essential guide to the turbulent times in which we live, Marcus Gilroy-Ware investigates our era of post-truths and fake news and answers the question of where we can go from here. We are supposed to have more information at our disposal now than at any time in history. So why, in a world of rising sea levels, populist leaders, resurgent fascism and a global pandemic, do so many people believe bizarre and untrue things about the world we live in? In *After the Fact?*, Marcus Gilroy-Ware shows us what really created the conditions for mis- and disinformation, from fake news and conspiracy theories, to bullshit journalism and the resurgence of the far-right, and why liberal newspaper columnists and centrist politicians are unable to turn back this tide. Spanning politics, culture, psychology, journalism, and much more, *After the Fact?* is a timely wake-up call for those who believe we can simply go "back to normal", and instead argues that, if we are to put an end to "fake news" we must deal with the broader social crises that are responsible for it.
