So serious are the topics of rape and sexual assault that the mere discussion of them is often avoided. In this book, Mary Odem and Jody Clay-Warner examine the complex and painful issue of sexual violence from various perspectives, including sociology, criminology, anthropology, public health, and women's studies. The inclusion of personal accounts from women who have been raped or threatened by rape makes this collection particularly accessible, compelling, and powerful. An essay details one woman's long struggle as a rape survivor, a poem describes the fear of rape and society's treatment of the victim, and a sonnet traces the journey from victim to survivor. Not only does this invaluable collection define and examine the prevalence of rape and sexual assault, but it analyzes social and institutional factors that contribute to their occurrence and provides strategies for prevention and change.

A male homicide victim with a shotgun blast to the chest. A

female drug addict who has overdosed on crack cocaine. An elderly woman with deep stab wounds to the neck. A two-year-old motor vehicle accident victim with blunt head trauma. For forensic pathologists, police detectives, and crime scene investigators, dealing with death and injury is a daily routine. But even after investigating thousands of drownings, shootings, stabbings, electrocutions, overdoses, and traffic accidents, most professionals in the investigative fields still haven't seen it all. Originally published on CD-ROM, the *Color Atlas of Forensic Pathology* addresses much of the basic information which forensic pathologists and other investigators deal with on a day to day basis. Packed with 780 full-color, captioned photographs, this atlas examines everything from time of death and decomposition, to identification, to causes of death from blunt trauma, firearm injuries, asphyxia, cutting and stabbing injuries, and more. The atlas shows the various causes of death and injury with case -- "visuals" to help investigators understand the work they perform. Indeed, with its exhaustive coverage, the *Color Atlas of Forensic Pathology* will provide investigators with valuable insight into the many different causes of death and injury they must deal with and how the manners of death are diagnosed.

In The Work of Rape Rana M. Jaleel argues that the redefinition of sexual violence within international law as a war crime, crime against humanity, and genocide owes a disturbing and unacknowledged debt to power and knowledge achieved from racial, imperial, and settler colonial domination. Prioritizing critiques of racial capitalism from women of color, Indigenous, queer, trans, and Global South perspectives, Jaleel reorients how violence is socially defined and distributed through legal definitions of rape. From Cold War conflicts in Latin America, the 1990s ethnic wars in Rwanda and Yugoslavia, and the War on Terror to ongoing debates about sexual assault on college campuses, Jaleel considers how legal and social iterations of rape and the terms that define it—consent, force, coercion—are unstable indexes and abstractions of social difference that mediate racial and colonial positionalities. Jaleel traces how post-Cold War orders of global security and governance simultaneously transform the meaning of sexualized violence, extend US empire, and disavow legacies of enslavement, Indigenous dispossession, and racialized violence within the United States. This book contextualizes the complexity of sexual violence within its broader context – from war to the resolution of interpersonal disputes – and covers a wide span including sexual harassment, bullying, rape and murder as well as domestic violence. Written by leading academics from a variety of disciplines, contributions also include commentaries that relate the research to the work of practitioners. Despite advances made in the investigation of sexual offences, evidence still points to a continued belief in the culpability of victims in their own victimization and a gap between the estimated incidence of sexual violence and the conviction of perpetrators. Adopting an implicitly and explicitly critical stance to contemporary policy responses that continue to fail in addressing this problem, this book focuses on attitudes and behaviour towards sexual violence from the point of view of the individual experiencing the violence – perpetrator and victim – and situates them within a broader societal frame. It is through an understanding of social processes and psychological mechanisms that underpin sexual violence that violence can be combated and harm reduced, and at this individual level that evidence-based interventions can be designed to change policy and practice. The Handbook is split into four sections: 'Legacies: Setting the Scene' offers a critical overview of historical, legal and cultural processes which help to explain the origins of current thinking and offer steers for future developments 'Theories and Concepts' examines contemporary thinking on sexual violence and reviews explanatory frameworks from a number of perspectives 'Acts of Sexual Violence' reviews a number of specific types of sexual violence, elaborating the range of circumstances, victims and perpetrators with a view to

addressing the general and pervasive nature of such violence thus contradicting narrow cultural stereotyping 'Responding to Sexual Violence' overviews and evaluates current policies and practices and offers new ideas to develop different types of interventions. The editors' conclusion not only draws out the key themes and ideas from contributions to the Handbook, but also considers the nature of and the extent to which any progress has been made in understanding and responding to sexual violence. This will be a key text for students and academics studying sexual violence and an essential reference tool for professionals working in the field including police officers, probation staff, lawyers and judges.

The Color Atlas of Domestic Violence is the first text to look specifically and comprehensively at the injuries frequently seen as a result of domestic violence. This atlas provides a visual aid for the examination, identification, and documentation of domestic injuries. It includes extensive visual content, as well as content on the cycles of violence and epidemiology of domestic violence. Specific injury types and patterns are both discussed and presented pictorially. The collection of needed forensic evidence is covered to help assure appropriate prosecution of the perpetrator. Psychological violence is included in addition to physical injury violence. This book can be read in its entirety to provide a strong background in domestic violence injuries or used as a spot reference to help understand when specific injuries may be the result of domestic violence. The primary focus is on adult females - however, males, children, gays and lesbians, and older adults as victims are covered as well.
