Research in Constructing the Elementary School Curriculum

IGI Global
The current health situation has been described as chaotic and devastating. Humanity's trust in the future and in

its human capacity to overcome a disaster of such magnitude is even starting to wither away. If science still lacks a response to the pandemic, can the humanities offer something to cope with this situation? The world can adopt a historical perspective and realize that this is not the first time a global pandemic has struck. Issues including illness, suffering,

endurance, resilience, human survival, etc. have been dealt with by literature, philosophy, psychology, and sociology throughout the ages and should be explored once again in response to the COVID-19 pandemic. The Handbook of Research on Historical Pandemic Analysis and the Social Implications of COVID-19 explores the issue of disease from a variety of philosophical, legal,

historical, and social perspectives to offer both comprehension and consolation to the human psyche. This group of scholars within the fields of education, psychology, linguistics, history, and philosophy provides a comprehensive view of the humanities as it relates to the pandemic within the frame of human reaction to pain and calamity. This book also looks at the

impact the COVID-19 pandemic has had on society in a multidisciplinary capacity that examines its effects in education, government, business, and more.

Covering topics such as public health legislation, sociology, impacts on women, and population genetics, this book is essential for sociologists, psychologists, communications experts, historians, researchers, students, and academicians.
