Forklift Daily Inspection Checklist Log Book Track main safety checkpoints every day on each truck before employees operate fork lifts. This book prompts employees to check safety features such as fluid levels, gauges, tires, battery, lift system, plates, stickers, exhaust, belts, and hydraulic controls, and prompts employees to include their initials. There is also a signature log to record employees' printed names and examples of their initials for tracking purposes. Further, several pages at the back of the book prompt mechanics to record the dates, billing numbers, parts

numbers, and a narrative of services performed for preventative maintenance on each truck. This book is meant to stay with a single truck, and there is room at the front of the book to record identification information about each individual truck.
