Teaching the Daode Jing Policy Press

In *Teaching on a Shoestring: An A to Z of everyday objects to enthuse and engage children and extend learning in the early years*, Russell Grigg and Helen Lewis explore the educational value of familiar objects and suggest practical activities to help develop young learners' cross-curricular skills. We take many everyday objects for granted. But in a time of ever-tightening school budgets these objects can be invaluable in affording low-cost, high-impact opportunities for learning. With these value-for-money principles in mind, Russell and Helen have packed this practical A to Z handbook to the brim with fun facts, inspiring ideas and exciting activities to help teachers make the best use of familiar objects as launch pads for effective learning. Underpinned by solid theory, *Teaching on a Shoestring* investigates the learning potential of twenty-six inexpensive, readily available resources from apples to ice cubes to zebra-patterned fabric and shows how they can be exploited to develop in young learners the four skills widely regarded as essential in the twenty-first century: communication, collaboration, critical thinking and creativity. The book is organised into two parts: covering theory, then practice. In Part 1 the authors examine the nature of an object-rich learning environment and discuss the benefits of enquiry-based learning, in which the emphasis is upon promoting collaboration, dialogue and higher-order thinking in real-world contexts. In Part 2 the learning opportunities around the twenty-six objects are laid out in detail to illustrate how they can be put into practice. While the book focuses on object-based pedagogy employed with the under-sevens age category, many of the principles can also be applied with older children. There is a common format for the enquiry into each object, arranged into the following sections: In a nutshell key background information about the object in its broader context; Did you know? interesting facts about the object; Ready key vocabulary, resources and health and safety factors to consider; Steady learning goals and intentions; Go activities which

show how teachers can develop the four skills of communication, collaboration, critical thinking and creativity around the object; Other ideas follow-up cross-curricular ideas; and Find out more websites and other references for further information. Suitable for early years educators and anyone who works with young children.

Understanding and Teaching Contemporary US History Since Reagan Cambridge University Press

For hundreds of years, the Roman people produced laws in popular assemblies attended by tens of thousands of voters to forge resolutions publicly to issues that might otherwise have been unmanageable. Callie Williamson's comprehensive study finds that the key to Rome's survival and growth during the most formative period of empire, roughly 350 to 44 B.C.E., lies in its hitherto enigmatic public law-making assemblies, which helped extend Roman influence and control. Williamson bases her rigorous and innovative work on the entire body of surviving laws preserved in ancient reports of proposed and enacted legislation from these public assemblies.

A History of Magic and Experimental Science: The first thirteen centuries of our era Walch Publishing

Though the Reformation was sparked by the actions of Martin Luther, it was not a decisive break from the Church in Rome but rather a gradual process of religious and social change. As the men responsible for religious instruction and moral oversight at the village level, parish pastors played a key role in the implementation of the Reformation and the gradual development of a Protestant religious culture, but their ministry has seldom been examined in the light of how they were prepared for the pastorate. *Teaching the Reformation* examines the four generations of Reformed pastors who served the church of Basel in the century after the Reformation, focusing on the evolution of pastoral training and Reformed theology, the theory and practice of preaching, and the performance of pastoral care in both urban and rural parishes. It looks at how these pastors were educated and what they learned, examining not only the study of theology but also the general education in languages, rhetoric and dialectic that future pastors received at the city's Latin school and in the arts faculty of the university. It points to significant changes over

time in the content of that education, which in turn separated Basels pastors into distinct generations. The study also looks more specifically at preaching in Basel, demonstrating how the evolution of dialectic and rhetoric instruction, and particularly the spread of Ramism, led to changes in both exegetical method and homiletics. These developments, combined with the gradual elaboration of Reformed theology, resulted in a distinctive style of Reformed Orthodox preaching in Basel. The development of pastoral education also had a direct impact on how Basels clergy carried out their other duties: catechization, administering the sacraments, counseling the dying and consoling the bereaved, and overseeing the moral conduct of their parishioners. The growing professionalization of the clergy, the result of more intensive education and more stringent supervision, contributed to the gradual implantation of a Reformed religious culture in Basel.

Teaching British Women Writers, 1750-1900 Oxford University Press on Demand

For thousands of years, *The Odyssey* has resonated throughout the Western world. Homer has been an original source of inspiration to writers, painters, sculptors, and filmmakers, as well as a vital source of information about the mythology, history, and culture of ancient Greece. This casebook uniquely blends commentary and primary documents, situating the epic within historical contexts that are important for students to understand. The literary analysis chapter is ideal for readers coming to *The Odyssey* for the first time, introducing the work with a chronology of events and identification of major characters and themes. Topical chapters carefully consider matters of mythology, geography, archeology, and class issues pertinent to *The Odyssey*. Excerpts from classical and scholarly sources, including Herodotus, Plato, Thucydides, and Bulfinch, help students understand the historical framework, and materials from government documents and newspaper accounts help students make connections between *The Odyssey's* thematic ideas and current events, such as the September 11th attacks and the ongoing conflict in Ireland.

Explaining Religious Party Strength Routledge

The question of how to teach the Daode Jing haunts a growing number of non-specialists who find themselves called upon for either curricular or intellectual reasons to teach it. This book is designed to provide access to contemporary scholarship and pedagogical strategies that can be used when introducing this confounding text.

Handbook for Arabic Language Teaching Professionals in the 21st Century Gyan Publishing House

This book presents a 'Traveller's Guide' to Deaf Culture, starting from the premise that Deaf cultures have an important contribution to make to other academic disciplines, and human lives in general. Within and outside Deaf communities, there is a need for an account of the new concept of Deaf culture, which enables readers to assess its place alongside work on other minority cultures and multilingual discourses. The book aims to assess the concepts of culture, on their own terms and in their many guises and to apply these to Deaf communities. The author illustrates the pitfalls which have been created for those communities by the medical concept of 'deafness' and contrasts this with his new concept of "Deafhood", a process by which every Deaf child, family and adult implicitly explains their existence in the world to themselves and each other.

Explaining Creativity Cambridge University Press

Understanding and Teaching Contemporary US History since Reagan is designed for teachers looking for new perspectives on teaching the recent past, the period of US history often given the least attention in classrooms. Less of a traditional textbook than a pedagogical Swiss Army knife, the volume offers a diversity of voices and approaches to teaching a field that, by its very nature, invites vigorous debate and puts generational differences in stark relief. Older history is likely to feel removed from the lived experiences of both teachers and students, allowing for a certain dispassion of perspective. By contrast, contemporary history creates unique challenges, as individual teachers and students may think they know "what really happened" by virtue of their personal experiences. The volume addresses a wide swath of topics, from social movements around identity and representation to the Supreme Court, law enforcement, migration, climate change, and international relations. Emphasizing critical thinking and primary-source analysis, it will aid teachers in creating an invigorating and democratizing classroom experience. Intended

for use in both secondary and postsecondary classrooms, the book's structure allows for a variety of applications and invites a broad audience.

Teaching Shakespeare Routledge

Understanding Collapse explores the collapse of ancient civilisations, such as the Roman Empire, the Maya, and Easter Island. In this lively survey, Guy D. Middleton critically examines our ideas about collapse - how we explain it and how we have constructed potentially misleading myths around collapses - showing how and why collapse of societies was a much more complex phenomenon than is often admitted. Rather than positing a single explanatory model of collapse - economic, social, or environmental - Middleton gives full consideration to the overlooked resilience in communities of ancient peoples and the choices that they made. He offers a fresh interpretation of collapse that will be accessible to both students and scholars. The book is an engaging, introductory-level survey of collapse in the archaeology/history literature, which will be ideal for use in courses on the collapse of civilizations, sustainability, and climate change. It includes up-to-date case studies of famous and less well-known examples of collapses, and is illustrated with 25 black and white illustrations, 3 line drawings, 16 tables and 18 maps.

Monastic Education in Korea Taylor & Francis

'An essential read for trainee and newly qualified teachers covering all key areas of the primary curriculum. There is a real sense of experienced and enthusiastic practitioners writing about "what makes good" and why, with lots of clear practical examples of how to put ideas into practice.' - Jackie Keith, Deputy Head and Programme Leader for School Direct, London East Teacher Training Alliance To be a successful teacher in primary schools you need to have an informed understanding of a wide range of subjects. This book provides clear guidance of good practice teaching different subjects in primary education, informed by current curriculum directions, and full of practical advice for the classroom. Key features: Clear links to the 2014 National Curriculum in England 'In the classroom' examples from schools demonstrate intelligent and engaging ways to teach different subjects Reflective questions challenge you to critically engage with what you have read and apply it to your own teaching This is essential reading for students on primary initial teacher education courses, including university-based (PGCE, BA QTS, BEd), school-

based (SCITT, School Direct) and employment-based routes into teaching.

Understanding Collapse Rowman & Littlefield

Using one man as a lens, a man known variously as Folquet, Folques, Folco, and Folc, it will examine some of the important changes and developments of the period from a new, more human, perspective.

Teaching American History Through the Novel University of Wisconsin Pres

Make the past come alive for your students by introducing them to a wide array of fascinating historical novels.

Explaining Post-Soviet Patchworks Columbia University Press

Explaining Creativity is a comprehensive and authoritative overview of scientific studies on creativity and innovation. Sawyer discusses not only arts like painting and writing, but also science, stage performance, business innovation, and creativity in everyday life. Sawyer's approach is interdisciplinary. In addition to examining psychological studies on creativity, he draws on anthropologists' research on creativity in non-Western cultures, sociologists' research on the situations, contexts, and networks of creative activity, and cognitive neuroscientists' studies of the brain.

Understanding Sound Tracks Through Film Theory Peter Lang

The only textbook of its kind, this all-in-one introduction guides you through the history, theories and practices of creative writing you need to know to teach this ever-expanding and infinitely rewarding subject successfully in higher education. Asking you to think reflectively about the discipline throughout, this book offers a bridge between teaching and learning of the subject to help you develop effective and informed methods that will enliven your classroom and help you discover the best practice for you. Based on the author's two decades of teaching and research in creative writing theory and pedagogy, and on feedback from a range of instructors in the field, Stephanie Vanderslice brings forward this essential companion for students and teachers engaging with the study and instruction of creative writing. Written in Vanderslice's trademark cogent, conversational style, Teaching Creative Writing gives you the tools to understand creative writing as a subject and a practice and offers you a ready-to-use blueprint for planning your first creative writing classes. It covers such critical topics as: - How research into the development of the creative

writer might influence your classroom environment - The need to free students from damaging myths and pervasive lore - The use of revision and editing - Creating inclusive classroom spaces and workshops - The place of genre in creative writing - Teaching students to work multi-modally - How to assess and grade work - Introducing students to the literary community - Teaching creative writing online Building on what it means to teach creative writing in the 21st century, this book leads you through creating your own syllabi, course plans, and statements of teaching philosophies, features capsule interviews with experts on key topics, and includes an online companion resource which features teacher guides to using the book.

Legal Research Explained Cambridge University Press

World history is not a subject; it is all the subjects. Because of this, world history as a discipline has never fit well with the traditional definition of historical research. H.G. Wells wrote the first true book of world history in 1920 and only a few authors have made the attempt to “explain it all” since Wells. In that time, world history has become the chosen subject of polymaths and possesses the most potential to unite all of the fields of knowledge. The subject of world history has developed several approaches, with “Big History” being the most modern, and flawed, of its variants.

Teaching with Fire Bloomsbury Publishing USA

Who decides how to use the UK military budget and how can we be sure that the UK’s armed forces can meet the threats of tomorrow? This book provides the answers to these questions. Concentrating on decisions taken below the political level, it uncovers the factors that underpin the translation of strategic direction into military capability.

Teaching on a Shoestring Island Press

This seminal work by historian Alexander Bennett presents a broad overview of the Japanese “Way of the Warrior” as it is expressed in scores of classical Japanese texts written by famous Samurai themselves. Bennett’s analysis of these writings shows that the essential meaning of Bushido, the Samurai’s code of conduct and ethics, evolved significantly over time—from the 12th century when the warrior class was elevated to become an elite group, to the 19th century when the Samurai class was suddenly disbanded. *Bushido Explained* takes a visual approach to presenting important concepts and terminology, helping readers

easily navigate the complex world of the Samurai. The text is written in a highly accessible style, with sidebars presenting interesting concepts, facts and important Samurai figures who were central to Bushido’s evolution. The different types of Bushido—which vary by region, time period and Samurai rank—are presented with over 300 informative diagrams and illustrations. No other book offers such a wide-ranging, yet clear analysis of Bushido—debunking myths and misconceptions about who the Samurai truly were. *Bushido Explained* presents a precise overview of Samurai ideals and culture in a logical, chronological order. Author Alexander Bennett—a professor of Japanese history, martial arts and Budo theory at Kansai university in Japan—uses this information and teaching methods in his Japanese Studies: Introduction to Bushido class. Now, readers all over the world can sit in on the unique lesson.

Understanding The Odyssey Crown House Publishing Ltd Growing out of recent pedagogical developments in creative writing studies and perceived barriers to teaching the subject in secondary education schools, this book creates conversations between secondary and post-secondary teachers aimed at introducing and improving creative writing instruction in teaching curricula for young people. Challenging assumptions and lore regarding the teaching of creative writing, this book examines new and engaging techniques for infusing creative writing into all types of language arts instruction, offering inclusive and pedagogically sound alternatives that consider the needs of a diverse range of students. With careful attention given to creative writing within current standards-based educational systems, *Imaginative Teaching Through Creative Writing* confronts and offers solutions to the perceived difficulty of teaching the subject in such environments. Divided into two sections, section one sees post-secondary instructors address pedagogical techniques and concerns such as workshop, revision, and assessment before section two explores hands-on activities and practical approaches to instruction. Focusing on an invaluable and underrepresented area of creative writing studies, this book begins a much-needed conversation about the future of creative writing instruction at all levels and the benefits of collaboration across the secondary/post-secondary divide.

Imaginative Teaching through Creative Writing Tuttle Publishing

Understanding Sound Tracks Through Film Theory analyzes all aural aspects of cinema using several approaches: feminism, genre studies, post-colonialism, psychoanalysis, and queer theory. In her analysis of each sound track, Walker brings together film studies, musicology, history, politics, and culture in an accessible yet rigorous way.

Criminality and the Common Law Imagination in the 18th and 19th Centuries Routledge

What do Buddhist monks learn about Buddhism? Which part of their enormous canonical and non-canonical literature do they choose to focus on as the required curriculum in their training, and what do they elect to leave out? The cultural depository of Buddhism includes some four thousand canonical texts, hundreds of other historical works, modern textbooks, oral traditions, and more recently, an increasingly growing body of online material. The sheer diversity of this mass of information makes the pedagogical choices of monastics worthy of close study. *Monastic Education in Korea* is essentially a biography of the Korean Buddhist monastic curriculum over the past five centuries. Based on extensive ethnographic work and archival research in Korean monasteries, it illustrates how a particular premodern syllabus was reimagined in the twentieth century to become the sole national Korean monastic pedagogical program—only to be criticized and completely restructured in recent years. Through a detailed analysis of these modifications, the work demonstrates how Korean Buddhist reformers today tend to imitate the educational practices and canonize the textual totems of the contemporary international discipline of Buddhist studies, and how, by doing so, they ultimately transform the local Korean tradition from a particular brand of Chinese-centered scholastic Chan into the inclusive, pluralistic, Indian-focused Buddhism common in English-language introductions to the religion. The book further examines the proliferation of diverse graduate schools for the sangha, as well as the creation of a novel examination system for all monastics. It reveals some of the realities of operating large monastic organizations in contemporary Asia and portrays a living, vibrant Buddhist community that is constantly negotiating with modern values and reformulating its core orthodoxies.

Where Troubadours were Bishops OUP USA

Through interdisciplinary readings of a range of literary and legal

texts across a 200-year period, this book uncovers how the

cultural narrative affected the development of the law itself in the 18th and 19th centuries in three case studies: adultery, child

criminality and rape testimony.
