Sport Policy: a comparative analysis of stability and change builds on the growing general interest in the comparative study of sport policy and the more specific interest in processes of policy change and issues associated with policy convergence. In stark contrast to many other areas of public policy such as education, personal welfare and health care there is a paucity of theoretically informed comparative studies in sport. Over recent years there has been a steady increase in public investment in sport and frequently, as a consequence, a sharper debate about how public resources should be used. However, there has been little analysis of the factors that shape the generation of domestic sport policy and little attempt to identify the variables that might influence the policy process. Sport Policy: a comparative analysis of stability and change provides a theoretically informed analysis of the sports systems in Canada, England, Germany and Norway. These economically advanced countries are carefully selected to enable the investigation of the significance of variables and because they share a number of socio-economic and sports-related characteristics, which provides the text with a unique breadth and depth of coverage. This text is a vital addition to the general paucity of literature in this area and is written by

an internationally renowned author team.

This book explores the relationship between diplomatic discourse and the Olympic Movement, charting its continuity and change from an historical perspective. Using the recent body of literature on diplomacy it explores the evolution of diplomatic discourse around a number of themes, in particular the increasing range of stakeholders engaged in the Olympic bid, disability advocacy and the mainstreaming of the Paralympic Games and the evolution of the Olympic boycott. The work addresses the increasing engagement of a number of non-state actors, in particular the IOC and the IPC, as indicative of the diffusion of contemporary diplomacy. At the same time it identifies the state as continuing in the role of primary actor, setting the terms of reference for diplomatic activity beyond the pursuit of its own policy interests. Its historical investigation,

based around a UK case study, provides insights into the characteristics of diplomatic discourse relating to the Games, and creates the basis for mapping the future trajectory of diplomacy as it relates to the Olympic Movement.

As war rages, more Japanese ships come through the time-space maelstrom that the Americans call The Squall. One is a “Hell Ship,” carrying prisoners of an Imperial Japan that is growing ever more ruthless in the face of looming defeat. Escorting it is a new, state-of-the-art destroyer, whose officers recognize no rules of war. Fighting on two fronts, Reddy is plunged into a firestorm of loyalty, betrayal, and sacrifice. DIV At the age of sixteen, Monica Seles crashed on to the world tennis scene by becoming the youngest winner in French Open History. For three years, she dominated the tennis circuit, racking up eight Grand Slam titles, winning three back-to-back French Open titles. At post-match conferences she charmed the media with her trademark giggle. In January 1993, Seles defeated Steffi Graf in the Australian Women's Open and in April of that year, while playing a quarter-final in Hamburg, a boning knife was plunged between her shoulder blades by a Graff fan. Everything changed. The incident shocked the tennis world. Seles's injuries healed, but Seles did not. Now, in this compelling book she tells us in her own words what followed - years of seclusion, the fog of despair, binge eating, dealing with criticism about her weight from a brutal press, losing her father's coach to cancer and never regaining her dominance on court despite getting in to the top 10. After years battling to regain fitness and tennis glory, an excruciating injury forced Monica to take time off from tennis in 2003 and she embarked on her own journey. She abandoned the arduous workouts and punitive diets, and slowly uncovered the painful emotions behind years of tumultuous feelings. This is a human and inspiring story of determination, amazing talent and touching vulnerability, that Seles hopes will motivate and inspire others to find happiness in their own lives. Monica

Seles is a former No 1 professional tennis player who became the youngest-ever champion at the French Open in 1990 and went on to win nine Grand Slam singles titles. In 2007, she was appointed goodwill ambassador for the UN's Global Sports for Peace and Development Initiative. /div

The Craftsman Penguin

Why do people work hard, and take pride in what they do? This book, a philosophically-minded enquiry into practical activity of many different kinds past and present, is about what happens when people try to do a good job. It asks us to think about the true meaning of skill in the 'skills society' and argues that pure competition is a poor way to achieve quality work. Sennett suggests, instead, that there is a craftsman in every human being, which can sometimes be enormously motivating and inspiring - and can also in other circumstances make individuals obsessive and frustrated. *The Craftsman* shows how history has drawn fault-lines between craftsman and artist, maker and user, technique and expression, practice and theory, and that individuals' pride in their work, as well as modern society in general, suffers from these historical divisions. But the past lives of crafts and craftsmen show us ways of working (using tools, acquiring skills, thinking about materials) which provide rewarding alternative ways for people to utilise their talents. We need to recognise this if motivations are to be understood and lives made as fulfilling as possible.
