Microeconomics in Modules [With Business Case Studies] Cengage AU

Microeconomics presents a complete discussion of microeconomic theory for those students who wish to gain an intermediate knowledge of the

subject, but it is written in such a way that it is accessible to anyone who has no previous knowledge of microeconomics. A non-mathematical approach is used to explain basic principles as well as more advanced study material. The models are explained by means of diagrams. Theoretical analysis is done in explicit language and to the point discussions, and is augmented with practical examples and explanations. The attractive and functional layout makes the material clear and unimimidating. Each chapter is summarised and includes model questions.

Microeconomics: Case Studies and Applications contains case studies that explore core microeconomics concepts by focusing on current events in economics and providing a theory refresher for each section and questions. Designed to be a companion text to larger microeconomics texts, this resource offers a useful, time-saving alternative to sourcing online articles and journals. As a first-year text it teaches best-practice use of case studies and acts as a stepping stone for students who will source and use articles as they progress through their course. Each case study presents a different application of a core concept or theory. As well as the main text, which presents the application of the core concept, each case study contains a range of extra material. A 'Theory refresher' section provides a quick way for students to revise a key concept or theory that is important for understanding the application in that case study.

Microeconomics: Case Studies and Applications Red Globe Press

This successful Australian adaptation builds on the global success of Microeconomics by McConnell and Brue - the number one economic suite worldwide. This accessible text is designed to help students understand economic theory and practice whilst delivering a solid comprehension of economic thought. Microeconomics provides a step-by-step approach to introductory microeconomics. Pedagogy is an important part of each chapter, for example, each learning objective is addressed separately in the text and followed by a short 'check point' summary box. This has been designed to ensure students are able to review their progress and for instructors to ensure that key learning outcomes are addressed. Each concept is taught in three ways - verbally, visually and practically (using examples)- to ensure that all learning styles are catered for. Microeconomics 9e has been thoroughly edited to improve and simplify concept explanation, and to give the book a more contemporary feel for readers. This text is for first-year students of economics or those taking it as a first subject in microeconomics.
