**Giant Earthmovers : An Illustrated History** Enthusiast Books

In the history of heavy equipment development, no single man's name is more respected or revered as that of R. G. LeTourneau. Robert Gilmour LeTourneau is considered by many to be the dean of high-speed mobile earthmoving equipment. His designs of the 1920s, 30s, and 40s laid the fundamental groundwork for many of the earthmoving machines we see today. Self-propelled, rubber tired scrapers, bulldozing blades, and rippers were all conceived under his engineering genius in the quest for moving material at the lowest-cost-per-yard. The time period of 1953 to 1971 saw many more innovative machine and engineering achievements in the fields of earth-moving, off-shore oil

exploration, logging, and defense. This second volume of fantastic machine creations covers the later years up until the sale of the company to Marathon in 1971. Standard production, specials, and experimental machines are shown in rare archival images, some being shown in print for the very first time, help showcase what made R. G. LeTourneau so important in the heavy equipment industry.

*Classified Index of National Labor Relations Board Decisions and Related Court Decisions*

"This colossal reference book documents the timeless urge to reshape the world, and the machines used to do so from the 1088's to today. From utility tractors and loaders up to the largest diggers and bulldozers, every piece of heavy equipment is listed here by model and manufacturer, making this the most exhaustive book on the world's most hard-working vehicles and machines"--Publisher's description.

**LeTourneau Earthmovers**

This book examines the Texas-based company's heavy equipment that has been used in the mining, construction, and oil industries from the 1920s to present. Two hundred photos illustrate the fascinating tales behind LeTourneau breakthroughs like the first electric-diesel front-end loader. Founder Robert Gilmour LeTourneau is regarded as the father of high-volume

earthmoving equipment, and holds more U.S. patents than any other person, save Thomas Edison. Fans of heavy equipment are sure to enjoy this profile of the manufacturer of the world's largest front-end loaders.
