Cybersecurity is vital for all businesses, regardless of sector. With constant

threats and potential online dangers, businesses must remain aware of the current research and information available to them in order to protect themselves and their employees.

Maintaining tight cybersecurity can be difficult for businesses as there are so many moving parts to contend with, but remaining vigilant and having protective measures and training in place is essential for a successful company. The Research Anthology on Business Aspects of Cybersecurity considers all emerging aspects of cybersecurity in the business sector including frameworks, models, best practices, and emerging areas of interest. This comprehensive reference source is split into three sections with the first discussing audits and risk assessments that businesses can

conduct to ensure the security of their systems. The second section covers training and awareness initiatives for staff that promotes a security culture. The final section discusses software and systems that can be used to secure and manage cybersecurity threats. Covering topics such as audit models, security behavior, and insider threats, it is ideal for businesses, business professionals, managers, security analysts, IT specialists, executives, academicians, researchers, computer engineers, graduate students, and practitioners.

Mit diesem Buch erhält der Leser eine eindringliche Innensicht in eine wenig bekannte Episode des Holocaust. Es erzählt die Geschichte eines Juden, der

den Mut und die Geisteskraft hatte, den nationalsozialistischen Mördern die Stirn zu bieten und Tausende vor einem elenden Tod zu bewahren, bevor er selbst ermordet wurde. Es schildert auch die moralische Debatte, die Reszö Kasztner durch seine "Geschäfte mit dem Teufel" in der jüdischen Welt ausgelöst hat. Zwei Monate nach seinem elften Geburtstag, am 9. Juli 1944, schlossen sich die Tore von Bergen-Belsen hinter Ladislaus Löb. Fünf Monate später übertrat er die Grenze zur Schweiz, verfroren und hungrig, aber lebendig und sicher. Er war nicht alleine, sondern gehörte zu einer Gruppe von 1.670 jüdischen Männern, Frauen und Kindern aus Ungarn, die vor der Ermordung gerettet wurden - durch ein Geschäft, das Reszö Kasztner, selbst

ungarischer Jude, mit den Nazis ausgehandelt hatte. In zähen Verhandlungen feilschte er über Monate mit Adolf Eichmann, Kurt Becher und anderen: Menschenleben gegen Valuten, Schmuck, Lastwagen und weitere Waren. Zwölf Jahre und einen Justizirrtum später wurde Kasztner von einer Bande jüdischer Extremisten in Israel ermordet. Bis heute ist Rezsö Kasztner eine ambivalente Figur - von den einen als Verräter verachtet und von vielen anderen als Held verehrt. Dieses Buch erzählt die Geschichte eines Mannes, der Hunderte - möglicherweise sogar Tausende - vor dem Holocaust gerettet hat. Es berichtet zugleich vom Schicksal eines Kindes, das dank Kasztners Handeln den Holocaust überlebte. In einem fesselnden

Nebeneinander aus Geschichte und Erinnerung folgt das Buch Kasztners Weg von seinen Verhandlungen mit den Nazis bis zu dem umstrittenen Prozess in Israel und seiner Ermordung.

A very large proportion of commercial and industrial concerns in the UK find their business competitiveness dependent on huge quantities of already installed, legacy IT. Often the nature of their business is such that, to remain competitive, they have to be able to change their business processes. Sometimes the required change is radical and revolutionary, but more often the required change is incremental. For

such incremental change, a major systems engineering problem arises. The cost and delay involved in changing the installed IT to meet the changed business requirements is much too high. In order to address this issue the UK Engineering and Physical Science Research Council (EPSRC) set up, in 1996, a managed research programme entitled Systems Engineering for Business Process Change (SEBPC). I was appointed as co-ordinator of the programme. The overall aim of this new managed research programme was to release the full potential of IT as an enabler of business process change, and to overcome the disabling effects which the build-up of legacy systems has on such change. As such, this aim addressed a stated objective of the

Information Technology and Computer Science (IT&CS) part of EPSRC to encourage research at a system level. Michigan State Gazetteer and Business Directory for ... IGI Global
