The Routledge Companion to Applied Performance Routledge
 CO-PUBLISHED BY ROUTLEDGE AND THE NATIONAL COUNCIL OF TEACHERS OF ENGLISH This innovative book explores how digital language and tools can be used to teach applied grammar in the classroom. With a spotlight on internet language, Crovitz, Devereaux, and Moran demonstrate how students can practice rhetorical grammar with digital tools in order to use language purposefully. With an abundance of original strategies, prompts, and questions that tap into students' existing skills, the book is designed to help students build a meta-awareness of language through critical digital literacy. Drawing on examples and activities from TikTok, Twitter, memes, texting, online videos, digital media, and more, chapters feature lesson plans centered around real-world digital scenarios that will engage and inspire students. Ideal for preservice and inservice English teachers, this book offers a blueprint for helping students use and evaluate language in the digital world and includes practical suggestions for using technology and rhetorical grammar to

engage with and compose digital texts.

A Novel Approach Routledge

The institution of marriage is commonly thought to have fallen into crisis in late medieval northern France. While prior scholarship has identified the pervasiveness of clandestine marriage as the cause, Sara McDougall contends that the pressure came overwhelmingly from the prevalence of remarriage in violation of the Christian ban on divorce, a practice we might call "bigamy." Throughout the fifteenth century in Christian Europe, husbands and wives married to absent or distant spouses found new spouses to wed. In the church courts of northern France, many of the individuals so married were criminally prosecuted. In *Bigamy and Christian Identity in Late Medieval Champagne*, McDougall traces the history of this conflict in the diocese of Troyes and places it in the larger context of Christian theology and culture. Multiple marriage was both inevitable and repugnant in a Christian world that forbade divorce and associated bigamy with the

unchristian practices of Islam or Judaism. The prevalence of bigamy might seem to suggest a failure of Christianization in late medieval northern France, but careful study of the sources shows otherwise: Clergy and laity alike valued marriage highly. Indeed, some members of the laity placed such a high value on the institution that they were willing to risk criminal punishment by entering into illegal remarriage. The risk was great: the Bishop of Troyes's judicial court prosecuted bigamy with unprecedented severity, although this prosecution broke down along gender lines. The court treated male bigamy, and only male bigamy, as a grave crime, while female bigamy was almost completely excluded from harsh punishment. As this suggests, the Church was primarily concerned with imposing a high standard on men as heads of Christian households, responsible for their own behavior and also that of their wives.

Contemporary research into written academic discourse has become increasingly polarised between two approaches: corpus linguistics and discourse analysis. This volume presents a selection of recent work by experts in academic written discourse, and illustrates how corpus linguistics and discourse analysis can work as complementary approaches. The overall introduction sets the volume against the backdrop of current work in English for Academic Purposes, and introductions to the each section draw out connections between the chapters and put them into context. The contributors are experts in the field and they cover both novice and expert examples of EAP. The book ends with an afterword that provides an agenda-setting closing perspective on the future of EAP research. It will appeal to researchers and postgraduates in applied linguistics, corpus linguistics, discourse analysis and EAP.

This book investigates how the performing arts in higher education nationally contribute to the "high impact practices," as identified by the Association of American Colleges and Universities (AACU). Using the well-known map of the HIPs for illustrating the centrality of performing arts practices in higher education, the editors and authors of this volume call for increased participation by performing arts programs in general education and campus initiatives, with specific case studies as a guide. Performing arts contribute to the efforts of their institution in delivering a strong liberal arts education that uniquely serves students to meet the careers of the future. This is the first book to explicitly link the performing arts to the HIPs, and will result in the implementation of best practices to better meet the educational needs of students. At stake is the viability of performing arts programs to continue to serve students in their pursuit of a liberal arts education.

This volume, which features previously published performance manifestoes, articles, and book chapters on the most frequently discussed and debated topics in the field, is an indispensable reference work for both academics and students.

[Rhetor Response](#) Vintage

Showcasing a new methodology in language learning and identity research, this carefully conceptualized, innovative book explicates the use of autoethnography as a way of re-imagining one's sense of linguistic and cultural identity. A key work for researchers and students in Applied Linguistics and Language Education, it addresses fundamental aspects of research methodology and explores substantive issues relating to individual dimensions of multilingualism. Choi shows convincingly how the learning of a language is inseparable from one's constant searching for a voice, a place, and a self in this world, demonstrating the importance of interrogating what lies behind everyday life events and interactions—the political and ethical implications of the utterances, thoughts, actions, and stories of the self and others. Themes of authenticity, illegitimacy, power relations, perceptions of self/other, cultural discourses and practices, and related issues in multilingual identity development surface in the multi-modal narratives. Chapters on methodology, woven through the book, focus on the process of knowledge production, approaches to writing narratives, the messiness of research writing practices, and the inseparability of writing and research.

[Frameworks and Applications in the Digital Age](#) Springer

Bridging the disciplinary divide between writing and literature, *Rhetor Response* introduces the concept and pedagogical applications of "literary affordances"—the ways in which readers "use" and integrate literature into their own writing or lives. Unconcerned with authorial intent, interpretive meaning, or critical reception, "affordance" signifies a shift in focus from what literary texts mean and do to what one can do with them. This book presents both opportunities and challenges to writing studies, a field whose burgeoning disciplinary independence ironically relies on a sizable underclass of specialists in literature rather than writing. Incorporating elements of rhetorical theory, literary criticism, pedagogical methodology, political critique, and psychological and philosophical memoir, Peter H. Khost complicates and revives the relevance of literature—from belles lettres to fanfiction—by turning from interpretation to affordance in order to identify readers' applications of literary textual features to unrelated lived situations. *Rhetor Response* theorizes and exemplifies literary affordance as a constructive step toward professional reconciliation, as well as an entry into greater textual power and pleasure for students and readers. It is a one-of-a-kind resource for college writing program administrators, faculty and scholars in English and writing studies, and graduate and advanced undergraduate students across both disciplines.
