 Despite the obvious importance of eyewitness information in criminal investigation, police receive surprisingly little instruction on how to conduct an effective interview with a cooperative eyewitness. More than half of police departments have no formal training whatsoever for newly appointed investigators. Most texts in police science either completely omit the issue of effective interviewing techniques or provide only superficial coverage. This manual provides guiding principles to effective interviewing, with specific techniques to be used and others to be avoided. There are principles of memory retrieval so that the reader will understand why to employ specific techniques -- for example, when to use open-ended versus direct short-answer questions, effective use of pauses, asking follow-up questions, cues to name and number recall, etc. There is the strategy of interview sequential structure -- that is, what to probe for at the beginning, middle, and end of the interview. Also included are practical exercises and real-world experiences. The book will also be helpful for attorneys in conducting investigative interviews.

A visceral space thriller—perfect for fans of *Arrival* and *The Martian*—following the sole survivor of a catastrophic accident in space that leaves her drifting in the void with only the voice of her estranged husband, a NASA scientist, to guide her back to Earth. Commander Maryam “May” Knox awakes from a medically induced coma alone, adrift in space on a rapidly failing ship, with little to no memory of who she is or why she’s there. Slowly, she pieces together that she’s the captain of the ship, *Hawking II*; that she was bound for Europa—one of Jupiter’s moons—on a research mission; and that she’s the only survivor of either an accident—or worse, a deliberate massacre—that has decimated her entire crew. With resources running low, and her physical strength severely compromised, May must rely on someone back home to help her. The problem is: everyone thinks she’s dead. Back on Earth, it’s been weeks since *Hawking II* has communicated with NASA, and Dr. Stephen Knox is on bereavement leave to deal with the apparent death of his estranged wife, whose decision to participate in the Europa mission strained their marriage past the point of no return. But when he gets word that NASA has received a transmission from May, Stephen comes rushing to her aid. What he doesn’t know is that not everyone wants May to make it back alive. Even more terrifying: she might not be alone on that ship. Featuring a twisting and suspenseful plot and compelling characters, *Across the Void* is a moving and evocative thriller that you won’t be able to put down.

It's easy to name a superhero--Superman, Batman, Thor, Spiderman, the Green Lantern, Buffy the Vampire Slayer, Rorschach, Wolverine--but it's not so easy to define what a superhero is. Buffy has superpowers, but she doesn't have a costume. Batman has a costume, but doesn't have superpowers. What is the role of power and superpower? And what are supervillains and why do we need them? In *What is a Superhero?*, psychologist Robin Rosenberg and comics scholar Peter Coogan explore this question from a variety of viewpoints, bringing together contributions from nineteen comic book experts--including both scholars in such fields as cultural studies, art, and psychology as well as leading comic book writers and editors. What emerges is a kaleidoscopic portrait of this most popular of pop-culture figures. Writer Jeph Loeb, for instance, sees the desire to make the world a better place as the driving force of the superhero. Jennifer K. Stuller argues that the female superhero inspires women to stand up, be strong, support others, and most important, to believe in themselves. More darkly, A. David Lewis sees the indestructible superhero as the ultimate embodiment of the American "denial of death," while writer Danny Fingeroth sees superheroes as embodying the best aspects of humankind, acting with a nobility of purpose that inspires us. Interestingly, Fingeroth also expands the definition of superhero so that it would include characters like John McClane of the *Die Hard* movies: "Once they dodge ridiculous quantities of machine gun bullets they're superheroes, cape or no cape." From summer blockbusters to best-selling graphic novels, the superhero is an integral part of our culture. *What is a Superhero?* not only illuminates this pop-culture figure, but also sheds much light on the fantasies and beliefs of the American people.

*Pedigree* is Georges Simenon's longest, most unlikely, and most adventurous novel, the book that is increasingly seen to lie at the heart of his outsize achievement as a chronicler of modern self and society. In the early 1940s, Simenon began work on a memoir of his Belgian childhood. He showed the initial pages to André

Gide, who urged him to turn them into a novel. The result was, Simenon later quipped, a book in which everything is true but nothing is accurate. Spanning the years from the beginning of the century, with its political instability and terrorist threats, to the end of the First World War in 1918, *Pedigree* is an epic of everyday existence in all its messy unfinished intensity and density, a story about the coming-of-age of a precocious and curious boy and the coming to be of the modern world.

This book expounds fruitful ways of analysing matters of ecology, environments, nature, and the non-human world in a broad spectrum of material in French. Scholars from Canada, France, Great Britain, Spain, and the United States examine the work of writers and thinkers including Michel de Montaigne, Victor Hugo, Émile Zola, Arthur Rimbaud, Marguerite Yourcenar, Gilbert Simondon, Michel Serres, Michel Houellebecq, and Éric Chevillard. The diverse approaches in the volume signal a common desire to bring together form and content, politics and aesthetics, theory and practice, under the aegis of the environmental humanities.

Frank investigates an intertextual exchange between nineteenth-century historical disciplines (philology, cosmology, geology, archaeology and evolutionary biology) and the detective fictions of Poe, Dickens, and Doyle. In responding to the writings of figures like Lyell, Darwin and E.B. Taylor, detective fiction initiated a transition from scriptural literalism and a prevailing Natural Theology to a naturalistic, secular worldview. In the process, detective fiction sceptically examined both the evidence such disciplines used and their narrative rendering of the world.

#1 French Bestselling author of *The Reunion* 'It's no wonder that Guillaume Musso is one of France's most loved, bestselling authors' Harlan Coben Just a few months ago, Tom Boyd was a multi-million-selling author living in LA, in love with a world-famous pianist. But after a very public break-up he's shut himself away, suffering from total writer's block, with only drink and drugs for company. One night, a beautiful, naked stranger appears in Tom's house. She claims to be Billie, a character from his novels, who has fallen into the real world because of a printer's error in

his latest book. Crazy as her story sounds; Tom comes to see that this must be the real Billie. And she wants to strike a deal with him: if he writes his next novel she can go back to the world of fiction; in return she will help him win back his beloved *Aurore*. What does he have to lose?

This volume brings together three of Nobel Prize winner Samuel Beckett's major short stories and thirteen shorter pieces of fiction that he calls "texts for nothing." Here, as in all his work, Beckett relentlessly strips away all but the essential to arrive at a core of truth. His prose reveals the same mastery that marks his work from *Waiting for Godot* and *Endgame* to *Molloy* and *Malone Dies*. In each of the three stories, old men displaced or expelled from the modest corners where they have been living bestir themselves in search of new corners. Told, "You can't stay here," they somehow, doggedly, inevitably, go on. Includes: "The Expelled" "The Calmative" "The End" *Texts for Nothing* (1-10) [Mystery](#) Oxford University Press
