Based on interviews with over forty award-winning artists, *How to Rehearse a Play* offers multiple solutions to the challenges that directors face from first rehearsal to opening night. The book provides a wealth of information on how to run a rehearsal room, suggesting different paths and encouraging directors to shape their own process. It is divided into four sections: lessons from the past: a brief survey of influential directors, including Stanislavski's acting methods and Anne Bogart's theories on movement; a survey of current practices: practical advice on

launching a process, analyzing scripts, crafting staging, detailing scene work, collaborating in technical rehearsals and previews, and opening the play to the public; rehearsing without a script: suggestions, advice, and exercises for devising plays through collaborative company creation; rehearsal workbook: prompts and exercises to help directors discover their own process. *How to Rehearse a Play* is the perfect guide for any artist leading their first rehearsal, heading to graduate school for intense study, or just looking for ways to refresh and reinvigorate their artistry.

Filmated in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Northup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807- c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

Smith's early life, combining elements of biography, history, economics and philosophy to show how crucial incidents early in his life provided the necessary framework for his research into experimental economics. Smith takes the reader from his family roots on the railroads and oil fields of Middle America to his early life on a farm in Depression-wracked Kansas. A mediocre student in high school, Smith attended Friends University, on Wichita's west side, where an intense study of mathematics, physics, chemistry, and astronomy enabled him to pass the examinations to enter Caltech and study under luminary scientists like Linus Pauling. Eventually Smith discovered economics and pursued graduate study in the field at University of Kansas and Harvard. This volume ends with his Camelot years at Purdue, where he began his famous work in experimental economics, nurturing his research into an unlikely new field of economics.

This volume presents the state of the art of recent research on the acquisition of semantics. Covering topics ranging from infants' initial acquisition of word meaning to the more sophisticated mapping between structure and meaning in the syntax-semantics interface, and the relation between logical content and inferences on language meaning (semantics and pragmatics), the papers in this volume introduce the reader to the variety of ways in which children come to realize that semantic content is encoded in word meaning (for example, in the event semantics of the verbal domain or the scope of logical operators), and at the level of the sentence, which requires the composition of semantic meaning. The authors represent some of the most established and promising researchers in this domain,

demonstrating collective expertise in a range of methodologies and topics relevant to the acquisition of semantics. This volume will serve as a valuable resource for students and faculty, and junior and seasoned researchers alike.

Psychoanalysis and Anxiety: From Knowing to Being combines psychoanalytic, existential and dramaturgical perspectives on the study of anxiety. The book explores the implications for psychoanalysis of including a consideration of the being of the patient, and of the analyst. The central principle throughout is that the psychoanalytic and the existential belong together since it is the irreducible fact of anxiety that unifies them. It is in relation to anxiety that we are helped by other human beings to bear what is, and what we are. Divided into four sections, the book begins with the distinction made in antiquity between anxiety and fear, before discussing its treatment by philosophers such as Heidegger, who regarded anxiety as the mood most

disclosive of our being, and Kierkegaard, who distinguished between fear and angst. The book then explores how anxiety has been understood by major psychoanalytic theorists, including Freud, Klein, Winnicott and Bion, before a third part discusses how key principles of drama relate to therapeutic practice and theory, including a re-evaluation of the concept of catharsis, as well as Brecht's concept of making strange the familiar. The pursuit of insightful knowledge in psychoanalysis is reconsidered in the book's concluding section, with a shift of emphasis from psychoanalytic interpretations as statements of knowing to interpretive activity as a continuous process of becoming informed. This insightful and wide-ranging volume will fascinate practising psychoanalysts and psychotherapists, anyone working in mental health, as well as scholars of philosophy and theatre.

Hunger of Memory is the story of Mexican-American Richard Rodriguez, who begins his schooling in Sacramento, California, knowing just 50 words of English, and concludes his university studies in the stately quiet of the reading room of the British Museum. Here is the poignant journey of a "minority student" who pays the cost of his social assimilation and academic success with a painful alienation — from his past, his parents, his culture — and so describes the high price of "making it" in middle-class America. Provocative in its positions on affirmative action and bilingual education, Hunger of Memory is a powerful political statement, a profound study of the importance of language ... and the moving, intimate portrait of a boy struggling to become a man.
