**MILES
DEVAN**

**The Art and
Science of
Clicker
Training for
Horses**
Dogwise
Publishing

Most
horsemen
agree that
timing, feel,
and balance
are the holy
trinity of
horsemanship.
The balance is
brilliant:
scientific facts
and the
empirical
evidence to

support those
facts
assembled by
two highly
respected
professionals
in their
respective
disciplines.
The Sense of
an Ending
Dogwise
Publishing
Wall Street

Journal
bestseller! For
anyone who
wants to be
heard at work,
earn that
overdue
promotion, or
win more
clients, deals,
and projects,
the bestselling
author of
Captivate,
Vanessa Van
Edwards,
shares her
advanced
guide to
improving
professional
relationships
through the
power of cues.
What makes
someone
charismatic?
Why do some
captivate a
room, while
others have
trouble

managing a
small
meeting?
What makes
some ideas
spread, while
other good
ones fall by
the wayside?
If you have
ever been
interrupted in
meetings,
overlooked for
career
opportunities
or had your
ideas ignored,
your cues may
be the
problem – and
the solution.
Cues – the
tiny signals we
send to others
24/7 through
our body
language,
facial
expressions,
word choice,
and vocal

inflection –
have a
massive
impact on how
we, and our
ideas, come
across. Our
cues can
either
enhance our
message or
undermine it.
In this
entertaining
and accessible
guide to the
hidden
language of
cues, Vanessa
Van Edwards
teaches you
how to convey
power, trust,
leadership,
likeability, and
charisma in
every
interaction.
You'll learn: •
Which body
language cues
assert, "I'm a

leader, and here's why you should join me." • Which vocal cues make you sound more confident • Which verbal cues to use in your résumé, branding, and emails to increase trust (and generate excitement about interacting with you.) • Which visual cues you are sending in your profile pictures, clothing, and professional brand. Whether you're pitching an investment,

negotiating a job offer, or having a tough conversation with a colleague, cues can help you improve your relationships, express empathy, and create meaningful connections with lasting impact. This is an indispensable guide for entrepreneurs, team leaders, young professionals, and anyone who wants to be more influential. *Dog Detectives* CRC Press

Introducing a new approach to specialized groundwork for horse training, this guide provides more than two dozen exercises to help horses and their handlers find a reciprocal connection on the ground before the rider takes a position in the saddle. These exercises--done both standing still and in motion--are shown to drastically change the way a rider sees and feels about the horse, and immediately

improve how the horse moves, responds, and works. Aspiring to the ideals of lightness and ease promoted by top riding instructors and classical texts, the exercises found in this manual help handlers achieve the goals of discipline and joy that they have for their horses-- leaving behind the mechanical, stiff movements that inhibit horses from expressing

their innate curiosity, trust, and freedom of motion. *Knowing Your Horse* Dogwise Publishing Excel-erated Learning: Explaining in Clear English How Dogs Learn and How Best To Teach Them reveals the secret for increasing the speed and efficiency of dog training. With the freedom of understanding "how your dog learns" comes the ability of making the process easy, efficient and

enjoyable for your dog. *My Dog Pulls. What Do I Do?* Trafalgar Square Books Well known for her landmark book, *Excel-erated Learning*, author Pam Reid entertains and educates all who live with, love or are lucky enough to make their living with dogs in these 40+ essays about her work with animals. **Sacred Spaces** CRC Press "Norwegian dog trainer and behaviorist

Turid Rugaas has made it her life work to study canine social interaction. She coined the phrase calming signals to describe the social skills, sometimes referred to as body language, that dogs use to avoid conflict, invite play, and communicate a wide range of information to other dogs. Learn to identify situations that are stressful to your dog so that you can resolve or avoid them.

Rehabilitate a dog that has lost her ability to read or give calming signals." -- Amazon.com. *Equine Empowerment* James & Kenneth Publishers Humane, science-based horse training is a type of training where the user combines an evidence-based understanding of equine behaviour with their genuine love and respect for horses in order to train and handle horses in an ethical yet

effective way. This book will introduce you to the science behind animal training and explain how you can use positive reinforcement and other non-coercive techniques to train a wide range of behaviours. It also includes over 25 step-by-step training plans so you can go out and teach your horse to give his feet, lead calmly, back up, play fetch and so much more. This book is written by animal trainer and

behaviourist Alizé Veillard-Muckensturm who holds a 1st class Bsc (Hons) in animal behaviour and welfare from Hartpury University. The 2nd edition has 30+ new pages including a new section on consent training, 7 new training plans, new theory exercises and answers to frequently asked questions. [The Other End of the Leash](#) Souvenir Press The aim of this manual is to improve the welfare of dairy cattle in tropical developing countries, and by doing so, optimise cow and herd performance. It gives the stockmen and farmers directly concerned with the cattle a better understanding of animal behaviour and the ways cattle communicate their comfort or distress. The book discusses normal cattle behaviour and shows how domestication and breeding can affect behaviour to achieve high levels of production of milk, live weight gain and fertility. Animal welfare is important for producers because it can affect the health, production and contentment of cows. Animal welfare practices which adversely affect cow and herd performance on tropical small holder dairy farms are identified. Advice is then

given to change the animal's environment or modify a handler's technique to ensure cattle have the degree of comfort needed to achieve more profitable and sustainable systems of livestock farming. Cow Talk will be a beneficial resource for farmers who want to improve animal welfare, farm advisers who can assist farmers to improve their welfare practices,

educators who develop training programs for farmers and dairy advisers, and other stakeholders in tropical dairy production such as local agribusiness, policy makers and research scientists.

On Talking Terms with Dogs Alize

Veillard-Muckensturm Do you feel awkward at networking events? Do you wonder what your date really thinks of you? Do you wish you could decode

people? You need to learn the science of people. As a human behavior hacker, Vanessa Van Edwards created a research lab to study the hidden forces that drive us. And she's cracked the code. In *Captivate*, she shares shortcuts, systems, and secrets for taking charge of your interactions at work, at home, and in any social situation. These aren't the people skills you

learned in school. This is the first comprehensive, science backed, real life manual on how to captivate anyone—and a completely new approach to building connections. Just like knowing the formulas to use in a chemistry lab, or the right programming language to build an app, Captivate provides simple ways to solve people problems. You'll learn, for example...
· How to work

a room: Every party, networking event, and social situation has a predictable map. Discover the sweet spot for making the most connections. · How to read faces: It's easier than you think to speed-read facial expressions and use them to predict people's emotions. · How to talk to anyone: Every conversation can be memorable—once you learn how certain words generate the

pleasure hormone dopamine in listeners. When you understand the laws of human behavior, your influence, impact, and income will increase significantly. What's more, you will improve your interpersonal intelligence, make a killer first impression, and build rapport quickly and authentically in any situation—negotiations, interviews, parties, and pitches. You'll

never interact the same way again.

Dominance in Dogs

Sunshine Books (MA) Learn to communicate with your dog—using their language “Good reading for dog lovers and an immensely useful manual for dog owners.”—The Washington Post An Applied Animal Behaviorist and dog trainer with more than twenty years’ experience, Dr. Patricia McConnell reveals a

revolutionary new perspective on our relationship with dogs—sharing insights on how “man’s best friend” might interpret our behavior, as well as essential advice on how to interact with our four-legged friends in ways that bring out the best in them. After all, humans and dogs are two entirely different species, each shaped by its individual evolutionary heritage.

Quite simply, humans are primates and dogs are canids (as are wolves, coyotes, and foxes). Since we each speak a different native tongue, a lot gets lost in the translation. This marvelous guide demonstrates how even the slightest changes in our voices and in the ways we stand can help dogs understand what we want. Inside you will discover: • How you can get your dog to come when

called by acting less like a primate and more like a dog • Why the advice to “get dominance” over your dog can cause problems • Why “rough and tumble primate play” can lead to trouble—and how to play with your dog in ways that are fun and keep him out of mischief • How dogs and humans share personality types—and why most dogs want to live with benevolent leaders rather than “alpha wanna-bes!”

Fascinating, insightful, and compelling, *The Other End of the Leash* is a book that strives to help you connect with your dog in a completely new way—so as to enrich that most rewarding of relationships. [The Body Keeps the Score](#) Dogwise Publishing Horse Speak is not a training method or technique—it is a practical system for “listening” and “talking” to horses in their language, instead of

expecting them to comprehend ours. Horse Speak can be used by anyone who works with horses, whether riding instructor, colt starter, recreational rider, or avid competitor. It promises improved understanding of what a horse is telling you, and provides simple replies you can use to tell him that you “hear” him, you “get it,” and you have ideas you want to share with him, too. The

result? Time with your horse will be full of what horse trainer and equine-assisted learning instructor Sharon Wilsie of Wilsie Way Horsemanship calls Conversations, and soon the all-too-common misunderstandings that occur between horse and human will evolve into civil discussions with positive and progressive results! Learn Horse Speak in 12 easy steps;

understand equine communication via breath and body language; and discover the Four Gs of Horse Speak: Greeting, Going Somewhere, Grooming, and Gone. Practice regulating your intensity, and sample dozens of ready-made Conversations with your horse, as step-by-step templates and instructional color photographs walk you through the eye-opening process of communicatin

g on a whole new level. [Doggie Language](#) Dogwise Publishing A practical guide to using reward-based training techniques to create a true partnership with your horse. This leads to lifelong connection, effective problem-solving and joyful performance. [Scentwork for Horses](#) CSIRO PUBLISHING You are missing at least eighty percent of what is happening

around you right now. You are missing what is happening in your body, in the distance, and right in front of you. In marshalling your attention to these words, you are ignoring an unthinkable large amount of information that continues to bombard all of your senses. This ignorance is useful: indeed, we compliment it and call it concentration. It enables us to not just notice the shapes on the page, but to

absorb them as intelligible words, phrases, ideas. Alas, we tend to bring this focus to every activity we do. In so doing, it is inevitable that we also bring along attention's companion: inattention to everything else. This book begins with that inattention. It is not a book about how to bring more focus to your reading of Tolstoy; it is not about how to multitask, attending to two or three or four tasks

at once. It is not about how to avoid falling asleep at a public lecture, or at your grandfather's tales of boyhood misadventures . It is about attending to the joys of the unattended, the perceived 'ordinary'. Even when engaged in the simplest of activities - taking a walk around the block - we pay so little attention to most of what is right before us that we are sleepwalkers in our own lives. This book is about

that walk around the block, and how to rediscover the extraordinary things that we are missing in our ordinary activities.

Horse Speak: An Equine-Human Translation Guide
 Trafalgar Square Books
 Horses in Company is an in-depth study of the social interaction and hierarchy of horses in the wild. The book discusses how the characteristic behaviour of the herd has developed in

response to the natural selection pressures in their evolution, namely that horses are prey animals and not predators, and how this governs the behaviour of domestic horses living together. Through these studies, the book aims to help the reader understand the difficulties that arise between people and horses due to misunderstanding equine behaviour and motivation. Of

great interest to all horse owners and riders and illustrated with 60 colour photographs. *Evidence-Based Horsemanship*
 Dogwise Publishing
 You may have read books or seen TV shows that tell you that your dog will seek to dominate you, your family members and other pets unless you become the "alpha" and put him in his place. The theory is that since dogs evolved from wolves and wolves

(supposedly) form packs with strict pecking orders and battle each other to become the pack leader, your dog will do the same within your household. In this new US edition, author Barry Eaton separates out the facts from the fiction regarding dominance in pet dogs, presenting the reader with the results of recent research into the behavior of wolves and the impacts of selective breeding on

the behavior of dogs. The results may surprise you and will surely inform you.

Relaxed & Forward

Summersdale Kat Albrecht is the acknowledged expert on training dogs to find lost pets - "dog detectives." As the founder of the Missing Pet Partnership and Pet Hunters International, she has devoted years to developing proven methods to train dogs to work as cat-detection dogs

and trailing dogs to search for a wide variety of companion animals. The book presents detailed, step by step, reward-based training methods as well as information on how to assess a dog's potential to be a dog detective and what you need to know as a prospective handler. Whether you desire to perform this service professionally or as a hobby, you can help people suffering from

the trauma associated with a lost pet.

The 48 Laws of Power (Special Power Edition) Storey Publishing, LLC
Describes a kind and effective method for encouraging dogs to walk without pulling. Simple steps with informative photographs which aid understanding, includes tips on equipment to use, reasons for pulling and trouble shooting, along with case studies.

How to Think Like a Horse
John Wiley & Sons
Commemorating its 25th anniversary, a limited, one-time printing, collector's edition of the over 4-million copy selling, must-have book that's guided those millions to success and happiness, from the New York Times bestselling author and foremost expert on power and strategy. A not-to-be-missed Special Power Edition of the modern

classic, now beautifully packaged in a vegan leather cover with gilded edges, including short new notes to readers from Robert Greene and packager Joost Elffers. Greene distills three thousand years of the history of power into 48 essential laws by drawing from the philosophies of Machiavelli, Sun Tzu, and Carl Von Clausewitz as well as the lives of figures ranging from Henry Kissinger to P.T. Barnum.

Including a hidden special effect that features portraits of Machiavelli and Greene appearing as the pages are turned, this invaluable guide takes readers through our greatest thinkers, past to present. This multi-million-copy New York Times bestseller is the definitive manual for anyone interested in gaining,

observing, or defending against ultimate control. *Aggression in Dogs* Elsevier Health Sciences Focuses on cultivating mindfulness of the body's signals about feelings, encouraging acceptance of all types of emotions, and developing strategies for calming strong or uncontrollable feelings. *Horse Behaviour Exposed* The

Crowood Press "Barking is natural and almost all dogs bark. It is one of the many way dogs communicate with each other as well as with humans. By learning to identify what your dog is expressing when he barks, you can take steps to minimize the negative impact of barking behaviour"-- Publisher's description.
