Why The Invisible Backpack The Invisible Backpack is a labor of love created from a life-long struggle to come to terms with who the author is and accept himself as he was meant to be. We are all born with an invisible backpack on our backs. It is where we put all the hurts of life. When we are young and courageously climbing the stairs of life, it is extremely light, and we really don't know it's there. As we get older, it gets heavier with whatever pain, grief, or trauma we experience. Unfortunately, we resist taking these feelings out of our backpacks and let go of them. Some of us hold onto them so tightly, we forget to make room for the things that lighten our load...forgiveness, acceptance, tolerance, and love. For if we can put these items in our backpacks, it will cancel out all of the negative things we've been holding onto, and our life journeys will become much lighter.

Through a critical-ecological lens, this book examines how to prepare preservice teachers to be resourceful and responsive practitioners in addressing the intellectual needs of children often labeled as "culturally and linguistically diverse." It explores a comprehensive re-design of a teacher education program grounded in research on the complex factors that affect the teaching and learning of linguistically and culturally diverse children. Re-Designing Teacher Education for Culturally and Linguistically Diverse Students challenges hegemonic cultural and linguistic norms, quantitative and static views of "resources," the impact of U.S. education policy, and the limited attention to the agency, identities, and strategic actions of diverse students and their families.

The definitive career guide for grad students, adjuncts, post-docs and anyone else eager to get tenure or turn their Ph.D. into their ideal job Each year tens of thousands of students will, after years of hard work and enormous amounts of money, earn their Ph.D. And each year only a small percentage of them will land a job that justifies and rewards their investment. For every comfortably tenured professor or well-paid former academic, there are countless underpaid and overworked adjuncts, and many more who simply give up in frustration. Those who do make it share an important asset that separates them from the pack: they have a plan. They understand exactly what they need to do to set themselves up for success. They know what really moves the needle in academic job searches, how to avoid the all-too-common mistakes that sink so many of their peers, and how to decide when to point their Ph.D. toward other, non-academic options. Karen Kelsky has made it her mission to help readers join the select few who get the most out of their Ph.D. As a former tenured professor and department head who oversaw numerous academic job searches, she knows from experience exactly what gets an academic applicant a job. And as the creator of the popular and widely respected advice site The Professor is In, she has helped countless Ph.D.'s turn themselves into stronger applicants and land their dream careers. Now, for the first time ever, Karen has poured all her best advice into a single handy guide that addresses the most important issues facing any Ph.D., including: -When, where, and what to publish - Writing a foolproof grant application -Cultivating references and crafting the perfect CV -Acing the job talk and campus interview -Avoiding the adjunct trap -Making the leap to nonacademic work, when the time is right The Professor Is In addresses all of these issues, and many more.
