A true story that reads like a novel. A man and a woman leave a normal lifestyle of home and office, similar to that of millions of others, and set off to sail around the world on a sailboat. They uncover distant lands, forgotten archipelagos, emotions, fears, and incredible landing places. Large and small adventures, compellingly told in simple language that will captivate right up to the final page. "Under the endless sky" is the book that introduced Elisabetta Eordegh and Carlo Auriemma as sailors and writers and brought them fame amongst lovers of sailing and adventure. The book tells of a man and a woman who leave their normal existence of home and office, similar to that of millions of others, and plunge into the boundless immensity of the oceans, to see what lies beyond the horizon. They uncover distant lands, forgotten archipelagos, people that live their lives away from everything and everybody, places that are still unspoiled and uncontaminated and above all they find emotions, fears, unforeseen encounters, tempests and some dashing courageous landings. Large and small adventures which the authors relate in a compelling style and simple language that will captivate to the final page. The book is a fresh and open window on the world, passing with ease from encounters with pirates off the coast of Columbia, to immersion into the pristine domain of the animals of the Galapagos Islands, from the atmospheric serenity of fabulous South Sea Islands to the great solitude of long voyages between sky and waves. "Under the endless sky" is the story of how the sea can profoundly change the very existence and way of thinking of those who have embraced its intimacy."

Eric Tabarly was one of yachting's iconic figures who became a legend in French sailing from the moment he beat the British to win the second edition of the single-handed transatlantic in 1964. It was not so much that he won but the way in which he did it that raised his profile in his native country. Purpose-built for the race, his 44-foot Pen Duick II took yacht development forward in seven league boots, at a time when his more corinthian competitors' advances were only incremental. He beat Sir Francis Chichester, the winner of the first edition of the race, by nearly three days. Tabarly, a French Naval officer, was tough and fearless as well as an innovator ; although it was single-handed sailing that elevated him to legendary status (he was awarded France's Legion D'Honneur for his triumph) he was soon taking part in races like the Sydney Hobart, the Fastnet Race and the Transpac, winning line honours in all three and setting a new course record in the Transpac. Before long he had begun to make plans to compete in a new round the world race - the Whitbread. Two dismastings prevented him (the fastest entrant on all points of sail) from winning the 1973 race. By now Tabarly had reached celebrity status in France but despite his appearances in the media it was always his exploits on the open ocean that commanded the most attention... such as winning the 1976 single-handed transatlantic race where he overcame the massive 236-foot schooner Club Mediterranée in his 73-foot Pen Duick VI.In 1984 Eric Tabarly was voted the most popular sports figure in France and ten years later, then 63, he was drafted into the Whitbread again to take over command of the French maxi La Poste where his legendary leadership skills were called upon to pull together a disparate team.Tabarly loved sailing to the very end and it was during a voyage to Ireland in 1998 to celebrate the 100th anniversary of Pen Duick that he was struck by the boom just off the Welsh coast and swept overboard to his death. France and the international sailing community mourned his passing.

In *Look, a Negro!*, political theorist Robert Gooding-Williams imaginatively and impressively unpacks

fundamental questions around race and racism. Inspired by Frantz Fanon's famous description of the profound effect of being singled out by a white child with the words Look, a Negro!, his book is an insightful, rich and unusually wide-ranging work of social criticism. These essays engage themes that have dominated debates on race and racial identity in recent years: the workings of racial ideology (including the interplay of gender and sexuality in the articulation of racial ideology), the viability of social constructionist theories of race, the significance of Afrocentrism and multiculturalism for democracy, the place of black identity in the imagination and articulation of America's inheritance of philosophy, and the conceptualization of African-American politics in post-segregation America. Look, a Negro! will be of interest to philosophers, political theorists, critical race theorists, students of cultural studies and film, and readers concerned with the continuing importance of race-consciousness to democratic culture in the United States.

The Fascist regime under Mussolini regarded its youth as its best hope for the future. Young people were courted more assiduously than any other group in the society and their political socialization became a central concern of the government. Believe, Obey, Fight discusses the various tools used by the Fascist regime from 1922 to 1943 to shape the political values and environment of the young. Tracy Koon focuses on the secondary agents of socialization, including the party, the educational establishment, youth groups, and the media of political communication. She shows that the response to this socialization ranged from apparent consent to dissent and finally to open opposition. The regime employed several methods to produce consensus among the young. Koon's analysis begins with a discussion of the rhetorical style of Mussolini's message and the key political myths manipulated by his propaganda machine: fascism as continuing revolution and social justice, the glories of ancient Rome, the hygienic function of war and violence, the religious spirit of the new creed, and the omniscience of the leader. She then describes the pre-Fascist educational system, the "most Fascist" Gentile reforms of 1923, and the later revision of those reforms by zealous party men engaged in the Fascist regimentation of teachers and students and the militarization and politicization of curricula and textbooks. Equally important agents of socialization were the Fascist groups organized for young people from their earliest years through the university level, including the annual national competitions and forums in which members could express their ideas on a range of issues. The regime provided physical, military, sports, and political training to strengthen the new Fascist society. Fascist socialization did for a time create a superficial consensus by appealing to both the love of conformity that marks the very young and the economic fears that caused students to conform in the hope of jobs. But Koon argues that the regime's attempt to exert totalitarian control over the young deprived them of personal identity. As time passed, the contradictions of the regime became clearer, the chasm between Fascist rhetoric and reality more obvious. In the end, the majority of young people came to believe that the regime had given them nothing to believe in, no one to obey, and nothing for which to fight. Originally published in 1985. This volume is a collection of eight articles on the general topic of translation. The common element running through them all is the analysis of samples of tourist literature and their translations, from a pragmatic point of view. The languages concerned are mainly English and Spanish, but examples of German and French texts are also included. The theoretical approaches are multifaceted. Relevance theory, systemic-functional linguistics and discourse analysis are some of the theoretical standpoints taken as a background. The book covers phenomena as varied as translation quality assessment, audience design and perlocutionary effects, dealing also with more specific features like thematic structure, inference and propositional meaning, discourse markers and grammatical metaphor in order to provide a wide range of analyses for the specialised reader.
