The seven-volume set of LNCS 11301-11307, constitutes the proceedings of the 25th International Conference on Neural Information Processing, ICONIP 2018, held in Siem Reap, Cambodia, in December 2018. The 401 full papers presented were carefully reviewed and selected from 575 submissions. The papers address the emerging topics of theoretical research, empirical studies, and applications of neural information processing techniques across different domains. The second volume, LNCS 11302, is organized in topical sections on other neural network models, stability analysis, optimization, and supervised learning.

This is not your Sunday School Noah's Ark. Noah Primeval is a speculative retelling of the beloved story of Noah for a new generation. In an ancient world submerged in darkness, fallen angels rule as gods and breed giants and monsters. Mankind is enslaved to evil. Noah, a tribal leader, has been prophesied to bring an end to the rule of these "gods" and save humanity from coming destruction. But Noah's wife and son are captives of these dark forces. To rise against this supernatural evil and rescue his family Noah will need an

equally supernatural army. But why has God told him to build a huge box out of gopher wood? Godawa is known as an author who both entertains and educates. Inspired by Michael Crichton's novels, Godawa has adapted his Hollywood screenwriting background into his prose style to create a reading experience that is like watching a movie. Also similar to Crichton, Godawa has sought to provide the scholarly research that undergirds the fictional adventure. Noah Primeval has an additional 100 pages of special appendixes that provide an explanation of Biblical concepts in the novel such as the Sons of God, the Nephilim, Leviathan, and the ancient Mesopotamian Cosmography in the Bible. Noah Primeval is written in the spirit of *The Chronicles of Narnia* and *The Lord of the Rings*, blending fantasy and mythopoeia with history to retell the Biblical narrative with a fresh perspective, while staying true to the original spirit of the story.

Material Dreams Oxbow Books

In *Material Dreams*, Starr turns to one of the most vibrant decades in the Golden State's history, the 1920s, when some two million Americans migrated to California, the vast majority settling in or around Los Angeles. Although he treats readers to intriguing side trips to Santa Barbara and Pasadena, Starr focuses here mainly on Los Angeles, revealing how this major city arose almost defiantly on a site lacking many of the advantages required for urban development, creating itself out of sheer will, the Great Gatsby of American cities. He describes how William Ellsworth Smyth, the Peter the Hermit of the Irrigation Crusade, propounded the importance of water in Southern California's future, and how such figures as the self-educated, Irish engineer

William Mulholland (who built the main aqueducts to Los Angeles) and George Chaffey (who diverted the Colorado River, transforming desert into the lush Imperial Valley) brought life-supporting water to the arid South. He examines the discovery of oil ("Yes it's oil, oil, oil / that makes LA boil," went the official drinking song of the Uplifters Club), the boosters and land developers, the evangelists (such as Bob Shuler, the Methodist Savanarola of Los Angeles, and Aimee Semple McPherson), and countless other colorful figures of the period. There are also fascinating sections on the city's architecture (such as the remarkably innovative Bradbury Building and its eccentric, neophyte designer, George Wyman), the impact of the automobile on city planning, the great antiquarian book collections, the Hollywood film community, and much more. By the end of the decade, Los Angeles had tripled in population and become the fifth largest city in the nation. In *Material Dreams*, Kevin Starr captures this explosive growth in a narrative tour de force that combines wide-ranging scholarship with captivating prose.

The *Book of Majors 2014* by The College Board helps students answer these questions: What's the major for me? Where can I study it? What can I do with it after graduation? Revised and refreshed every year, this book is the most comprehensive guide to college majors on the market. In-depth descriptions of 200 of the most popular majors are followed by complete listings of every major offered at more than 3,800 colleges, including four-year and two-year colleges and technical schools. The 2014 edition covers every college major identified by the U.S. Department

of Education—over 1,200 majors are listed in all. This is also the only guide that shows what degree levels each college offers in a major, whether a certificate, associate, bachelor's, master's or doctorate. The guide features: • insights—from the professors themselves—on how each major is taught, what preparation students will need, other majors to consider and much more. • updated information on career options and employment prospects. • the inside scoop on how students can find out if a college offers a strong program for a particular major, what life is like for students studying that major, and what professional societies and accrediting agencies to refer to for more background on the major.

Black & white print. Principles of Management is designed to meet the scope and sequence requirements of the introductory course on management. This is a traditional approach to management using the leading, planning, organizing, and controlling approach. Management is a broad business discipline, and the Principles of Management course covers many management areas such as human resource management and strategic management, as well as behavioral areas such as motivation. No one individual can be an expert in all areas of management, so an additional benefit of this text is that specialists in a variety of areas have authored individual chapters.

Mobility is a fundamental facet of being human and should be central to archaeology. Yet mobility itself and the role it plays in the production of social life, is rarely considered as a subject in its own right. This is particularly so with discussions of the Neolithic people where mobility is often framed as being somewhere between a sedentary existence and nomadic movements. This

latest collection of papers from the Neolithic Studies Group seminars examines the importance and complexities of movement and mobility, whether on land or water, in the Neolithic period. It uses movement in its widest sense, ranging from everyday mobilities -- the routines and rhythms of daily life -- to proscribed mobility, such as movement in and around monuments, and occasional and large-scale movements and migrations around the continent and across seas. Papers are roughly grouped and focus on 'mobility and the landscape', 'monuments and mobility', 'travelling by water', and 'materials and mobility'. Through these themes the volume considers the movement of people, ideas, animals, objects, and information, and uses a wide range of archaeological evidence from isotope analysis; artefact studies; lithic scatters and assemblage diversity.

Love, Please is a memoir of a timeless love story between a man and a woman from opposite sides of the world. They meet in Tokyo when she is there on tour, and each immediately realizes they are soul-mates. Their story unfolds over a period of seventeen years, from the mid seventies to the early nineties, chronicling the extraordinary adventure of their lives together. Satoru Oishi is a architect and sculptor who works with Jasper Johns and Phillip Johnson. Susana

Hayman-Chaffey is a soloist with the Merce Cunningham Dance Company. The backdrop is their Manhattan loft, from which they travel around the world making a living any way they can, and learning about life through dramatic, often humorous, ups and downs. It is a voyage of love between two people, their families, friends and children. It encourages and inspires us to keep faith in the midst of what seems to be an impossible life journey, proving that, with courage and determination, anything can be accomplished. It is a human story told simply and honestly about life and love.

Considers films that lurk on the boundaries of acceptability in taste, style, and politics. *B Is for Bad Cinema* continues and extends, but does not limit itself to, the trends in film scholarship that have made cult and exploitation films and other "low" genres increasingly acceptable objects for critical analysis. Springing from discussions of taste and value in film, these original essays mark out the broad contours of "bad"—that is, aesthetically, morally, or commercially disreputable—cinema. While some of the essays share a kinship with recent discussions of B movies and cult films, they do not describe a single aesthetic category or represent a single methodology or critical agenda, but variously approach bad cinema in terms of aesthetics, politics, and cultural value. The volume covers a range of issues, from the aesthetic and industrial mechanics of low-budget production through the terrain of audience responses and cinematic affect, and on to the broader moral and ethical

implications of the material. As a result, *B Is for Bad Cinema* takes an interest in a variety of film examples—overblown Hollywood blockbusters, faux pornographic works, and European art house films—to consider those that lurk on the boundaries of acceptability.

Introduction to Business Macmillan

In the spring of 1931, in a rugged desert canyon on the Arizona-Nevada border, an army of workmen began one of the most difficult and daring building projects ever undertaken—the construction of Hoover Dam. Through the worst years of the Great Depression as many as five thousand laborers toiled twenty-four hours a day, seven days a week, to erect the huge structure that would harness the Colorado River and transform the American West.

Construction of the giant dam was a triumph of human ingenuity, yet the full story of this monumental endeavor has never been told. Now, in an engrossing, fast-paced narrative, Joseph E. Stevens recounts the gripping saga of Hoover Dam. Drawing on a wealth of material, including manuscript collections, government documents, contemporary newspaper and magazine accounts, and personal interviews and correspondence with men and women who were involved with the construction, he brings the Hoover Dam adventure to life. Described here in dramatic detail are the deadly hazards the work crews faced as they hacked and blasted the dam's foundation out of solid rock; the bitter political battles and violent labor unrest that threatened to shut the job down; the deprivation and grinding hardship endured by the workers' families; the dam builders' gambling, drinking, and whoring sprees in nearby Las Vegas; and the stirring triumphs and searing moments of terror as the massive

concrete wedge rose inexorably from the canyon floor. Here, too, is an unforgettable cast of characters: Henry Kaiser, Warren Bechtel, and Harry Morrison, the ambitious, headstrong construction executives who gambled fortune and fame on the Hoover Dam contract; Frank Crowe, the brilliant, obsessed field engineer who relentlessly drove the work force to finish the dam two and a half years ahead of schedule; Sims Ely, the irascible, teetotaling eccentric who ruled Boulder City, the straightlaced company town created for the dam workers by the federal government; and many more men and women whose courage and sacrifice, greed and frailty, made the dam's construction a great human, as well as technological, adventure. Hoover Dam is a compelling, irresistible account of an extraordinary American epic.

In *Shooting 007*, beloved cameraman and director of photography Alec Mills, a veteran of seven James Bond movies, tells the inside story of his twenty years of filming cinema's most famous secret agent. Among many humorous and touching anecdotes, Mills reveals how he became an integral part of the Bond family as a young camera operator on 1969's *On Her Majesty's Secret Service*, how he bore the brunt of his old friend Roger Moore's legendary on-set bantering, and how he rose to become

the director of photography during Timothy Dalton's tenure as 007. Mills also looks back on a career that took in *Return of the Jedi* on film and *The Saint* on television with wit and affection, and *Shooting 007* contains many of his and Eon Productions' unpublished behind-the-scenes photographs compiled over a lifetime of filmmaking. Featuring many of the film industry's biggest names, this book will be a must-have for both the James Bond and British film history aficionado.

Paragon of youthful beauty, romantic symbol of a lost England, and precociously gifted poet, Rupert Chawner Brooke died in a hospital ship off the Aegean island of Skyros in April 1915, aged just 27. All England mourned his passing. But behind the glow of myth lies a darker reality. At the height of his promise a disappointment in love triggered a mental and physical collapse that brought his inner complexities to the surface. Letters reveal a man who was sexually ambivalent, misogynistic, anti-Semitic - and sometimes alarmingly unstable. This revised edition of Nigel Jones's admired biography, including an account of a previously unknown affair of Brooke's, reveals a more conflicted and troubled individual than the gilded Adonis of English literary myth.
