Cat Johnson  
From the  
publisher of  
Pipette  
Magazine,  
discover a  
natural wine-  
soaked  
memoir about  
finding your  
passion—and

falling in love.  
It was Rachel  
Signer's  
dream to be  
that girl: the  
one smoking  
hand-rolled  
cigarettes out  
the windows  
of her 19th-  
century  
Parisian studio  
apartment,  
wearing  
second-hand  
Isabel Marant  
jeans and  
sipping a glass

of Beaujolais  
redolent of  
crushed roses  
with a touch  
of horse  
mane. Instead  
she was an  
under-  
appreciated  
freelance  
journalist and  
waitress in  
New York City,  
frustrated at  
always being  
broke and  
completely  
miserable in

love. When she tastes her first pétillant-naturel (pét-nat for short), a type of natural wine made with no additives or chemicals, it sets her on a journey of self-discovery, both deeply personal and professional, that leads her to Paris, Italy, Spain, Georgia, and finally deep into the wilds of South Australia and which forces her, in the face of her "Wildman," to ask herself the hard question: can she really handle the

unconventional life she claims she wants? Have you ever been sidetracked by something that turned into a career path? Did you ever think you were looking for a certain kind of romantic partner, but fell in love with someone wild, passionate and with a completely different life? For Signer, the discovery of natural wine became an introduction to a larger ethos and philosophy that she had

long craved: one rooted in egalitarianism, diversity, organics, environmental concerns, and ancient traditions. In *You Had Me at Pét-Nat*, as Signer begins to truly understand these revolutionary wine producers upending the industry, their deep commitment to making their wine with integrity and with as little intervention as possible, she is smacked with the realization that unless

she faces, head-on, her own issues with commitment, she will not be able to live a life that is as freewheeling, unpredictable, and singular as the wine she loves.

 "Christakis . . . expertly weaves academic research, personal experience and anecdotal evidence into her book . . . a bracing and convincing case that early education has reached a point of crisis . . . her book is a rare thing: a serious work of research that also happens to be well-written and personal . . . engaging

and important." -- Washington Post "What kids need from grown-ups (but aren't getting)...an impassioned plea for educators and parents to put down the worksheets and flash cards, ditch the tired craft projects (yes, you, Thanksgiving Handprint Turkey) and exotic vocabulary lessons, and double-down on one, simple word: play." -- NPR The New York Times bestseller that provides a

bold challenge to the conventional wisdom about early childhood, with a pragmatic program to encourage parents and teachers to rethink how and where young children learn best by taking the child's eye view of the learning environment. To a four-year-old watching bulldozers at a construction site or chasing butterflies in flight, the world is awash with promise. Little children come into the

world hardwired to learn in virtually any setting and about any matter. Yet in today's preschool and kindergarten classrooms, learning has been reduced to scripted lessons and suspect metrics that too often undervalue a child's intelligence while overtaxing the child's growing brain. These mismatched expectations wreak havoc on the family: parents fear that if they

choose the "wrong" program, their child won't get into the "right" college. But Yale early childhood expert Erika Christakis says our fears are wildly misplaced. Our anxiety about preparing and safeguarding our children's future seems to have reached a fever pitch at a time when, ironically, science gives us more certainty than ever before that young children are exceptionally

strong thinkers. In her pathbreaking book, Christakis explains what it's like to be a young child in America today, in a world designed by and for adults, where we have confused schooling with learning. She offers real-life solutions to real-life issues, with nuance and direction that takes us far beyond the usual prescriptions for fewer tests, more play. She looks at

children's use of language, their artistic expressions, the way their imaginations grow, and how they build deep emotional bonds to stretch the boundaries of their small worlds. Rather than clutter their worlds with more and more stuff, sometimes the wisest course for us is to learn how to get out of their way. Christakis's message is energizing and reassuring: young children are

inherently powerful, and they (and their parents) will flourish when we learn new ways of restoring the vital early learning environment to one that is best suited to the littlest learners. This bold and pragmatic challenge to the conventional wisdom peels back the mystery of childhood, revealing a place that's rich with possibility.

Terrell Jamerson is the #1 high school basketball player in the country. His team is poised to win State, top colleges are lining up to give him scholarships, and everyone says he could play in the NBA tomorrow. But it only takes one false step to lose everything. Danny Wilcox is Terrell's best friend and teammate, and a top	prospect himself, but these days it seems like everyone wants to get close to Terrell: the sneaker guys, the money managers, the college boosters. They show up offering fast cars, hot girls, and cold, hard cash. They say they just want to help, but their kind of help could get Terrell disqualified. Danny and Terrell better keep their eyes on the ball if they hope to last the season. John Feinstein

author of Little Brother, Cory Doctorow, comes Pirate Cinema, a new tale of a brilliant hacker runaway who finds himself standing up to tyranny. Trent McCauley is sixteen, brilliant, and obsessed with one thing: making movies on his computer by reassembling footage from popular films he downloads from the net. In the dystopian near-future Britain where Trent is growing up, this is more

illegal than ever; the punishment for being caught three times is that your entire household's access to the internet is cut off for a year, with no appeal. Trent's too clever for that too happen. Except it does, and it nearly destroys his family. Shamed and shattered, Trent runs away to London, where he slowly learns the ways of staying alive on the streets. This brings him in touch

with a demimonde of artists and activists who are trying to fight a new bill that will criminalize even more harmless internet creativity, making felons of millions of British citizens at a stroke. A Good Drink Houghton Mifflin A professor's one-night stand with a bull rider leads to a wild ride when they meet again in a sizzling romance by the New York Times bestselling

author. A single look at the leggy blonde in the stands and rodeo cowboy Tucker Jenkins is ready to buck all night long. It's time to forget all about his cheating ex and his usual hands-off policy. It's a care-free night of unbridled passion: no strings attached—and no contact info exchanged. An English professor from the East Coast, Becca Hart isn't your average buckle bunny. But no

advanced degree could prepare her for Tuck's moves in the arena—or in bed. But most shocking of all is when she finds herself sitting across from him at her first Oklahoma State University staff meeting. Once they've reconnected, Tuck knows it's all about holding on. Now he just has to convince Becca that a rough start out of the chute doesn't mean they can't go the distance. "A

sweet and hot hero you'll want to keep around for longer than one night!"—Lorelei James New York Times bestselling contemporary western romance author of the *Rough Riders* and *Blacktop Cowboys* series. *The Beer Bible* Farrar, Straus and Giroux An addictive fantasy romance from TikTok sensation Piper CJ, now newly revised and edited. Two orphans grow into powerful

young women as they face countless threats to find their way back to each other. Farleigh is just an orphanage. At least, that's what the church would have the people believe, but beautiful orphans Nox and fae-touched Amaris know better. They are commodities for sale, available for purchase by the highest bidder. So when the madame of a notorious brothel in a far-off city

offers a king's ransom to purchase Amaris, Nox ends up taking her place — while Amaris is drawn away to the mountains, home of mysterious assassins. Even as they take up new lives and identities, Nox and Amaris never forget one thing: they will stop at nothing to reunite. But the threat of war looms overhead, and the two are inevitably swept into a conflict between human and

fae, magic and mundane. With strange new alliances, untested powers, and a bond that neither time nor distance could possibly break, the fate of the realms lies in the hands of two orphans — and the love they hold for each other. *Nurse as Educator* Scholastic Inc. Many books have been written about Appalachia, but few have voiced its concerns with the warmth and directness of this one. From

hundreds of interviews gathered by the Appalachian Oral History Project, editors Laurel Shackelford and Bill Weinberg have woven a rich verbal tapestry that portrays the people and the region in all their variety. The words on the page have the ring of truth, for these are the people of Appalachia speaking for themselves. Here they recollect an earlier time of isolation but of

independence and neighborliness. For a nearer time they tell of the great changes that took place in Appalachia with the growth of coal mining and railroads and the disruption of old ways. Persisting through the years and sounding clearly in the interviews are the dignity of the Appalachian people and their close ties with the land, despite the exploitation and change they have endured.

When first published, *Our Appalachia* was widely praised. This new edition again makes available an authentic source of social history for all those with an interest in the region.

University of Iowa Press Designed to teach nurses about the development, motivational, and sociocultural differences that affect teaching and learning, this text combines theoretical and pragmatic content in a balanced, complete style. --from publisher description. Our Appalachia Sourcebooks, Inc. Look at the back label of a bottle of wine and you may well see a reference to

its terroir, the total local environment of the vineyard that grew the grapes, from its soil to the climate. Winemakers universally accept that where a grape is grown influences its chemistry, which in turn changes the flavor of the wine. A detailed system has codified the idea that place matters to wine. So why don't we feel the same way about whiskey? In this book, the master

distiller Rob Arnold reveals how innovative whiskey producers are recapturing a sense of place to create distinctive, nuanced flavors. He takes readers on a world tour of whiskey and the science of flavor, stopping along the way at distilleries in Kentucky, New York, Texas, Ireland, and Scotland. Arnold puts the spotlight on a new generation of distillers, plant breeders, and local farmers

who are bringing back long-forgotten grain flavors and creating new ones in pursuit of terroir. In the twentieth century, we inadvertently bred distinctive tastes out of grains in favor of high yields—but today's artisans have teamed up to remove themselves from the commodity grain system, resurrect heirloom cereals, bring new varieties to life, and recapture the flavors of

specific local ingredients. The Terroir of Whiskey makes the scientific and cultural cases that terroir is as important in whiskey as it is in wine. Foul Trouble Cat Johnson Mathematical demography is the centerpiece of quantitative social science. The founding works of this field from Roman times to the late Twentieth Century are collected here, in a new edition of a classic work by David R. Smith and

Nathan Keyfitz. Commentaries by Smith and Keyfitz have been brought up to date and extended by Kenneth Wachter and Hervé Le Bras, giving a synoptic picture of the leading achievements in formal population studies. Like the original collection, this new edition constitutes an indispensable source for students and scientists alike, and illustrates the deep roots and continuing

vitality of mathematical demography. *A Nation Empowered, Volume 2* Cat Johnson Red The New York Times Bestseller In 2006 Jamie Tworkowski wrote a story called "To Write Love on Her Arms," about helping a friend through her struggle with drug addiction, depression, and self-injury. The piece was so hauntingly beautiful that it quickly went viral, giving birth to a non-profit

organization of the same name. Now, *To Write Love on Her Arms* (TWLOHA) is an internationally recognized leader in suicide prevention and a source of hope, encouragement, and support for people worldwide. *If You Feel Too Much* is a celebration of hope, wonder, and what it means to be human. From personal stories of struggling on days most people celebrate to

words of strength and encouragement in moments of loss, the essays in this book invite readers to believe that it's okay to admit to pain and okay to ask for help. *If You Feel Too Much* is an important book from one of this generation's most important voices. **Bad Decisions** Penguin An accessible guide to the work of American psychologist and affect theorist Silvan

Tomkins The brilliant and complex theories of psychologist Silvan Tomkins (1911-1991) have inspired the turn to affect in the humanities, social sciences, and elsewhere. Nevertheless, these theories are not well understood. A Silvan Tomkins Handbook makes his theories portable across a range of interdisciplinary contexts and accessible to a wide variety of contemporary

scholars and students of affect. A Silvan Tomkins Handbook provides readers with a clear outline of Tomkins's affect theory as he developed it in his four-volume masterwork *Affect Imagery Consciousness*. It shows how his key terms and conceptual innovations can be used to build robust frameworks for theorizing affect and emotion. In addition to clarifying his affect theory,

the Handbook emphasizes Tomkins's other significant contributions, from his broad theories of imagery and consciousness to more focused concepts of scenes and scripts. With their extensive experience engaging and teaching Tomkins's work, Adam J. Frank and Elizabeth A. Wilson provide a user-friendly guide for readers who want to know more about the foundations of

affect studies. *Romanced by a SEAL* Tor Teen I'm the deputy sheriff. She's very possibly a criminal. I should be arresting her. Instead, I'm kissing her.
