## BLANKENSHIP WALKER

*Anna Seward: A Constructed Life* Albert Whitman & Company  
Before they were the Boxcar Children, Henry, Jessie, Violet, and Benny Alden lived with their parents at Fair Meadow Farm. Although times are hard, they're happy—"the best family of all," Mama likes to say. One day, a blizzard hits the countryside, and a car is stranded on the road near their farm. The family in the car needs shelter, and when the Aldens take them in, the strangers soon become friends. But things never stay the same at Fair Meadow Farm, and the spring and summer bring events that will forever change the lives of the Alden children. Newbery-Award winning author Patricia MacLachlan pays loving tribute to the classic novel by Gertrude Chandler Warner in this story of the Alden children's origins and the challenges they faced before their boxcar adventures. *Shatterproof* Scholastic Inc.

Firms are collecting and analyzing customer data at an ever increasing rate in response to evidence that data analytics (precision targeting, improved selling) generates a positive return. Yet efforts often ignore customers' privacy concerns and feelings of vulnerability with long-term effects on

customers' trust, relationships, and ultimately financial performance. Big data, privacy, and cybersecurity often is relegated to IT and legal teams with minimal regard for customer relationships. This book fills the void by taking a customer-centric approach to privacy. It offers both defensive and offensive marketing-based privacy strategies that strongly position firms in today's data-intensive landscape. The book also helps managers anticipate future consumer and legislative trends. Drawing from the authors' own work and extant research, this book offers a compelling guide for building and implementing big data- and privacy-informed business strategies. Specifically, the book:

- - Describes the consumer psychology of privacy
- - Deconstructs relevant legal and regulatory issues
- - Offers defensive privacy strategies
- - Describes offensive privacy strategies
- Provides an executive summary with the Six Tenets for Effective Privacy Marketing

This book will be useful to managers, students, or the casual reader who is interested in how and why

big data and consumer privacy are transforming business. Moving beyond summary privacy insights, the book also offers a detailed and compelling action plan for improving performance by protecting against privacy threats as well as developing and implementing offensive privacy strategy. In the future, many firms will be competing through an integrated, customer-centric big data privacy strategy and this book will guide managers in this journey.

Scholastic Press  
This volume is the first English-language survey of Homeric studies to appear for more than a

generation, and the first such work to attempt to cover all fields comprehensively. Thirty leading scholars from Europe and America provide short, authoritative overviews of the state of knowledge and current controversies in the many specialist divisions in Homeric studies. The chapters pay equal attention to literary, mythological, linguistic, historical, and archaeological topics, ranging from such long-established problems as the "Homeric Question" to newer issues like the relevance of narratology and computer-assisted quantification. The collection, the third publication in Brill's handbook series, "The Classical Tradition," will be valuable at every level of study - from the general student of literature to the Homeric specialist seeking a general understanding of the latest developments across the whole range of Homeric scholarship. In her critical biography of Anna Seward (1742-1809), Teresa Barnard examines the poet's unpublished letters and manuscripts, providing a fresh perspective on Seward's life and historical milieu that restores and problematizes Seward's carefully constructed narrative of her life. Of the poet Anna Seward, it may be said with some veracity that hers was an epistolary life. What is known of Seward comes from six volumes of her letters and from juvenile letters that prefaced her books of poetry, all published posthumously. That Seward intended her correspondence to serve as her autobiography is clear, but she could not have anticipated that the letters she intended for publication would be drastically edited and

censored by her literary editor, Walter Scott, and by her publisher, Archibald Constable. Stripped of their vitality and much of their significance, the published letters omit telling tales of the intricacies of the marriage market and Seward's own battles against gender inequality in the educational and

workplace spheres. Seward's correspondents included Erasmus Darwin, William Hayley, Helen Maria Williams, and Robert Southey, and her letters are packed with stories and anecdotes about her friends' lives and characters, what they looked like, and how they lived. Particularly compelling is Barnard's discussion of Seward's

astonishing last will and testament, a twenty-page document that summarizes her life, achievements, and self-definition as a writing woman. Barnard's biography not only challenges what is known about Seward, but provides new information about the lives and times of eighteenth-century writers.
