Sipke D. Fokkema Amsterdam, Free University From June 13th - 17th, 1977 the NATO International Conference on Cognitive Psychology and Instruction, organized by the editors of this volume, took place at the Free University of Amsterdam. During this period approximately 150 psychologists representing 15 countries assembled for an exchange of scientific experiences and ideas. The broad aim of the conference, as indicated by its title, was to explore the extent to which theoretical and methodological developments in cognitive psychology might provide useful knowledge with regard to the design and management of instruction. From a great variety of submitted papers the organizers attempted to select those that represented major problem areas being scientifically studied in several countries. For the organization of this book we chose to categorize the contributions according to the following general areas: I. Learning II. Comprehension and Information Structure III. Perceptual and Memory Processes in Reading IV. Problem Solving and Components of Intelligence V. Cognitive Development VI. Approaches to Instruction The final paper in the volume is an extensive review and summary by Glaser, Pellegrino, and Lesgold, that examines the state of cognitive psychology (mainly as reflected in the contributions in this volume) with regard to instructional purposes. Each of the sections of the book also begins with a brief overview of the specific topics considered by the individual contributors within that section.

The Westminster Lobby correspondents have a special place in both the politics and the mass media of Britain. These journalists dominate the behind-the-scenes reporting of British national politics. In this book, originally published in 1970, Jeremy Tunstall presents the first systematic social science study of the uniquely British phenomenon of Lobby correspondents. The study includes data collected from interviews with the national Lobby correspondents, who also completed lengthy questionnaires. It contains evidence of their careers, political opinions, pay, working conditions, relationships with their employing news organization and political news sources, and on the way in which the correspondents both compete with, and exchange information with, each other. As well as this fascinating empirical data, the book offers an important contribution to the sociology of politics and the mass media, and to the study of 'organizational intelligence' and the sociology of occupations. There had long centred upon the Lobby correspondents many myths and misconceptions, which Jeremy Tunstall effectively demolishes. (The so-called 'Lobby rules' were here published for the first time.) Other real dilemmas are, however, revealed: the competing demands of publicity and secrecy; the dilemmas of British politics in which basic principles - such as Parliamentary supremacy and Cabinet secrecy - are daily breached, not only by

the correspondents, but also by leading politicians; and the problems of a system of political communication whose obsession with daily news values is so similar to official and academic contributions. With media and politics still very much linked today, this reissue can be read and enjoyed in its historical context.

This personal observation of Tanna, an island in the southern part of the Vanuatu archipelago, presents an extraordinary case study of cultural resistance. Based on interviews, myths and stories collected in the field, and archival research, *The Tree and the Canoe* analyzes the resilience of the people of Tanna, who, when faced with an intense form of cultural contact that threatened to engulf them, liberated themselves by re-creating, and sometimes reinventing, their own *kastom*. Following a lengthy history of Tanna from European contact, the author discusses in detail original creation myths and how Tanna people revived them in response to changes brought by missionaries and foreign governments. The final chapters of the book deal with the violent opposition of part of the island population to the newly established National Unity government.

Powerful evidence for the existence of a personal God! Information is the cornerstone of life, yet it is something people don't often think about. In his fascinating new book, *In the Beginning Was Information*, Dr. Werner Gitt helps the reader see how the very presence of information reveals a Designer: Do we take for granted the presence of information that organizes every part of the human body, from hair color to the way internal

organs work? What is the origin of all our complicated data? How is it that information in our ordered universe is organized and processed? Gitt explains the necessity of information - and more importantly, the need for an Organizer and Originator of that information. The huge amount of information present in just a small amount of DNA alone refutes the possibility of a non-intelligent beginning for life. It all points to a Being who not only organizes biological data, but also cares for the creation.

Written from a feminist perspective, the book combines a broad historical survey with close textual analysis. Sections on women's writing in the periods 1820-1880, 1881-1917, 1917-1953, and 1953-1992 are followed by essays on individual writers.

Cheap booze. Flying fleshpots. Lack of sleep. Endless spin. Lying pols. Just a few of the snares lying in wait for the reporters who covered the 1972 presidential election. Traveling with the press pack from the June primaries to the big night in November, Rolling Stone reporter Timothy Crouse hopscotched the country with both the Nixon and McGovern campaigns and witnessed the birth of modern campaign journalism. *The Boys on the Bus* is the raucous story of how American news got to be what it is today. With its verve, wit, and psychological acumen, it is a classic of American reporting. NOTE: This edition does not include photographs.
