Groups and Manifolds is an introductory, yet a complete self-contained course on mathematics of symmetry: group theory and differential geometry of symmetric spaces, with a variety of examples for physicists, touching briefly also on super-symmetric field theories. The core of the course is focused on the construction of simple Lie algebras, emphasizing the double interpretation of the ADE classification as applied to finite rotation groups and to simply laced simple Lie algebras. Unique features of this book are the full-fledged treatment of the exceptional Lie algebras and a rich collection of MATHEMATICA Notebooks implementing various group theoretical constructions.

"Kondisi pemasaran produk sekarang ini sudah tidak kompetitif lagi, tetapi sudah hyperkompetitif sehingga kedudukan produk di rak modern market terancam oleh aktivitas Sales Promotion Girl (SPG) pesaing. Kini, keberadaan SPG selain mengedukasi konsumen, ternyata membantu dalam proses selling, yaitu memproses PO (purchase order) dan dikirimkan ke salesman. Selain itu SPG juga dibutuhkan karena terbatasnya space di store-store potensial, maka selain berpromosi ia juga mengelola rak hingga menimbulkan impulse buying. Namun sayangnya keberadaan SPG di store, direct

selling atau di acara event masih belum dipercaya menunjang penjualan. Apa yang harus dilakukan oleh pemasar? Salah satunya adalah meningkatkan performance SPG. Buku ini akan membantu banyak pembaca, karena berisi langkah-langkah bagaimana meningkatkan performance SPG, seperti: Rekrut SPG dengan benar agar turn over tidak tinggi, tentukan Job description dan pola kerja dengan benar, tentukan tali komando dengan benar, membuat strategi dan rencana penempatan SPG, memberikan material pendukung seperti point of sales, strategi merchandising, pengetahuan dan training yang harus diberikan, menemukan performance indicator dan mengevaluasinya, serta membahas laporan serta format apa saja yang di butuhkan SPG. Buku ini sangat penting dibaca calon pekerja di bidang promosi, Creatif director, Manager advertising, Event organizer manager, Agency (outsourcing) manager, Sales manager, Marketing manager, Sales super-visor, Supervisor marketing, Salesman, Merchandiser, dan SPG. Serta Dosen dan Mahasiswa dalam menambah kelengkapan literatur pelajaran pemasaran."

High dimensional integration arises naturally in two major sub-fields of statistics: multivariate and Bayesian statistics. Indeed, the most common measures of central tendency, variation, and loss are defined by integrals over the sample space, the parameter space, or both. Recent advances in computational power have stimulated significant new advances in both Bayesian and classical multivariate statistics. In many statistical problems, however, multiple integration can be the major obstacle to solutions. This volume contains the proceedings of an AMS-IMS-SIAM Joint Summer Research Conference on Statistical Multiple Integration, held in June 1989 at Humboldt State University in Arcata, California. The conference

represents an attempt to bring together mathematicians, statisticians, and computational scientists to focus on the many important problems in statistical multiple integration. The papers document the state of the art in this area with respect to problems in statistics, potential advances blocked by problems with multiple integration, and current work directed at expanding the capability to integrate over high dimensional surfaces.

Domain-driven Design Using Naked Objects CV. Tatakata Grafika

"Excel adalah program paling banyak kedua digunakan orang seluruh jagad setelah Word. Digunakan sebagai standar peralatan kerja dalam kegiatan perkantoran di semua bidang, termasuk dunia pendidikan dan ilmiah. Untuk kalangan Guru dan Pendidik, Excel adalah program yang sangat bermanfaat untuk mengelola data yang berkaitan dengan tugas-tugas di seputar kegiatan mengajar serta materi pembelajaran. Termasuk materi ajar yang akan disampaikan kepada siswa-siswanya. Buku ini ditulis dengan pendekatan bidang pendidikan maupun ilmiah. Mengingat kedua bidang tersebut senantiasa bergeliManga, Manhua & Manhwan dengan kegiatan hitung-menghitung, menganalisa, membandingkan dan menampilkan hasil yang dikehendaki, maka Excel merupakan alat bantu hitung yang super canggih yang dengan mudah dapat dikuasai orang ""awam"" yang bukan ahli komputer dan teknik informatika. Kalau banyak orang sudah familier menggunakan handphone, dengan bantuan buku ini akan semudah itulah mengoperasikan Excel. Pembahasan dalam buku mencakup: - Bekerja pada Workbook dan Worksheet - Melakukan Kalkulasi dengan Excel -

Memasukkan dan Menghitung Data Tanggal dan Waktu - Permasalahan Matematika dan Trigonometri - Mengelola Database Siswa - Mengenal dan Mengelola Tabel - Menampilkan Data dalam Grafik - Mengolah Data Teks - Mencari dan Menampilkan Data - Fungsi-Fungsi untuk melakukan Konversi - Menyisipkan Gambar ke Worksheet - Alat Bantu dalam Statistika"

Domain-driven design (DDD) focuses on what matters in enterprise applications: the core business domain. Using object-oriented principles, you can develop a domain model that all team members-including business experts and technical specialists-can understand. Even better, this model is directly related to the underlying implementation. But if you've tried building a domain-driven application then you'll know that applying the DDD principles is easier said than done. Naked Objects, an open-source Java framework, lets you build working applications simply by writing the core domain classes. Naked Objects automatically renders your domain object in a generic viewer--either rich client or HTML. You can use its integration with Fitnessse to test-drive the development of your application, story-by-story. And once developed, you can deploy your application either to the full Naked Objects runtime, or within your existing application infrastructure. In this book, Dan Haywood first gives you the tools to represent your domain as plain old Java objects, expressing business rules both declaratively and imperatively. Next, you'll learn the techniques to deepen your design while keeping it maintainable as the scope of your application grows. Finally, you'll walk through the development practices needed to implement your domain applications, taking in testing, deployment, and extending Naked Objects itself. Throughout the book, you'll build a complete sample application, learning key DDD principles as you work through the application step by step. Every chapter ends with exercises to gain further

experience in your own projects. Through its focus on the core business domain, DDD delivers value to your business stakeholders, and Naked Objects makes using DDD easy to accomplish. Using Naked Objects, you'll be ready in no time to build fully featured domain-driven applications.

Buku ini bertutur mengenai keringanan-keringanan dalam melaksanakan Ibadah bagi Profesional yang memenuhi syarat dan ketentuan hukum (Fiqh). Juga tidak ketinggalan, disajikan pula data-data gambar pendukung serta tabel-tabel Fiqh 4 Madzhab untuk berbagai persoalan terkait, yang merupakan ciri khas dari buku-buku karya Gus Arifin! Buku ini membahas Fiqh Thaharah, Shalat dan Makanan/minuman serta uraian ibadah-ibadah yang terkait dalam tinjauan 4 madzhab dan dilengkapi Doa para Musafir.

"Menulislah maka kau akan abadi." Kata seseorang yang mungkin sudah lama terucap. Begitupun dengan buku ini, lahir untuk abadi bersama imajinasi yang tertulis sepenuh hati. Tentang cinta yang tak bermuara, tentang cinta yang masih berkelana, atau mungkin tentang cinta yang terpatri dalam dada. Berwujud apapun ia, tetap hangat terasa. Semoga setiap rasa tersalurkan dengan indahnya.
