The Bluest Eye The History Press

In *The Mind's Eye*, Oliver Sacks tells the stories of people who are able to navigate the world and communicate with others despite losing what many of us consider indispensable senses and abilities: the power of speech, the capacity to recognize faces, the sense of three-dimensional space, the ability to read, the sense of sight. For all of these people, the challenge is to adapt to a radically new way of being in the world. There is Lilian, a concert pianist who becomes unable to read music and is eventually unable even to recognize everyday objects, and Sue, a neurobiologist who has never seen in three dimensions, until she suddenly acquires stereoscopic vision in her fifties. There is Pat, who reinvents herself as a loving grandmother and active member of her community, despite the fact that she has aphasia and cannot utter a sentence, and Howard, a prolific novelist who must find a way to continue his life as a writer even after a stroke destroys his ability to read. And there is Dr. Sacks himself, who tells the story of his own eye cancer and the bizarre and disconcerting effects of losing vision to one side. Sacks explores some very strange paradoxes—people who can see perfectly well but cannot recognize their own children, and blind people who become hyper-visual or who navigate by “tongue vision.” He also considers more fundamental questions: How do we see? How do we think? How important is internal imagery—or vision, for that matter? Why is it that, although writing is only five thousand years old, humans have a universal, seemingly innate, potential for reading? *The Mind's Eye* is a testament to the complexity of vision and the brain and to the power of creativity and adaptation. And it provides a whole new perspective on the power of language and communication, as we try to imagine what it is to see with another person's eyes, or another person's mind.

The Eye Of Horus Simon and Schuster

A sweeping intellectual history of the role of wealth in the church in the last days of the Roman Empire Jesus taught his followers

that it is easier for a camel to go through the eye of a needle than for a rich man to enter heaven. Yet by the fall of Rome, the church was becoming rich beyond measure. Through the *Eye of a Needle* is a sweeping intellectual and social history of the vexing problem of wealth in Christianity in the waning days of the Roman Empire, written by the world's foremost scholar of late antiquity. Peter Brown examines the rise of the church through the lens of money and the challenges it posed to an institution that espoused the virtue of poverty and called avarice the root of all evil. Drawing on the writings of major Christian thinkers such as Augustine, Ambrose, and Jerome, Brown examines the controversies and changing attitudes toward money caused by the influx of new wealth into church coffers, and describes the spectacular acts of divestment by rich donors and their growing influence in an empire beset with crisis. He shows how the use of wealth for the care of the poor competed with older forms of philanthropy deeply rooted in the Roman world, and sheds light on the ordinary people who gave away their money in hopes of treasure in heaven. Through the *Eye of a Needle* challenges the widely held notion that Christianity's growing wealth sapped Rome of its ability to resist the barbarian invasions, and offers a fresh perspective on the social history of the church in late antiquity.

Can you imagine not being able to speak or communicate? The silence, the loneliness, the pain. But, inside you disappear to magical places, and even meet your best friend there. However, most of the time you remain imprisoned within the isolation. Waiting, longing, hoping. Until someone realises your potential and discovers your key, so your unlocking can begin. Now you are free, flying like a wild bird in the open sky. A voice for the voiceless. Jonathan Bryan has severe cerebral palsy, a condition that makes him incapable of voluntary movement or speech. He

was locked inside his own mind, aware of the outside world but unable to fully communicate with it until he found a way by using his eyes to laboriously choose individual letters, and through this make his thoughts known. In *Eye can Write*, we read of his intense passion for life, his mischievous sense of fun, his hopes, his fears and what it's like to be him. This is a powerful book from an incredible young writer whose writing ability defies age or physical disability - a truly inspirational figure. Foreword by Sir Michael Morpurgo A portion of the proceeds from the sale of this book will be donated to Jonathan Bryan's charity, Teach Us Too. <http://www.teachustoo.org.uk/>

The New York Times bestselling author of the Cal Leandros series delivers a bold new supernatural thriller where one man's extraordinary abilities come with an equally phenomenal cost. Picking up a small, pink shoe from the grass forever changed young Jackson Lee's life. Not only did its presence mean that his sister Tessa was dead—murdered and stuffed in the deep, black

water of a narrow well—but the shoe itself told him so. Tessa’s death triggers an even more horrific family massacre that, combined with this new talent he neither wants nor can handle, throws Jack’s life into a tailspin. The years quickly take him from state homes to the streets to grifting in a seedy carnival, until he finally becomes the cynical All Seeing Eye, psychic-for-hire. At last, Jackson has left his troubled past behind and found a semblance of peace. That is, until the government blackmails him. After Jackson is forced to help the military contain the aftermath of a bizarre experiment gone violently wrong, everything he knows about himself will change just as suddenly as it did with his little sister’s shoe. And while change is constant . . . it’s never for the better.

NATIONAL BESTSELLER • From the acclaimed Nobel Prize winner—a powerful examination of our obsession with beauty and conformity that asks questions about race, class, and gender with characteristic subtlety and grace. In Morrison’s acclaimed first novel, *Pecola Breedlove*—an 11-year-old Black girl in an America whose love for its blond, blue-eyed children can devastate all others—prays for her eyes to turn blue: so that she will be beautiful, so that people will look at her, so that her world will be different. This is the story of the nightmare at the heart of her

yearning, and the tragedy of its fulfillment. Here, Morrison’s writing is “so precise, so faithful to speech and so charged with pain and wonder that the novel becomes poetry” (The New York Times).

Caryl’s story is a rare gift as it provides insight into an epidemic that brews behind closed doors in more homes than we would care to imagine. If statistics are accurate (the prevalence of abuse is much higher because domestic violence is notoriously under-reported), then up to 25% of the female population suffers abuse at home every week. In fact, as much as 80% of violence against women is at the hands of the men who supposedly love them. If we care at all for our humanity, society as a whole needs to take up Caryl’s mantra of Abuse Is No Excuse. Few understand the nature or the power of abuse and why someone chooses to stay in an ongoing abusive relationship. However, in reading Caryl’s story, she allows us to put ourselves in her place and we are left to wonder if we would have been able to do it any differently given her history and her reality. This is the gift that Caryl brings with her story and the honest way in which it is told--she makes it possible to move outside of ourselves and our own realities, judgments and prejudices so that we are able to walk the journey of another. This is a rare opportunity to truly live the life of a victim of abuse and to understand--from a safe vantage point--the powerlessness, hopelessness and desperation. Caryl falsely believed she was powerless to leave. Out on the street with no money, without work and nowhere to go, after a failed third marriage, she didn’t make the choice to leave--but she did make

the choice to survive. Caryl chose to learn and understand the nature of domestic violence, its root and its cure. All addictions are one-day-at-a-time journeys to recovery--join Caryl on hers. Praise received for *Look Me in the Eye* “One of the best personal odyssey stories I have ever read.” Dr. Sam Vaknin, author of *Malignant Self Love* “*Look Me in the Eye* is a rare opportunity for us to truly ‘live’ the life of a victim of Domestic Violence, and to understand from a safe vantage point--the powerlessness, hopelessness and desperation.” Alison, author of *I Have Life* About the Authors CARYL WYATT was born in Rhodesia in 1950, where she was brought up in a variety of broken homes. She was abused by her step-father as a child. She moved to South Africa as a wide-eyed 18-year-old and entered the world of modeling. She has 3 broken marriages behind her, but today, as witnessed in her book, has come to terms with her past. She lives in Johannesburg. This is not a hoax. Jim Theis was a real person, who wrote *The Eye of Argon* in all seriousness as a teenager, and published it in a fanzine, *Osfan* in 1970. But the story did not pass into the oblivion that awaits most amateur fiction. Instead, a miracle happened, and transcribed and photocopied texts began to circulate in science fiction circles, gaining a wide and incredulous audience among both professionals and fans. It became the ultimate samizdat, an underground classic, and for more than thirty years it has been the subject of midnight readings at conventions, as thousands have come to appreciate the negative genius of this amazing Ed Wood of prose.

Far as the Eye Can See Vintage

We spend about one-tenth of our waking hours completely blind. Only one percent of what we see is in focus at any one time. We exist in a world we see that’s always about half a second behind the real one. In fact you don’t need eyes to see - blind volunteers

have been taught to see through their chests. Wasps can’t see, but map their surroundings instead. If we are stared at, our heartbeat rises and our galvanic skin response alters. How many generations did it take for the first fish to acquire eyes? Answer is 400,000. Why do humans have whites to their eyes when other species don’t? Could it be that thinking arose as an evolutionary response to seeing? Without eyes, would minds exist at all? Be prepared to have your eyes opened! Using a spellbinding mix of scientific research, mathematics, philosophy, history, neuroscience, anecdote and language theory, in *The Eye*, Simon Ings unravels brilliantly the never-ending puzzle of how and why we see in the way that we do. From looking at the work of a huge range of theorists and scientists, to myths and personal experiences, and with the help of a beguiling mix of illustrated visual conundrums and enigmas, Ings triumphs with a compelling dissection of the age-old mysteries of the eye that’s both seriously interesting and interestingly fun. He tells the eye’s whole story for the very first time, fusing eye and sight into a single story - this is popular science of the highest order.

Bataille’s first novel, published under the pseudonym ‘Lord Auch’, is still his most notorious work. In this explicit pornographic fantasy, the young male narrator and his lovers Simone and Marcelle embark on a sexual quest involving sadism, torture, orgies, madness and defilement, culminating in a final act of transgression. Shocking and sacrilegious, *Story of the Eye* is the fullest expression of Bataille’s obsession with the closeness of sex, violence and death. Yet it is also hallucinogenic in its power, and is one of the erotic classics of the twentieth century.
