D.C. No-fault Motor Vehicle Insurance Liraz Publishing
 No-fault regimes, a formerly popular alternative to the tort compensation system for auto-accident victims, have gradually lost support. Over time, premiums and claim costs have grown in no-fault states relative to other states, primarily driven by explosive medical cost increases. No-fault and tort states have also converged across many domains affecting costs, including excess claiming, litigation patterns, and noneconomic-damage payments.

If you are developing software either as a professional programmer, a student, or simply for fun then it is very likely that you will be working in a Windows environment. If you are, and you are looking to build your own Windows applications, you will find Visual Basic provides an easy and effective means of doing so. This book is written specifically to help users get up and running fast on Visual Basic and focusses on how to develop useful programs quickly and effectively. If you are an undergraduate wanting a simple way to program applications, a professional programmer who needs a broad introduction to Visual Basic 3, or even an amateur programmer interested in building Windows applications, then this book will tell you all you need to know.

The Law Relating to Automobile Insurance Xlibris Corporation

Motor vehicle accidents are still a leading cause of death, even if the trend has somewhat declined over the past 20 years. Indeed, motor vehicle accidents are a significant cause of death in comparison with air and space transport accidents, homicides and even HIV infections, causes which are more often highlighted in the media. As shown in this book, motor vehicle accidents are particularly damaging to very young drivers. The assessment of driving risks is a common concern for road transportation safety and the automobile insurance industry. In both cases, there is an awareness of the great losses resulting from the deaths, injuries and property damage caused by traffic accidents. Research is essential to counteract this public health threat, to assess the success or failure of countermeasures, and to solve the problems it generates in the insurance industry. This book is for people concerned about road crashes (prevention and compensation) and about the insurance problems they pose - namely private and public institutional authorities, consultants, administrators, practitioners, and researchers interested in sharing the authors' experience in this domain. The book presents original contributions related to motor vehicle insurance and road safety. All papers have been evaluated by external referees. Four subjects are covered: 1) Automobile Insurance Pricing, Risks and Asymmetric Information; 2) Insurance Fraud; 3) Young Drivers: Licensing Policies, Evaluation and Risks; and 4) Road Insurance Regulation.

30 Secrets to Saving Money on Your Auto Insurance Atlantic Publishing Company

Insurance takes a huge bite out of the average American's monthly budget, and as stated above,

many Americans simply forgo insurance because they consider it out of reach. Shopping for insurance requires more effort than many people want to devote to it. They simply grab the first price they come across or accept routine rate increases when it is important to compare not only the price but also coverage and exclusions among carriers. In this easy to read and comprehensive new book you will learn hundreds of ways to secure and or reduce your health, automobile, life, and home insurance costs. If you do not have or cannot afford insurance, we will show you how to get it at a price you can afford. The Internet and technology have opened up a great new way to search for low cost insurance services; we will give you the Web sites, tell you what to look for and to look out for. There is a great deal you can do right now to cut insurance costs. For example, did you know that installing a theft tracking device in your car can save you up to 35% on your auto insurance and that your credit history can dramatically affect your auto insurance premium. Recent studies have shown that more than 90% of insurers use credit information to create an "insurance risk score," which they then use as a factor to determine your insurance rate. Add a simple home security system to monitor your home, and your insurance rates may be discounted up to 30%, depending upon where you live. Your insurance could end up costing you more if you choose to make monthly payments rather than pay the entire premium annually. Notify your agent if you retire, your children go to school, or you start working from home (when you're not traveling as much your rates will go down). Have you stopped smoking? Lost weight? Started exercising? All of these efforts can have a dramatic effect on your insurance rates. Insurance topics covered in this book are How Insurance Works, Insurance Company Rating, National and Local Firms, Auto, Health, and Disability Insurance, along with work sheets and forms to assist you in your search for the best coverage at the lowest price. Atlantic Publishing is a small, independent publishing company based in Ocala, Florida. Founded over twenty years ago in the company president's garage, Atlantic Publishing has grown to become a renowned resource for non-fiction books. Today, over 450 titles are in print covering subjects such as small business, healthy living, management, finance, careers, and real estate. Atlantic Publishing prides itself on producing award winning, high-quality manuals that give readers up-to-date, pertinent information, real-world examples, and case studies with expert advice. Every book has resources, contact information, and web sites of the products or companies discussed.

The definitive reference every VB.NET developer needs to understand the capabilities of .NET namespaces and increase productivity inside the .NET framework.

No-fault Motor Vehicle Insurance

In recent years, choice no-fault has emerged as a popular but controversial proposal for addressing the problem of high automobile insurance rates. Choice plans offer consumers the option of a lower-cost insurance policy with restrictions on filing lawsuits or a higher-cost policy with full tort rights. Some American states have implemented choice programs, and major federal choice legislation is now pending in the United States Congress. Choice no-fault has caught the attention of policy makers, the insurance industry, and academics. Until now, however, no single book has pulled together the available research on the topic. *The Economics and Politics of Choice No-Fault Insurance* fills that gap. Edited by scholars from different disciplines, each of whom has written extensively on automobile insurance issues, the book includes some of the best work in the area. Former Massachusetts Governor and presidential candidate Michael S. Dukakis wrote the foreword. Contributors include University of Virginia Law Professor Jeffrey O'Connell, widely considered the 'father of no-fault,' as well as authors of the influential RAND study of the potential effects of choice no-fault on insurance rates. The book chapters, most of which were written especially for this volume, cover topics ranging from the impact of choice no-fault on accidents and driving behavior, to the effects of choice on medical care usage, to alternative approaches for resolving accidents involving both 'no-fault' and 'tort' electors, to the political feasibility of choice legislative proposals. Emphasis on the potential advantages of choice no-fault is balanced by consideration of possible ill effects.
