"Existing scholarship on living history museums addresses the subject from a museum-studies or anthropology perspective. With his background in theatre history and theory, however, Scott Magelssen analyzes living

history museums using postmodern methodology. He offers suggestions for performance in an increasingly postmodern landscape, presents performance as a method for the study of history, explores emergent nontraditional theatrical practices, and concludes with an international listing of institutions and complete list of sources. Living History Museums is an invaluable resource for students and teachers of folklore and popular culture, as well as theatre, performance, and cultural,

American, and museum studies."--BOOK JACKET. [Cambridge Key English Test 2 Teacher's Book](#) Cambridge University Press

This Teacher's Book accompanies a collection of four complete practice tests for the Key English Test (KET) from the University of Cambridge Local Examinations Syndicate (UCLES).  Test developers need to provide a clear explication of the language ability constructs that underpin the tests they offer in the public domain; such an

explication is essential for supporting claims about the validity --- or usefulness --- of tests and test scores. This edited volume develops a theoretical framework for validating tests of second language speaking ability. The framework is then applied through an examination of the tasks in Cambridge ESOL speaking tests from a number of different validity perspectives that reflect the socio-cognitive nature of any assessment event. The chapter authors show how an

understanding and analysis of the framework and its components can assist test developers to operationalise their tests more effectively, especially in relation to the key criteria that differentiate one proficiency level from another. The volume is a rich source of information on all aspects of examining speaking ability. As such, it will be of considerable interest to examination boards who wish to validate their own speaking tests in a systematic and coherent

manner, as well as to academic researchers and graduate students in the field of language assessment more generally. This is a companion volume to the previously published titles Examining Writing and Examining Reading.
