A riveting three-way spy story set in occupied France. 'Game of Spies' tells the story of a lethal spy triangle between 1942 and 1944 in Bordeaux - and of France's greatest betrayal by aristocratic and right-wing Resistance leader Andre Grandclement. The story centres on three men: one British, one French and one German and the duel they fought out in an atmosphere of collaboration, betrayal and assassination, in which comrades sold fellow comrades, Allied agents and downed pilots to the Germans, as casually as they would a bottle of wine. It is a story of SOE, treachery, bed-hopping and executions in the city labelled 'la plus collaboratrice' in the whole of France.

Paddy Ashdown's autobiography was hailed as one of the most readable and exciting political life stories ever written of all – precisely because it was so very much more. This is the autobiography of an old-fashioned Man of Action, an adventurer, to be compared more readily to Fitzroy Maclean than David Steel. Ashdown's years as MP for Yeovil and leader of the Liberal Democrats pale alongside his time as a Royal Marine Commando, in the Special Boat Squadron, as a spy, on military service in Northern Ireland and Indonesia, and then subsequently – perhaps his finest and most heroic role, as the UN's High Representative in war-torn Bosnia. As one reviewer remarked: "This must be the first political memoir to offer advice on the best way to execute a jungle ambush and on how to treat an open wound using red

ants." Ashdown's appeal – which explains this book's hardback bestseller status – is that he transcends party political allegiances, and is seen as a genuinely honest and decent man unafraid to take on the hardest challenges.

This book connects the different topics and professions involved in information technology approaches to architectural design, ranging from computer-aided design, building information modeling and programming to simulation, digital representation, augmented and virtual reality, digital fabrication and physical computation. The contributions include experts' academic and practical experiences and findings in research and advanced applications, covering the fields of architecture, engineering, design and mathematics. What are the conditions, constraints and opportunities of this digital revolution for architecture? How do processes change and influence the result? What does it mean for the collaboration and roles of the partners involved. And last but not least: how does academia reflect and shape this development and what does the future hold? Following the sequence of architectural production - from design to fabrication and construction up to the operation of buildings - the book discusses the impact of computational methods and technologies and its consequences for the education of future architects and designers. It offers detailed insights into the processes involved and considers them in the context of our technical, historical,

social and cultural environment. Intended mainly for academic researchers, the book is also of interest to master's level students.

"Mommy, mommy, call him. Tell him to come here right away. I have so many things to tell him!" I had a ton of things to tell him. I wanted him to find a solution to all the shortages of clothes; of meat, so it would again be distributed through the ration books. I also wanted to ask him to give our Christmas back. And to come live with us. I wanted to let him know how much we really needed

him... Fidel didn't answer my letter. I kept writing him letters from a sweet and well-behaved child, a brave but sad girl. Letters resembling those of a secret, spurned lover... As a girl growing up in Cuba, Alina Fernandez found nothing abnormal in the fact that Fidel Castro would occasionally visit her house bearing gifts just for her. At the age of ten, her mother finally told her the truth: she was Castro's Daughter.

Archpriest Georges Vasilievich Florovsky (September 9, 1893-August 11, 1979) was born in Odessa as the fourth child of an Orthodox priest. Inspired by the erudite environment in which he grew up, he learned English, German, French, Latin, Greek, and Hebrew while still a schoolboy. At eighteen, he started to study philosophy and history. After his first graduation, he taught for three years at high schools in Odessa and then made his full graduation including the *licentia docendi* at all universities in the Russian empire. In 1919, the young Florovsky began to teach at the University of Odessa, but his family was forced to leave Russia in 1920. At that time, he realized that there would be no return for him, since the history and philosophy he taught was incompatible with Marxist ideology and would be rejected. Florovsky thus became part of the great emigration of the Russian intelligentsia, which also included Nikolai Berdyaev, Sergei Bulgakov, Nicholas Lossky, his son, Vladimir Lossky, Alexander Schmemmann, and John Meyendorff, the latter two of whom later followed Florovsky as Dean of St. Vladimir's Orthodox Theological Seminary. In 1925, Florovsky was appointed professor for patristics at the St. Sergius Institute of Orthodox Theology in Paris. In this subject, he found his real vocation. Patristics

became for him the benchmark for Orthodox theology and exegesis, as well as a source for many of his contributions and critiques of the ecumenical movement. Despite not having earned an academic degree in theology (apart from several honorary degrees he was awarded later), Florovsky would spend the rest of his life teaching at theological institutions. In 1932, Florovsky was ordained priest of the Orthodox Church. During the 1930s, he undertook extensive research in European libraries and wrote his most important works in the area of patristics as well as his magnum opus, *Ways of Russian Theology*. In this massive work, he questioned the Western influences of scholasticism, pietism, and idealism on Russian theology and called for its re-evaluation in the light of patristic writings. The work was received with either enthusiasm or condemnation - there was no neutral attitude to it among Russian émigrés. Among the critics were Sergei Nikolajevitch Bulgakov, the head of the St. Sergius Institute and prominent exponent of the Russian theological tradition of the 19th century, as well as Nikolai Berdyaev, exponent of the religious renaissance of the 20th century. In 1949, Florovsky moved to New York City to take a position as Dean of St. Vladimir's. Florovsky's oversight of the development of the theological curriculum led to the Board of Regents of the University of the State of New York granting the Seminary an Absolute Charter in 1953. He retired as Dean in 1955.

From bestselling and prize-winning author Paddy Ashdown, a revelatory new history of German opposition to Hitler. 'Ashdown has a great gift for narrative history. He unearths little known stories and places them in context with great dexterity. His new

book throws fresh and important light on a crucial topic.'

JONATHAN DIMBLEBY In his last days, Adolf Hitler raged in his bunker that he had been betrayed by his own people, defeated from the inside. In part, he was right. By 1945, his armies were being crushed on all fronts, his regime collapsing with many fleeing retribution for their crimes. Yet, even before the war started, there were Germans very high in Hitler's command committed to bringing about his death and defeat. Paddy Ashdown tells, for the first time, the story of those at the very top of Hitler's Germany who tried first to prevent the Second World War and then to deny Hitler victory. Based on newly released files, the repeated attempts of the plotters to warn the Allies about Hitler's plans are revealed. What is revealed is that the anti-Hitler bomb plots, which have received so much attention are, in fact only a small part of a much wider story; one in which those at the highest levels of the German state used every means possible - conspiracy, assassination, espionage - to ensure that, for the sake of the long-term reputation of their country and the survival of liberal and democratic values, Hitler could not be allowed to win the war. It is a matter of record that the European Union we have today and the nature and central position of Germany within it, is, in very large measure, the future envisaged by the plotters and for which they gave their lives.

The #1 New York Times–bestselling author's story about life at the Citadel in the 1960s, a profound exploration of what it means to be a man of honor. Lt. Col. Nugent Courvoisier, known to the cadets as "the Boo," is an imposing and inspiring leader at the South Carolina military academy, the Citadel. A harsh

disciplinarian but a compassionate mentor, he guides and inspires his young charges. Cadet Peter Cates is an anomaly. He is a gifted writer, a talented basketball player, and a good student, but his outward successes do little to impress his abusive father. The Boo takes Cates under his wing, but their bond is threatened when they're forced to confront an act of violence on campus. Drawn from Pat Conroy's own experiences as a student at the Citadel, *The Boo* is an unforgettable story about duty, loyalty, and standing up for what is right in the face of overwhelming circumstances.

The Shepherd and the Nymph

The Dead Sea Scrolls were found in caves 20 miles east of Jerusalem in 1947 and 1956. Now Michael Baigent and Richard Leigh, co-authors of *The Holy Blood and the Holy Grail*, have succeeded in uncovering what has been described as 'the academic scandal par excellence of the twentieth century': the story of how and why up to 75 per cent of the eight hundred ancient Hebrew and Aramaic manuscripts, hidden for some nineteen centuries, have, until very recently, remained concealed from the rest of the world. Through interviews, historical analysis and a close study of both published and unpublished scroll material, the authors are able to reveal the true cause of the

bitter struggle between scholars, for these documents disclose nothing less than a new account of the origins of Christianity and an alternative and highly significant version of the New Testament.
