Psychology 3E McGraw Hill Professional Written specifically for teachers, Motivating Students to Learn offers a wealth of research-based principles on

the subject of student motivation for use by classroom teachers. Now in its fourth edition, this book discusses specific classroom strategies by tying these principles to the realities of contemporary schools, curriculum goals, and classroom dynamics. The authors lay out effective extrinsic and intrinsic strategies to guide teachers in their day-to-day practice, provide guidelines for adapting to group and individual differences, and discuss ways to reach students who have become discouraged or disaffected learners. This edition features new material on the roles that classroom goal setting, developing students' interest, and teacher-student and peer relationships play in student motivation. It has been reorganized to address six key questions that combine

to explain why students may or may not be motivated to learn. By focusing more closely on the teacher as the motivator, this text presents a wide range of motivational methods to help students see value in the curriculum and lessons taught in the classroom.

As we wrote the first edition of The

McGraw-Hill Handbook, our students were in our minds, acting as our chief consultants. We knew that their perspectives on college life were different from those of previous generations of students, and so were their expectations. We understood that they needed a handbook for the twenty-first century, with state-of-the-art resources on writing, researching, and graphic design. They might be using a handbook in an English composition class at 9:00 AM, but at 10:00 AM they might be preparing PowerPoints for a speech course, and at 11:00 AM they might need the handbook to help with a history assignment. More than any other textbook, their handbook was their guide, not just to writing, but also to learning in college. In revising the

second edition, we have endeavored to make it an even stronger and more varied resource for achieving excellence in the ever-changing digital environment that students confront in college.
