Lyle XOX American Library Association

Canadian Science Fiction, Fantasy, and Horror: Bridging the Solitudes exposes the limitations of the solitudes concept so often applied uncritically to the Canadian experience. This volume examines Canadian and Québécois literature of the fantastic across its genres—such as science fiction, fantasy, horror, indigenous futurism, and others—and considers how its interrogation of colonialism, nationalism, race, and gender works to bridge multiple solitudes. Utilizing a transnational lens, this volume reveals how the fantastic is ready-made for exploring, in non-literal terms, the complex and problematic nature of intercultural engagement.

Mars in Aries Ariadne Press (CA)

BpNichol's The Martyrology is a long poem begun in 1967 and continuing until Nichol's death in 1988. It includes Books 1 & 2 (1972), Book(s) 7 & (1990), and Ad Sanctos: Book 9 (1992). The text in this volume is a facsimile, with minor corrections, of the 1990 edition of Gifts. --Coach House Books.

**The Arts of China** Career Examination

This first-hand account of a seminal Canadian crisis challenges the notion that civil rights and political liberties were unjustifiably restricted.

An Introduction to Business Analytics Food and Agriculture Organization of the United Nations

Gift this beautiful dot bullet notebook/journal to that special someone that has newly and recently been baptized. This travel-friendly book is suitable for all ages and great for all your writing purposes.

Social Investigator Kent State University Press

Although this story of a romance between an aristocratic Wehrmacht officer and a mysterious woman in Vienna set against the 1939 invasion of Poland was deemed unacceptable fare for Third Reich readership due to its ambiguity, lack of heroic military images, and the sympathetic portrayal of a suffering Poland, the

novel's actual purpose and highly subversive quality were hardly suspected by the Ministry of Propaganda."--Jacket.

**Münchner Stadtadreibuch** Independently Published

"One of the most comprehensive histories of modern capitalism yet written." —Michael Hirsh, New York Times An authoritative, insightful, and highly readable history of the twentieth-century global economy, updated with a new chapter on the early decades of the new century. Global Capitalism guides the reader from the globalization of the early twentieth century and its swift collapse in the crises of 1914–45, to the return to global integration at the end of the century, and the subsequent retreat in the wake of the financial crisis of 2008.

**The Bandit Queen of India** MIT Press (MA)

Few writers portray the dignity of people trapped by poverty or emotional isolation as compassionately as Gabrielle Roy does in the four stories of western Canada that comprise Garden in the Wind. The effortless craft and poetic sensitivity evident in all her writing are here in full abundance as she recounts the stories of a tramp who belongs to no one, a Chinese immigrant struggling to fulfill his dream, Doukhorbor settlers fired by a vision of a new land, and a lonely woman who nurtures her small but splendid garden. Imbued with a poignant simplicity, these are stories of sheer artistry.

This Is Not a Photo Opportunity is a street-level, full-color showcase of some of Banksy's most innovative pieces ever. Banksy, Britain's now-legendary "guerilla" street artist, has painted the walls, streets, and bridges of towns and cities throughout the world. Once viewed as vandalism, Banksy's work is now venerated, collected, and preserved. Over the course of a decade, Martin Bull has documented dozens of the most important and impressive works by the legendary political artist, most of which are no longer in existence. This Is Not a Photo Opportunity boasts nearly 200 color photos of Banksy's public work on the walls, as seen from the streets.

Introducing RDA Editions Amalion

When trust fund baby-turned-waitress Allie and her friends

accidentally open a Door to Hell in the basement of Sally's Diner, they don't realize the havoc it will wreak on their Brooklyn neighborhood. Of course, the upside to murder-happy demons coming through the Door all the time is that Allie gets her own sexy and mysterious demon hunter: the dark-eyed, leather-clad, Stetson-wearing Ryan. Ryan teaches Allie everything he knows about fighting the creatures of the underworld-but refuses to give in to the sexual tension that simmers between them. Allie has almost given up on taking her relationship with Ryan to the next level when there's a surge in demonic activity... and the Door disappears. Now Allie and Ryan have to travel through Hell, literally, to try to stop Hell from taking over the Earth. They may not survive the trip, but Allie is about to discover something very important: Mortal peril is a total turn-on.

Encyclopedia of the Social Sciences Open Road Media

Plant taxonomy is an ancient discipline facing new challenges with the current availability of a vast array of molecular approaches which allow reliable genealogy-based classifications. Although the primary focus of plant taxonomy is on the delimitation of species, molecular approaches also provide a better understanding of evolutionary processes, a particularly important issue for some taxonomic complex groups. Molecular Plant Taxonomy: Methods and Protocols describes laboratory protocols based on the use of nucleic acids and chromosomes for plant taxonomy, as well as guidelines for phylogenetic analysis of molecular data. Experts in the field also contribute review and application chapters that will encourage the reader to develop an integrative taxonomy approach, combining nucleic acid and cytogenetic data together with other crucial information (taxonomy, morphology, anatomy, ecology, reproductive biology, biogeography, paleobotany), which will help not only to best circumvent species delimitation but also to resolve the evolutionary processes in play. Written in the successful Methods in Molecular Biology series format, chapters include introductions to their respective topics, lists of the necessary materials and reagents, step-by-step, readily reproducible protocols, and notes on troubleshooting and avoiding known pitfalls. Authoritative and easily accessible, Molecular Plant Taxonomy: Methods and

Protocols seeks to provide conceptual as well as technical guidelines to plant taxonomists and geneticists.

*The 8-Hour Diet* W. W. Norton & Company

Born into one of Pakistan's most influential families, Tehmina Durrani was raised in the privileged milieu of Lahore high society. She was expected to marry a wealthy Muslim, bear him children and lead a sheltered life of leisure. This is the story of Tehmina's rebellion from an unhappy marriage.

**Molecular Plant Taxonomy** Naval Inst Press

Zana Muhsen, born and bred in Birmingham, is of Yemeni origin. When her father told her she was to spend a holiday with relatives in North Yemen, she jumped at the chance. Aged 15 and 13 respectively, Zana and her sister discovered that they had been literally sold into marriage, and that on their arrival they were virtually prisoners. They had to adapt to a completely alien way of life, with no running water, dung-plastered walls, frequent beatings, and the ordeal of childbirth on bare floors with only old women in attendance. After eight years of misery and humiliation Zana succeeded in escaping, but her sister is still there, and it seems likely that she will now never leave the country where she has spent more than half her life. This is an updated edition of Zana's account of her experiences.

*Give Me Room to Move My Feet* Hachette UK

When most people think about the Netherlands, images of tulips and peaceful pot smoking residents spring to mind. Bring up soccer, and most will think of Johan Cruyff, the Dutch player thought to rival Pele in preternatural skill, and Ajax, one of the most influential soccer clubs in the world whose academy system for young athletes has been replicated around the globe (and most notably by Barcelona and the 2010 world champions, Spain). But as international bestselling author Simon Kuper writes in *Ajax, The Dutch, The War: Soccer in Europe During the Second World War*, the story of soccer in Holland cannot be understood without investigating what really occurred in this country during WWII. For decades, the Dutch have enjoyed the reputation of having a "good war." The myth is even resonant in Israel where Ajax is celebrated. The fact is, the Jews suffered shocking persecution at the hands of Dutch collaborators. Holland had the second largest Nazi movement in Europe outside Germany, and in no other country except Poland was so high a percentage of Jews deported. Kuper challenges Holland's historical amnesia and uses

soccer -- particularly the experience of Ajax, a club long supported by Amsterdam's Jews -- as a window on wartime Holland and Europe. Through interviews with Resistance fighters, survivors, wartime soccer players and more, Kuper uncovers this history that has been ignored, and also finds out why the Holocaust had a profound effect on soccer in the country. Ajax produced Cruyff but was also built by members of the Dutch resistance and Holocaust survivors. It became a surrogate family for many who survived the war and its method for producing unparalleled talent became the envy of clubs around the world. In this passionate, haunting and moving work of forensic reporting, Kuper tells the breathtaking story of how Dutch Jews survived the unspeakable and came to play a strong role in the rise of the most exciting and revolutionary style of soccer -- "Total Football" - the world had ever seen.

*October Crisis 1970* Humana

Program synthesis is the task of automatically finding a program in the underlying programming language that satisfies the user intent expressed in the form of some specification. Since the inception of artificial intelligence in the 1950s, this problem has been considered the holy grail of Computer Science. Despite inherent challenges in the problem such as ambiguity of user intent and a typically enormous search space of programs, the field of program synthesis has developed many different techniques that enable program synthesis in different real-life application domains. It is now used successfully in software engineering, biological discovery, compute-raided education, end-user programming, and data cleaning. In the last decade, several applications of synthesis in the field of programming by examples have been deployed in mass-market industrial products. This monograph is a general overview of the state-of-the-art approaches to program synthesis, its applications, and subfields. It discusses the general principles common to all modern synthesis approaches such as syntactic bias, oracle-guided inductive search, and optimization techniques. We then present a literature review covering the four most common state-of-the-art techniques in program synthesis: enumerative search, constraint solving, stochastic search, and deduction-based programming by examples. It concludes with a brief list of future horizons for the field.

*Gifts* Random House

The Mongol invasion in the thirteenth century marked a new phase in the development of Islamic art. Trans-Eurasian exchanges of goods, people and ideas were encouraged on a large scale under the auspices of the Pax Mongolica. With the fascination of portable objects brought from China and Central Asia, a distinctive, hitherto unknown style - Islamic chinoiserie - was born in the art of Iran. Highly illustrated, *Islamic Chinoiserie* offers a fascinating glimpse into the artistic interaction between Iran and China under the Mongols. By using rich visual materials from various media of decorative and pictorial arts - textiles, ceramics, metalwork and manuscript painting - the book illustrates the process of adoption and adaptation of Chinese themes in the art of Mongol-ruled Iran in a visually compelling way. The observation of this unique artistic phenomenon serves to promote the understanding of the artistic diversity of Islamic art in the Middle Ages. **Key Features\***Covers various media of decorative and pictorial arts from Iran, Central Asia and China\*Deals with a diverse range of issues related to the East-West artistic relationship in the Middle Ages\*Features in-depth studies of style, technique and iconography in Iranian art under the Mongols\*Includes 125 illustrations, 24 in colour

Business Analytics (BA) is about turning data into decisions. This book covers the full range of BA topics, including statistics, machine learning and optimization, in a way that makes them accessible to a broader audience. Decision makers will gain enough insight into the subject to have meaningful discussions with machine learning specialists, and those starting out as data scientists will benefit from an overview of the field and take their first steps as business analytics specialist. Through this book and the various exercises included, you will be equipped with an understanding of BA, while learning R, a popular tool for statistics and machine learning.

*Applied Biological Engineering* Lulu.com

The material presented in this volume significantly extends what has been known to date of Asian textiles produced from the Tang (618-907) through the early Ming period (late 14th-early 15th century), and new documentation gives full recognition to the importance of luxury textiles in the history of Asian art. Costly silks and embroideries were the primary vehicle for the migration of motifs and styles from one part of Asia to another, particularly

during the Tang and Mongol (1207-1368) periods. In addition, they provide material evidence of both the cultural and religious ties that linked ethnic groups and the impetus to artistic creativity that was inspired by exposure to foreign goods.

**My Feudal Lord** Springer

S. Jammu, a young, ambitious Indian woman, is sworn in as police chief of St. Louis where the acts of private citizens are monitored and the actions of Martin Probst and his family threatened to

destroy her plan

*Economics and Psychology* Macmillan

Two thousand years ago, the lute was imported to China via overland trade routes from Central Asia and was adopted quickly in many of the regions. Ancient court documents describe how generations of talented musicians developed its music. John E. Myers translates one of these documents to introduce to readers of the English language the traditional music and artistic

philosophy of the Chinese lute or pipa. He combines language and musical skills with an aesthetic sensibility in sharing what he calls this world of expressive beauty.

**Islamic Chinoiserie** Edinburgh University Press

A quirky history that offers a new way of understanding the myth of the mummy's curse. Roger Luckhurst provides a startling path through the cultural history of Victorian England and its colonial possessions.
