This book, like all books, comes to an end,

but that is by no means the end of the story of Open Space. In fact it is safe to say that we have barely begun. The total simplicity of Open Space (sit in a circle, create a bulletin board, open a marketplace, and go to work) contrasts radically with the quality of results and speed of achievement. The conventional theory and practice of meeting and organization would suggest that what happens in Open Space should not occur. But it does, not once but thousands of times in all parts of the world. So the continuing story of Open Space is all about this wonderful anomaly. Why does it work? How does it work? And perhaps most intriguing - if "it" works in Open Space (whatever "it" is) why couldn't it work twenty-four hours a day, seven days a week, 365 days of the year? My best guess is that the "it" is the primal power of self-organization, and if so the real significance of Open Space has little to do with better meetings, and everything to do with a deepening understanding of who we really are and how we might most effectively get on in this world. But all of that is an unfolding story and, as I would see it, a wonderful, ongoing natural experiment.

And you are invited to participate. ----

During the past few years the most serious part of the author's study and reflection has been devoted to the subjects discussed in this book. These, briefly stated, are as follows: Firstly, that all mental or cerebral faculties can by direct scientific treatment be influenced to what would have once been regarded as miraculous action, and which is even yet very little known or considered. Secondly, in development of this theory, and as confirmed by much practical and personal experience, that the Will can by very easy processes of training, or by aid of Auto-Suggestion, be strengthened to any

extent, and states of mind soon induced, which can be made by practice habitual.

 The first complete world catalogue of the jewel beetles, the eighth largest beetle family Buprestidae and its small North American sister-group Schizopodidae, since Jan Obenberger's six fascicle (1926-1937) contribution to the Horn & Schenkling Coleopterorum Catalogus. Published in five volumes (3125 pages in total), this catalogue presents a full taxonomic history for all taxa, including fossils, along with distribution and type repository data. The catalogue follows the evolving modern classification which, for Buprestidae, employs 6 subfamilies, 47 tribes, 39 non-nominate subtribes, 513 genera and more than 14700 valid species. In addition, the first large bibliography on the subject concludes the catalogue with more than 8000 citations. In the present volume 1, a 20 page Introduction provides definition, structure and acknowledgment. The catalogue begins with a listing of fossil jewel beetles before commencing with the extant taxa. The small Schizopodidae come before the Buprestidae, which includes the

subfamilies Julodinae, Polycestinae (including the first of the six large genera: Acmaeodera), Galbellinae and the first part of Chrysochroinae.

 "Gone, finito, The End, I say. A father who puts an end to it all before he wears down the whole family deserves more praise than damnation." Two sisters travel to Sofia--in a convoy of luxury limousines arranged by a fellow Bulgarian exile--to bury their less-than-beloved father. Like tourists, they are chauffeured by the ever-charming Ruben Apostoloff--one sister in the back seat, one in the passenger seat, one sharp-tongued and aggressive, the other polite and considerate. In a caustic voice, Apostoloff shows them the treasures of his beloved country: the peacock-eye pottery (which contains poisonous dye), the Black Sea coast (which is utterly destroyed), the architecture (a twentieth-century crime). His attempts to win them over seem doomed to fail, as the sisters' Bulgarian heritage is a heavy burden--their father, a successful doctor and melancholy immigrant, appears in their dreams still dragging the rope with which he hanged

himself. An account of a daughter's bitterly funny reckoning with her father and his country, laden with linguistic wit and black humor, Apostoloff will introduce the unique voice of Sibylle Lewitscharoff to a new and eager audience.

Manche Orte bleiben besser unentdeckt! Vor den Toren Berlins lag einst mitten im Wald die Stadt Blumenthal. An bestimmten Tagen kann man Stimmen der ehemaligen Bewohner hören oder einen gelben Koffer auf dem See entdecken. Ein Anhalter, den Mina und ihr Bruder mitnehmen, erzählt ihnen von diesem geheimnisumwobenen Ort. Sie begeben sich auf die Suche nach der Stelle, an der sich die Stadt der Legende nach befunden haben soll. Als das Auto spurlos verschwindet und die Nacht hereinbricht, geraten sie immer tiefer in den dunklen Wald und merken schnell, dass sie nicht allein sind. Weitere Teile: 1. Das Fahrstuhlritual 2. Regaining a lost soul In this book, the millennia-old healing techniques of shamanism are presented clearly and appealingly. The book is meant to give readers an overview of the complex and manifold facets of shamanism and to encourage them to reach out to their respective power animal. Power animals – spiritual companions and leaders Power animals are spiritual companions and soulmates, and each has a personal relationship with its human counterpart, who is thereby empowered, energized, deepened and motivated. The person is enabled to find his or her true purpose, to develop more fully and to avoid pitfalls, is protected, kept healthy and even healed, and can turn to the animal for help at any time. The more he or she does so, the more intense their partnership becomes. Some partnerships last a lifetime. How do you find your power animal? This book explains how to find, honor and bond with your power animal and thereby be strengthened and healed. It explains how

the animal may be lost and how the loss may be averted. The main power animals The most important power animals and their meaning and message for humans are discussed in detail, revealing what positive qualities may be transferred from one to you. The worldview of shamanism This book offers all key information about shamanism and how to use it. The division of the shamanic cosmos into the upper, middle and lower worlds is explained, as are details of shamanic journeys. The role of the master of animals in particular is examined, as is the difference between spirit helpers and totem animals. The basic features of neo-shamanism are shown too. The shaman's career Shamans are mediators between worlds. They have a special spiritual power, can change their state of consciousness at will and are sent into trance mostly by drumbeats.  Acidification is a universal problem at all mining sites in which oxygenated water

comes in contact with sulfide minerals or other reduced sulfur compounds. An International Workshop was held in September 1995 at the Department for Inland Water Research of the UFZ-Centre for Environmental Research in Magdeburg on the limnology of lakes created by open-cast lignite mining, emphasizing the often observed geogenic acidification after oxidation of pyrite. The volume has 25 chapters including a chapter with results of group discussions about the topics mentioned above and further problems that were identified during the meeting. The monograph gives a baseline of the state of science on the worldwide problem

of geogenic acidification of lakes following human mining activities.
