This book presents the state-of-the-art
research in the field of transdisciplinary
design, and highlights the challenges and
issues from the perspectives of processes,
people and products in transdisciplinary
product design and development. It
collates research papers resulting from the
'Workshop on the Future of
Transdisciplinary Design' written by
leading researchers in engineering design
and product development. The papers
provide examples and case studies from
existing practices, as well as future
perspectives towards the development of
the complex and ever-changing domains

of engineering design and product
development, with an emphasis on
transdisciplinarity. 'The Future of
Transdisciplinary Design' contains a
selection of research papers in the
following areas related to transdisciplinary
design: -Approaches -Tools and methods -
Management and collaboration -
Distributed and culturally diverse teams -
Modeling, representing and managing
information -Education and training A
transdisciplinary design process is a
design process involving the integrated
use of knowledge, methods and tools from
various disciplines. Design of

product/services increasingly requires cross-disciplinary collaboration, and integration of specialized knowledge from different disciplines is necessary to tackle complex and large scale design problems. This book provides a valuable reference to researchers, professionals and PhD students in the field of engineering design and product development. Design practitioners and those involved in product development in the manufacturing industry will equally benefit from the research presented as well as future advances in this research.

Filmatised in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Northup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where

he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with

family life after being freed.

Ars Electronica has been accompanying and analyzing the digital revolution and its manifold implications since 1979. It has consistently focused and focuses on processes and trends at the interface between art, technology, and society. This artistic-scientific research becomes visible in the form of a festival that is organized every year in Linz (Austria). Its five-day program comprises conferences, panel discussions, workshops, exhibitions, performances, interventions, and concerts. The event is planned, organized, and produced in collaboration with international artists and scientists. Each festival addresses a different volatile future issue. This year it is the "Radical Atoms and the Alchemists of the Future."

This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction

and extensive background notes by the modern English historian Paul Harris. *L'Événement du jeudi* Lindhardt og Ringhof

In this engrossing book, Hollis Clayson provides the first description and analysis of French artistic interest in women prostitutes, examining how the subject was treated in the art of the 1870s and 1880s by such avant-garde painters as Cézanne, Degas, Manet, and Renoir, as well as by the academic and low-brow painters who were their contemporaries. Clayson not only illuminates the imagery of prostitution-with its contradictory connotations of disgust and fascination-but also tackles the issues and problems relevant to women and men in a patriarchal society. She discusses the conspicuous sexual commerce during this era and the resulting public panic about the deterioration of social life and civilized mores. She describes the system that evolved out of regulating prostitutes and the subsequent rise of clandestine prostitutes who escaped police regulation and who were condemned both for blurring social boundaries and for spreading sexual licentiousness among

their moral and social superiors. Clayson argues that the subject of covert prostitution was especially attractive to vanguard painters because it exemplified the commercialization and the ambiguity of modern life.

A fifteen-year-old boy decides to accompany his severely depressed high school French teacher on a road trip to the Canadian province of Quebec, where the mother tongue of Voltaire and Balzac is still spoken and cherished. Clarence Coe's mesmerizing new play is a delicious amalgam of farce and tragedy, a carnival funhouse with very dark corners. Wildly inventive and heartbreakingly sad, the strange odyssey of Jimmy and the unpredictable Mr. Green takes many surprising turns, crossing the border from reality into unreality and back again while encountering displaced characters from history, literature, and the mundane, often dangerous world. Selected by Tony Award-winning playwright John Guare ("House of Blue Leaves, Six Degrees of Separation, "and others) from over 1,000 submissions from 29 countries, Clarence Coe's "Beautiful Province "is the sixth winner of

the DC Horn Foundation/Yale Drama Series Prize. In his foreword, Guare calls Coe's work "elusive and haunting . . . funny, desperate, insane," praising it for "its intriguing story [and] its tone, sustained to the very end." Lyrical and adventurous, "Beautiful Province" is an outstanding new theatrical work, well deserving of these accolades and more.

You may have watched hundreds of episodes of *The Simpsons* (and its sister show *Futurama*) without ever realizing that they contain enough maths to form an entire university course. In *The Simpsons and Their Mathematical Secrets*, Simon Singh explains how the brilliant writers, some of the mathematicians, have smuggled in mathematical jokes throughout the cartoon's twenty-five year history, exploring everything from to Mersenne primes, from Euler's equation to the unsolved riddle of P vs. NP, from perfect numbers to narcissistic numbers, and much more. With wit, clarity and a true fan's zeal, Singh analyses such memorable episodes as 'Bart the Genius' and 'Homer3' to offer an entirely new insight into the most successful show in television history.

This book provides a comprehensive and

wide-ranging introduction to the fundamental principles of mechanical engineering in a distinct and clear manner. The book is intended for a core introductory course in the area of foundations and applications of mechanical engineering, prescribed for the first-year students of all disciplines of engineering. The book develops an intuitive understanding of the basic principles of thermodynamics as well as of the principles governing the conversion of heat into energy. Numerous illustrative examples are provided to fortify these concepts throughout. The book gives the students a feel for how thermodynamics is applied in engineering practice in the areas of heat engines, steam boilers, internal combustion engines, refrigeration and air conditioning, and to devices such as turbines, pumps and compressors. The book also provides a basic understanding of mechanical design, illustrating the principles through a discussion of devices designed for the transmission of motion and power such as couplings, clutches and brakes. No book on basic mechanical engineering is complete without an introduction to materials science. The text

covers the treatment of the common engineering materials, highlighting their properties and applications. Finally, the role of lubrication and lubricants in reducing the wear and tear of parts in mechanical systems, is lucidly explained in the concluding chapter. The text features several fully worked-out examples, a fairly large number of numerical problems with answers, end-of-chapter review questions and multiple choice questions, which all enhance the value of the text to the students. Besides the students studying for an engineering degree, this book is also suitable for study by the students of AMIE and the students of diploma level courses.

This groundbreaking volume on a boundary-stretching art form tackles unconventional approaches to photography and gives voice to forty marginalized and provocative artists from around the world. Photo Brut--a genre of Art Brut, or outsider art--spans photography, prints, photomontage, collage, and other combinations of media and techniques. This art form allows those living on the fringes of society to voice

their unique perception of the world, offering unconventional approaches to issues of sexuality, identity, and reality. This visceral and intimate selection of 520 works offers profound insight into the realm of outsider art. Works focusing on private affairs address questions of sexuality, perversion, the femme fatale icon, the Madonna, and innocence. In other works, artists attempt to reappropriate and tame the world, bringing issues of modern society into sharp focus. Some artists use performance, role play, and blurred/fluid/plural identities as a mode of self-expression. Lastly, practices and rituals using pseudoscientific or magical explanations allow some artists to confront apparitions and terrifying truths, to understand mysterious forces, and to create order. This authoritative first book dedicated to the previously unpublished field is an important contribution to the history of art.

"Inventive and thrilling. . . . I couldn't put it down." —Brit Bennett, #1 New York Times bestselling author of *The Vanishing Half*

“It’s a thrill to read this novel.” —Jia Tolentino, New York Times bestselling author of *Trick Mirror* The gripping story of one scientist in outer space, another who watches over him, the family left behind, and the lengths people will go to protect the people and planet they love For twenty years, Alex has believed that his gene-edited superalgae will slow and even reverse the effects of climate change. His obsession with his research has jeopardized his marriage, his relationships with his kids, and his own professional future. When the Son sisters, founders of the colossal tech company Sensus, offer him a chance to complete his research, he seizes the opportunity. The catch? His lab will be in outer space on Parallaxis, the first-ever luxury residential space station built for billionaires. Alex and six other scientists leave Earth and their loved ones to become Pioneers, the beta tenants of Parallaxis. But Parallaxis is not the space palace they were sold. Day and night, the embittered crew builds the facility under pressure from Sensus, motivated by the promise that their families will join them. At home on Earth, much of the country is ablaze in wildfires and battered by storms.

In Michigan, Alex’s teenage daughter, Mary Agnes, struggles through high school with the help of the ubiquitous Sensus phones implanted in everyone’s ears that archive each humiliation, and wishes she could go to Parallaxis with her father—but her mother will never allow it. The Pioneers are the beta testers of another program, too: Sensus is designing an algorithm that will predict human behavior. Katherine Son hires Tess, a young social psychologist, to watch the experiment’s subjects through their phones—including not only the Pioneers, but Katherine’s sister, Rachel. Tess begins to develop an intimate, obsessive relationship with her subjects. When Tess and Rachel travel to Parallaxis, the controlled experiment begins to unravel. Prescient and insightful, *A House Between Earth and the Moon* is at once a captivating epic about the machinations of big tech and a profoundly intimate meditation on the unmistakably human bonds that hold us together. Shoes, gloves, umbrellas, cigars that are not just objects—the topic of fetishism seems both bizarre and inevitable. In this

venturesome and provocative book, Emily Apter offers a fresh account of the complex relationship between representation and sexual obsession in turn-of-the-century French culture. Analyzing works by authors in the naturalist and realist traditions as well as making use of documents from a contemporary medical archive, she considers fetishism as a cultural artifact and as a subgenre of realist fiction. Apter traces the web of connections among fin-de-siècle representations of perversion, the fiction of pathology, and the literary case history. She explores in particular the theme of "female fetishism" in the context of the feminine culture of mourning, collecting, and dressing.
