The Haitian Creole Language is the first book dealing with the central role of Creole in Haiti and the Haitian diaspora, especially in the United States. Dispelling myths about Creole, with discussions of Haitian and Haitian Creole history, it provides a foundation for educators, service providers, policy makers, social scientists, and language and literature scholars to understand Creole in its historical, social, political, educational, and economic developmental contexts.

The classic, in-depth history of psychoanalysis, presenting over a hundred years of thought and theories Sigmund Freud's concepts have become a part of our psychological vocabulary: unconscious

thoughts and feelings, conflict, the meaning of dreams, the sensuality of childhood. But psychoanalytic thinking has undergone an enormous expansion and transformation since Freud's death in 1939. With *Freud and Beyond*, Stephen A. Mitchell and Margaret J. Black make the full scope of twentieth century psychoanalytic thinking—from Harry Stack Sullivan to Jacques Lacan; D.W. Winnicott to Melanie Klein—available for the first time. Richly illustrated with case examples, this lively, jargon-free introduction makes modern psychoanalytic thought accessible at last.

The first full study of the relationship between literacy and democracy in fifth-century Athens. Through a close analysis of key democratic institutions, such as ostracism, the Council of 500, and the demes and tribes, Missiou argues that literacy was widespread among the common citizens of Athens.

Ion Channels Basic Books

Ion channels are crucial components of living cells. Situated in the cell's membranes, they allow particular ions to pass from one side of the membrane to the other. In recent years the patch clamp technique has allowed the activity of individual channels to be measured, and recombinant DNA technology has led to fascinating detail on their structure. Together, these technical advances have produced a great flowering of knowledge and understanding about the subject, itself leading to further breakthroughs in science and medicine. *Ion Channels* provides an introduction to this scientific endeavour. It emphasises the molecular structure of channels as determined by gene cloning technology. This knowledge illuminates discussions of the

permeability and selectivity of channels, their gating and modulation, their responses to drugs and toxins and the human diseases caused when they do not function properly.

Literacy and Democracy in Fifth-Century Athens BRILL

Contains scholarly evaluations of books and book chapters as well as conference papers and articles published worldwide in the field of Latin American studies. Covers social sciences and the humanities in alternate years.

Almanaque Abril Dark Horse Comics

The fourth edition of this highly successful text has been extensively revised and restructured to take account of the many recent advances in the subject and bring it right up to date. The classic observations of recent years can now be interpreted with the powerful new techniques of molecular biology. Consequently there is much new material throughout the book, including many new illustrations and extensive references to recent work. Its essential philosophy remains the same, though: fundamental concepts are clearly explained, and key experiments are examined in some detail. This textbook will be used by students of physiology, neuroscience, cell biology and biophysics. Specializing undergraduates and graduates as well as lecturers and researchers will find the text thorough and clearly written.

Wolfgang Sonne examines the relationship between urban design and politics in five major capital cities, all of which underwent comprehensive planning at the beginning of the twentieth century: Washington, Berlin, Canberra, New Delhi and the World Centre of Communication, a proposed international capital of peace. With more than 150 illustrations, this book explores the evolution of the ambitious urban design schemes of the period and the difficulty in integrating architecture with the political ideals it endeavours to represent. Beginning with volume 41 (1979), the University of Texas Press became the publisher of the Handbook of Latin American Studies, the most comprehensive annual bibliography in the field.

Compiled by the Hispanic Division of the Library of Congress and annotated by a corps of more than 130 specialists in various disciplines, the Handbook alternates from year to year between social sciences and humanities. The Handbook annotates works on Mexico, Central America, the Caribbean and the Guianas, Spanish South America, and Brazil, as well as materials covering Latin America as a whole. Most of the subsections are preceded by introductory essays that serve as biannual evaluations of the literature and research underway in specialized areas. The Handbook of Latin American Studies is the oldest continuing reference work in the field. Dolores Moyano Martin, of the Library of Congress Hispanic Division, has been the editor since 1977, and P. Sue Mundell has been assistant editor since 1994. The subject categories for Volume 55 are as follows: Anthropology (including Archaeology and Ethnology) Economics Electronic Resources for the Social Sciences Geography Government and

Working closely with publisher Casterman and Moebius

Production, Dark Horse now brings you Numa Sadoul's landmark interviews with Jean "Moebius" Giraud. The master reflects on his many lives as an artist and man, from his Heavy Metal breakthrough era to a year before his untimely passing. Numa Sadoul--whose exclusive fourteen-hour interview with Hergé in 1971 was the basis of the 2003 documentary Tintin and I--is known for his book-length conversations with such major comics figures as Jacques Tardi, André Franquin (Spirou), and Albert Uderzo (co-creator of Astérix). Edward Gauvin, translator of over three hundred graphic novels, brings us Sadoul's English-language debut, as he explores the mind of the maestro Mœbius. *The Physiology of Excitable Cells* Cambridge University Press Nissinen's award-winning book surveys attitudes in the ancient world toward homoeroticism, that is, erotic same-sex relations. Focusing on the Bible and its cultural environment--Mesopotamia, Greece, Rome, Israel--Nissinen concisely and readably introduces the relevant sources and their historical contexts in a readable way. Homoeroticism is examined as a part of gender identity, i.e., the interplay of sexual orientation, gender identification, gender roles, and sexual practice. In the patriarchal cultures of the biblical world, Nissinen shows, homoerotic practices were regarded as a role construction between the active and passive partners rather than as expressions of an orientation moderns call "homosexuality." Nissinen shows how this applies to the limited acceptance of homoerotic relationships in Greek and Roman culture, as well as to Israel's and the early church's

condemnation of any same-sex erotic activity. For readers interested in the ancient world or contemporary debates, Nissinen's fascinating study shows why the ancient texts - both biblical and nonbiblical - are not appropriate for use as sources of direct analogy or argument in today's discussion.

Dictionnaire des littératures policières à vocation encyclopédique proposant aussi bien des articles sur les thèmes caractéristiques du genre policier que sur les collections, les magazines, les auteurs (notices biobibliographiques), les personnages, etc. *STRUCTURED COMPUTER ORGANIZATION* Editions Joseph K Panthée presents a collective reflection relating to the changes that affected the Graeco-Roman Empire and over the long term altered its religious landscapes. Fifty years after the foundation of the series EPRO, the volume aims to avoid the division between the supposedly "Roman" or "Graeco-Roman" and the "Oriental" by linking the available information relating the different major areas, such as the relation between local and global, the place of emotions in relation to soteriological and initiatory aspects, strategies of integration and negotiation of identities. For the first time the leading specialists in every field bring their approaches into contact with one another, and jointly construct a picture of practices and conceptual frames, which, in their diversity and inter-action, model a religious universe whose complexity will help to understand our modern globalising world. Panthée propose une réflexion collective sur les mutations qui ont affecté l'Empire gréco-romain et ont progressivement remodelé ses paysages religieux. Cinquante ans après la création de la

collection des EPRO, ce livre ambitionne de dépasser le clivage entre ce qui serait "romain", ou "gréco-romain", et ce qui serait "oriental" en articulant les données disponibles autour de quelques thèmes majeurs, comme les jeux d'échelle entre local et universel, la place du registre des émotions en relation avec les dimensions sotériologiques et mystériques, les stratégies d'intégration et de négociation des identités. Pour la première fois, les meilleurs spécialistes venus de tous les horizons croisent leurs approches et construisent ensemble un tableau des pratiques et des cadres de pensée qui, dans leur diversité et dans leur interaction, dessinent les contours d'un univers religieux dont la complexité aide à penser le monde moderne de la globalisation.

November 1995 What happens to poverty and income inequality during the early period of transition to a market economy? Poverty is on the rise, and income inequality widens. Better targeting of social assistance and pension reform are the necessary policy reforms. In examining what happens to poverty and income inequality during the early period of transition to a market economy, Milanovic covers the period up to 1993. His analysis includes almost all transition economies that were not affected by wars, blockades, or embargoes. (In economies so affected, the intrinsic issues of transition are overshadowed by more basic issues of war or quasi-war economy and survival.) The two key issues of social policy in transition economies are pension reform and better targeting of social assistance. Pensions

represent 70 to 80 percent of cash social expenditures. No reduction of current levels of social spending (which is unsustainable) can be envisaged without pension reform. Better targeting of social assistance is needed because many universally or enterprise-provided benefits have been terminated, poverty has increased, and social programs lack funding. If poverty is on the rise and money is scarce, better targeting is the only option. This paper -- a product of the Transition Economics Division, Policy Research Department -- is part of a larger effort in the

department to study social effects of transition.
