"Anyone who looks beyond the bestseller lists can see that the literary landscape outside its commercial walls is just as varied as that of visual art, just as wild, just as conceptual: novels in the form of dioramas, narratives read through virtual-reality glasses, or told as a series of tweets, stories told as recipes, poems in skywriting, genetic code, pixels, skin-as well as print and sound. The 100+ prose works and poems that make up Conceptualisms all have the strangeness authors have always given ordinary speech in order to transform it into literature. In fact, this strangeness, or unfamiliarity, may be the very core of what makes writing literature, and pushed to its boundaries, what makes literature conceptual. Experimental, conceptual, avant-garde, hybrid, surfiction, fusion, radical, slip-stream, avant-pop, postmodern, self-conscious, innovative, L=A=N=G=U=A=G=E writing, alternative, anti- or new literature.... Across the years, a variety of names have been used to describe fiction, poetry and hybrid writing that, like conceptual visual art, foregrounds its ideas, explores new forms, challenges mainstream writing traditions, strives for ways to speak to the present. Along with whatever else they do, they ask, Why isn't this also literature?-and keep the boundaries of literature flexible and unresolved. Now, for the first time, here is an anthology that offers an overview of this other tradition as it lives in the early decades of the 21st century. The first major anthology of this other tradition, Conceptualisms presents writing by over 90 authors, across three generations, representing a plethora of aesthetics and approaches to their subjects. Readers will recognize authors who have shaped the nature of contemporary writing, such as Lydia Davis, Charles Bernstein, Nathaniel Mackey, David Foster Wallace, and Claudia Rankine. They'll also find authors, and responses to the canon, that they haven't yet encountered. Conceptualisms is a book of ideas for writers, teachers and scholars, as well as readers who wonder how many ways literature can live"--

Kalevala the Epic Poem of Finland - Complete Library of Alexandria

Compiled by the various sources of Finland's national mythology, the Kalevala outlines the creation myths of the world and typical stories of heroes of old including romance, lust and conquest. The stories that are told here are a national icon for the people of Finland, which makes this volume an important part of human history.

The Kalevala is the national epic of Karelia and Finland and one of the most significant works of Finnish literature. Today's modern version was compiled in the 19th century by Elias Lönnrot from Karelian and Finnish oral folklore and mythology. The epic tells the story about the Creation of Earth, describing the controversies and retaliatory voyages between the peoples of the land of Kalevala called Väinölä and the land of Pohjola and their various protagonists and antagonists, as well as the construction and robbery of the mythical wealth-making machine Sampo.

A Common-school Pronouncing Dictionary of the English Language e-artnow

In primeval times, a maiden, Beauteous Daughter of the Ether, Passed for ages her existence In the great expanse of heaven, O'er the prairies yet enfolded. Wearsome the maiden growing, Her existence sad and hopeless, Thus alone to live for ages In the infinite expanses Of the air above the sea-foam, In the far outstretching spaces, In a solitude of ether, She descended to the ocean, Waves her coach, and waves her pillow. Thereupon the rising storm-wind Flying from the East in fierceness, Whips the ocean into surges, Strikes the stars with sprays of ocean Till the waves are white with fervor.

The World Atlas of Language Structures is a book and CD combination displaying the structural properties of the world's languages. 142 world maps and numerous regional maps - all in colour - display the geographical distribution of features of pronunciation and grammar, such as number of vowels, tone systems, gender, plurals, tense, word order, and body part terminology. Each world map shows an average of 400 languages and is accompanied by a fully referenced description of the structural feature in question. The CD provides an interactive electronic version of the database which allows the reader to zoom in on or customize the maps, to display bibliographical sources, and to establish correlations between features. The book and the CD together provide an indispensable source of information for linguists and others seeking to understand human languages. The Atlas will be especially valuable for linguistic typologists, grammatical theorists, historical and comparative linguists, and for those studying a region such as Africa, Southeast Asia, North America, Australia,

and Europe. It will also interest anthropologists and geographers. More than fifty authors from many different countries have collaborated to produce a work that sets new standards in comparative linguistics. No institution involved in language research can afford to be without it.

This monograph presents the still young, but already large and very active interdisciplinary realm of computer supported cooperative work (CSCW) in a systematic and well-balanced way. Besides technical progress also the cultural, social, legal, psychological and economic aspects of CSCW are discussed. The book makes accessible a wealth of information and culminates in the development and detailed discussion of a "Collaboratory" suitable to fulfil the needs of scientific cooperation in Europe. The book addresses CSCW research and development professionals as well as the general scientist interested in CSCW-based scientific cooperation. The bibliography with its more than 600 entries and the subject index are particularly comprehensive and helpful.

Mechanisms of Inorganic and Organometallic Reactions provides an ongoing critical review of the primary literature concerned with mechanisms of inorganic and organometallic reactions. The main focus is on reactions in solution, although solid-state and gas-phase studies are included where they provide relevant mechanistic insight. Each volume covers an eighteen-month literature period, and this, the eighth volume in the series, includes papers published during January 1990 through June 1991. Where appropriate, references to earlier reports and to specific sections in previous volumes are given. Coverage spans the whole area as comprehensively as possible in each volume, and while it is impossible to be absolutely exhaustive, every effort is made to include all of the important published work that is relevant to the elucidation of reaction mechanisms. Numerical data are reported in the units used by the original authors, and they are converted to common units only when comparisons are being made. The successful format of earlier volumes is retained to facilitate tracing progress over several years in a particular topic, and the series now permits this to be done for a twelve-year period. The introduction three volumes ago of computerized techniques to improve cross-referencing in the Index brought positive reader comments, and their use is being continued.

The third edition succeeds the fifth update of second edition. One of the main features has been the adoption of new and revised international standards, notably the International Standard Identifier for Libraries and Related Organizations, the ISBN 13 and the linking ISSN. New fields have been added for recording the Persistent Record Identifier. Uniform Conventional Headings for Legal and Religious texts are now catered for with separate fields. A number of fields have been revised: archival materials, manuscripts and documentation produced by the ISSN International Centre.
