Thematic Mapping from Satellite Imagery: A Guidebook discusses methods in producing maps using satellite images. The book is comprised of five chapters; each chapter covers one stage of the process. Chapter 1 tackles the satellite remote sensing imaging and its cartographic significance. Chapter 2 discusses the production processes for extracting information from satellite data. The next chapter covers the methods for combining satellite-derived information with that obtained from conventional sources. Chapter 4 deals with design and semiology for cartographic representation, and Chapter 5 presents examples of applications. The book will be of great use to cartographers who want to utilize satellite imaging in generating a map.

L'opéra italien n'a cessé de s'enrichir au contact de la littérature française. Les échanges entre ces deux genres se caractérisent par le double jeu de proximité et de distance qui existe entre eux. La recherche en dramaturgie musicale éclaire les questions auxquelles sont confrontés traducteurs, librettistes et compositeurs dans leur travail de réécriture pour la scène lyrique italienne.

The essays collected here illustrate aspects of recent research conducted by graduate students in Canadian studies at various European universities. The methodological diversity displayed points to the very essence of the culture the contributors explore - what has been commonly termed the Canadian mosaic or, more recently, the Canadian kaleidoscope (Janice Kulyk-Keefer). In analysing the many facets of this mosaic, the numerous images of this kaleidoscope, the contributors offer fresh and youthful reappraisals of traditional visions of Canadianness.
