The phenomenal life of Ukrainian peasant Nestor Makhno (1888-1934) provides the framework for this breakneck account of the downfall of the tsarist empire and the civil war that convulsed and bloodied Russia between 1917 and 1921. Mahkno and his people were fighting for a society "without masters or slaves, with neither rich nor poor." They acted towards that idea by establishing "free soviets." Unlike the soviets drained of all significance by the dictatorship of a one-party State, the "free soviets" became the grassroots organs of a direct democracy - a living embodiment of the free society - until they were

betrayed, and smashed, by the Red Army. Delving into a vast array of documentation to which few other historians have had access, this study illuminates a revolution that started out with the rosiest of prospects but ended up utterly confounded. More than just the incredible exploits of a guerilla revolutionary par excellence, Skirda weaves the tale of a people, and the organizations and practices of anarchism, literally fighting for their lives.

Offering rhetorically informed strategic interventions, this innovative collection moves beyond critiques of mental health issues, problems, and care. With

sections that focus on methodological, cultural and legal, and pedagogical interventions, readers will find an engaging discussion of a discrete mental health phenomenon as well as a clear interventional takeaway in each chapter. Contributors make use of critical discourse analyses, ethnographic inquiries, autoethnographic inquiries, case studies, and textual analyses to engage such mental health research topics as postpartum depression among Chinese mothers; insanity pleas; anosognosia; issues of intimacy, access, and embodiment in research projects; community support groups; Black mental health; women in Alcoholics Anonymous; and mental health in faculty workshops and university online health tools. The authors and editors create scholarship on mental health that explicitly builds productive methodological, theoretical, and practical bridges among scholars and teachers in the various specialties of writing and communication. This collection will interest scholars, students, and

practitioners in health and medical humanities; rhetoric of health and medicine; health communication; medical anthropology; scientific and technical communication; disability studies; and rhetorical studies generally.

This is an illustrated history of the extraordinary Anglo-American Wheelwright family. In 1636 an outspoken Puritan, Reverend John Wheelwright, left his native Lincolnshire and headed for the new Boston Bay Colony. His stay in Massachusetts would be short lived. Persecuted and banished, Reverend John went on to found two New England towns and a dynasty which now spans six continents. The Wheelwrights have produced explorers, engineers, clerics, consuls and a family of cannibals. There are philanthropists, philanderers, psychoanalysts, scientists, soldiers and sailors. A sea captain became a pirate. A lawyer became a gold-digging sportsman and a kidnapped child was transformed from Puritan to Catholic mother

superior. The Wheelwright's story, complete with black sheep and skeletons aplenty, spans four centuries. Hundreds of illustrations and family charts, drawn from years of research, bring 580 pages of this most remarkable family's history to life. The Loyal Martyr Vindicated. [A Refutation of the Answer, by Edward Fowler, to John Ashton's Paper.] Cambridge University Press

No serious philosopher or student of philosophy can afford to neglect Wittgenstein's work. Professor Fogelin provides an authoritative critical evaluation of both the Tractatus Logico-Philosophicus and

Philosophical Investigations, enabling the reader to come to grips with these difficult yet key works. Fogelin explains Wittgenstein's attempt in the Tractatus to combine a picture theory of propositional structure, and also explores Wittgenstein's own criticisms of the Tractarian synthesis. He gives particular attention to topics in the philosophy of language, logic, psychology and the foundations of mathematics, examining Wittgenstein's work on these fields and arguing that Wittgenstein's criticisms in these areas form the basis for a radically new standpoint in philosophy.
