This is a comprehensive coverage of clay target shooting. It is for beginners as well as intermediate shooters but includes reviews of techniques and concepts that would be helpful to the more advanced shooter. The format is concise and it is well illustrated. The keys to success are the fundamentals including a consistent/reproducible strong stance and gun mount, knowing where and how you want to visualize and eventually break the target, and the preparation and follow through in the actual target acquisition. The book also covers strategy and various target presentations in skeet, trap and sporting clays. In addition, there are recommended practice drills and appendices covering terminology, how a shotgun firing mechanism works and the rules. The authors include 2 level 3 NSCCA instructors and reflect personal observations of decades of experience. The format is designed to bring out the concepts both by illustrations as well as concise text to make the reader a more consistent and successful shooter.

Stock Fitter's Bible was written for one purpose, to help clay target shooters improve their scores. As you read you will understand why the book has received so many rave reviews. Coaches and trainers teach specific gun mounts, stances and body postures (shooting forms). To shoot up to your full potential, you must use a correct form. To do that, your gun must have

stock dimensions that allow someone of your individual size and shape to use the form. If your gun doesn't fit you, a correct form cannot be used - it's that simple. To help you shoot better, the book explains step by step, how your gun can be made to fit you. When it fits, you can expect smoother, more accurate swings, higher, more consistent scores and reduced felt recoil. It also explains how to see targets better, how to effectively visualize targets before calling for them, ways to reduce stress and to postpone fatigue. Almost anyone can improve their shooting. Stock Fitter's Bible explains how to do it.
