All parts of the body need exercise for optimal health, and the eyes are no different. Vision for Life presents an approach to eye health for people with 20/20 vision who wish to maintain their perfect vision as well as people who see poorly and would like to improve their eyesight. Clients of the Meir Schneider Self-Healing Method experience their own capacity to bring about recovery, reversing the progress of a wide range of degenerative conditions including eye disease. Based in part on the established Bates Method of eyesight improvement and in part on his own professional and personal discoveries, Meir Schneider's pioneering approach has helped thousands of people successfully

treat a host of eye problems, including near- and farsightedness, astigmatism, lazy eye, double vision, glaucoma, cataracts, macular degeneration, retinal detachment, retinitis pigmentosa, and nystagmus. This revised edition includes a new chapter on children's eye health and new research and exercises for specific conditions, i.e., glaucoma and nystagmus, near- and farsightedness. Born blind to deaf parents, Schneider underwent a series of painful operations as a young child and was left with 99 percent scar tissue on the lenses of his eyes, resulting in his being declared incurably blind. At the age of seventeen, he discovered how to improve his vision from less than 1 percent to 55 percent of normal vision with the eye exercises presented in this book. Today Schneider drives a car, reads, and enjoys the benefits of full natural vision. He and his clients prove time and time again how much vision can improve with exercise. His contributions to the field of self-healing are recognized by alternative health practitioners and medical doctors alike. In Vision for Life, Schneider shares forty years of discoveries made on his personal and professional journey. The book details simple but effective techniques to gain great vision such as sunning and palming. Such exercises are not only strengthening but also

restorative and deeply relaxing. The reader learns how to reverse developing issues before they cause damage or to remedy existing problems, including pathologies such as glaucoma, cataracts, macular degeneration, retinal detachment, and optic nerve neuropathy. From the Trade Paperback edition.

Ocular Infection iUniverse

This book covers sports-related eye injuries, presenting standard processes to enable clinical practitioners to make appropriate decisions on the management of these patients. Sports-related activities are responsible for a large percentage of ocular injuries, particularly among young people, and can even lead to blindness. Given the increasing trend in these injuries and the potential functional loss they entail, it is important to understand how to prevent and to accurately diagnose and treat them. This book discusses the definition, etiology, clinical presentations and signs, treatment, and prevention of sports-related eye injuries, and includes typical clinical cases, together with a wealth of images and illustrative figures. Offering a systematic and symptom-based guide to clinical practice, it will help clinical practitioners to fully prepare for the various challenges posed by sports-related eye injuries.

Research Projects in Dry Eye Syndrome World Scientific

Author Marios Kyriazis brings a wealth of medical expertise to one of the most important breakthroughs in recent times to help combat a disease called "senile cataract", which affects one in five people over the age of fifty-five. In the past, the only treatment available for this chronic condition was painful and potentially dangerous surgery to remove the cataract. Other treatments are now available, specifically, the new Russian breakthrough N-acetylcarnosine. In clinical trials, this treatment has shown dramatic and impressive results in treating age-related cataracts. The *Cataract Cure* also covers other associated eye disorders including: Glaucoma Macular Degeneration Infection of the cornea Dry eye syndrome Computer vision syndrome Eyestrain Blurred vision The *Cataract Cure* is an essential resource for those cataract sufferers who are looking for an alternative treatment and want to avoid eye surgery. The answer to curing senile cataract is clear--don't lose sight of it

Ocular Surface Disorders Dr. Travis Zigler and Dr. Jenna Zigler

Losing your eyesight is a frightening thought. Yet, every five seconds someone in the world goes blind. Most causes of visual impairment are caused by age-related diseases such as cataracts, glaucoma, macular degeneration, and diabetic retinopathy. Modern medicine has no cure for these conditions. Treatment usually involves managing the symptoms and attempting to slow the progression of the disease. In some cases surgery is an option, but there is always the danger of adverse side effects that can damage the eyes even further. Most chronic progressive eye disorders are considered incurable, hopeless. However, there is a successful treatment. It doesn't involve surgery, drugs, or invasive medical procedures. All that is needed

is a proper diet. The key to this diet is coconut, specifically coconut oil. The author used this method to cure his own glaucoma, something standard medical therapy is unable to do. The coconut based dietary program described in this book has the potential to help prevent and treat many common visual problems including the following: ● Cataracts ● Glaucoma ● Macular degeneration ● Diabetic retinopathy ● Dry eye syndrome ● Sjogren's syndrome ● Optic neuritis ● Irritated eyes ● Conjunctivitis (pink eye) ● Stroke ● Eye disorders related to neurodegenerative disease (Alzheimer's, Parkinson's, MS) Most chronic eye disorders come without warning. No one can tell who will develop a visual handicap as they age. Everybody is at risk. Once the disease is present, treatment is a lifelong process. The best solution is prevention. In this book, you will learn the basic underlying causes for the most common degenerative eye disorders and what you can do to prevent, stop, and even reverse them.
